

VARA-WASP

GERGŐ
ZOLTÁN FULLÉR
AGE 12 - HUNGARY

"Vara-wasp" is a combination of a wasp and a varanus.

He uses his tongue to smell and he likes flying. He feels uncomfortable in cities, preferring meadows.

When threatened, he uses the sting on his tail to protect himself. The idea of the name came first, then I built the animal.

It was an exciting process to see how the image that was formed in my imagination turned into reality.
