Rings of Samadhi Fire

Ages ago, a fire burned that no one could put out. The fire was split into three rings and hidden where it was hoped no one could find them. If someone collects all three and rekindles the Samadhi flame, they could cause terrible destruction.

Robot Mo

This mechanical version of Sandy's cat, Mo, is suited up and ready for a space adventure.

Shadow Monkeys

Although these duplicates of Evil Macaque are almost as powerful as their creator, they can still be destroyed if they are hit hard enough.

Mr. Tang

An expert on the legends of Monkey King, Mr. Tang is always willing to help out Monkie Kid in exchange for a free meal.

TOO MANY RABBITS!

MINECRAFT

The Rabbit Ranch is always a fun place to visit. But what's this? The rabbits are running around everywhere, looking for carrots and dandelions!

HOW MANY?

A TRIP TO THE MOON!

Duke DeTain, Freya McCloud and Mayor Fleck have travelled to the Moon to visit the new Lunar Research Base. There's lots of stuff to do and explore there, but they'd better be careful. The Moon can be a pretty strange place!

Although they look the same size in the sky, the Moon is much smaller than the sun.

The Moon's gravity is not as strong as Earth's, so you can jump up to three metres high there.

There's no sound on the Moon.

AND I'LL PROVE IT! NO TIME! I JUST NEED A PAPER CLIP, SOME STRING, A BOOMERANG AND A HOCKEY PUCK.

WHO NEEDS A TRAMPOLINE? NOT ME!

WHAT'S THAT? I CAN'T HEAR YOU! HMMM, THAT'S ODD.

Hey, did you hear that there's water on the Moon?

BUT NO SWIMMING POOLS.

The Moon is shaped like an egg.

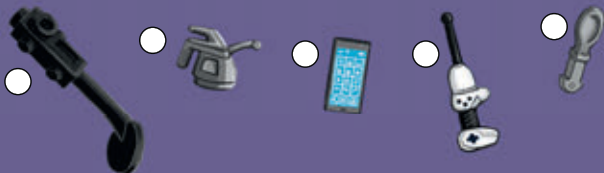

THAT WOULD BE ONE BIG CHICKEN!

Did You Know...?
Although they look like plants, coral are actually marine animals related to jellyfish and sea anemones.

TIPS FOR BUILDING YOUR OWN MODELS

- Don't worry about matching the colours of whatever it is you are creating.
- Use whatever colours you like!

CREATING A CORAL REEF

Coral reefs, like the one shown in this amazing model, are the colourful homes to many different types of aquatic life. How many different ocean creatures can you spot in this picture?

Meet the Model Builders

For adult LEGO® builders Sharon Vance and Amy Willis, the chance to work together to create a model of a coral reef fit in beautifully with their love for the natural world.

"Amy and I had a great time working together to create our underwater scene and were inspired by our appreciation for clean, beautiful water," said Sharon. "We were both raised in Michigan [in the United States], which is known as the Great Lakes state, and is surrounded by miles of water that people from all over come to enjoy."

Along with being a beautiful, detailed model, Sharon and Amy's creation is a reminder of how important coral reefs are to the environment and why it is important to protect them. Coral reefs provide shelter and food to many marine animals.

Sharon Vance is a former chemistry professor who specialises in making large LEGO mosaics.

Amy Willis is a LEGO Ambassador and enjoys building with her daughter.

- Before you try to create something huge, practise building small objects around your house.

- Celebrate Earth Day on 22 April and build your own model of the planet Earth.

ARIEL'S CASTLE QUEST!

Next issue of the LEGO® Life Magazine out in July!

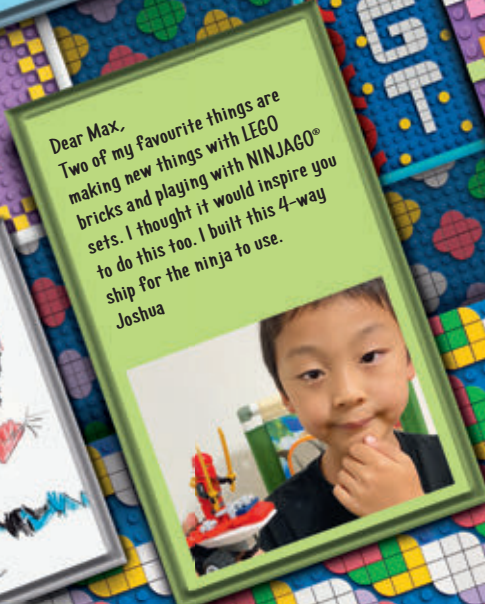

Dear Max,
I call my build "Minecraft® Village City". Here's a tip for your magazine. Maybe you could put lots of LEGO® bricks in a tiny bag (not plastic, please), stick them to the activity page and then the puzzlers get these LEGO bricks as a reward! You can build with them yourself.
Max, I hope you like my LEGO world. I drew you a picture, because I'm quite good at drawing. Thanks Max!!!

Anna

Dear Max,
Hi, I'm a LEGO Life Magazine lover. I love to look at magazines, read magazines and even be in magazines! I made a Cool Creation of a cat made out of DOTS. Its colours are green, hot pink, light pink, orange, white, purple, teal and light teal.
Cora

Dear Max,
Two of my favourite things are making new things with LEGO bricks and playing with NINJAGO® sets. I thought it would inspire you to do this too. I built this 4-way ship for the ninja to use.
