LEGO Technic™ School Construction

Meet MAX 3000!

WOW, MAX REALLY CHANGED HIS LOOK OVER THE SUMMER!

# WELCOME BACK!

It's a new school year and that means lots to discover, new friends to make and more. We're here to help you get started right, with this special edition of the school newspaper. You'll find a new comic starring me, an interview with Lightning Ninja Jay, fun facts about the world's jungles and oceans, a look at the equipment being used to build the school's new gym, and tips on how you can get your desk in awesome order. So let's get started!

**MAX**

# MARCH OF THE AT-ATs!

© & ™ Lucasfilm Ltd.

AT-ATs are about the most awesome Star Wars vehicles! These were used by both the Empire and the First Order to try to walk right over their enemies, and they are pretty indestructible (unless they step in tauntaun poop, then they take forever to clean). You can see them in multiple Star Wars™ movies, video games, and more. They have become one of the most recognized symbols of the Star Wars universe!

## AT-AT TRUE OR FALSE

1. AT-AT stands for "All-Terrain Armored Transport."  
**TRUE / FALSE**

2. AT-AT weapons include laser cannons, blaster cannons and the atomic sneeze.  
**TRUE / FALSE**

How much do you know about these mighty Imperial machines? Take this quiz and find out!

3. One way to defeat an AT-AT is to tie its legs together.  
**TRUE / FALSE**

4. There would have been more AT-ATs at Hoth, but they ran out of snowshoes for them.  
**TRUE / FALSE**

### BONUS QUESTION

The AT-AT first appeared in Star Wars Episode V: The Empire Strikes Back. **TRUE / FALSE**

# ALPACA MOUNTAIN RESCUE!

Written by Mia and Stephanie

**We just got back from a school trip to South America. Our science class was there to learn about jungles, mountains and rain forests, the wildlife that lives there, and how we can all help to protect the environment. A photographer from National Geographic came along to take pictures of our expedition.**

We made a base camp in the foothills of the Andes. We were there to learn about alpacas, a herd animal that lives on farms here and is prized for its

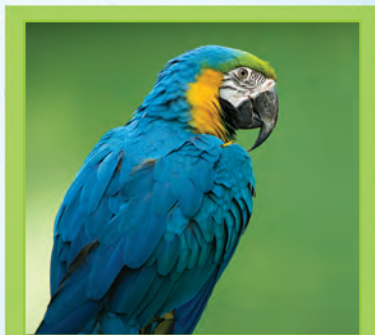

wool. Little did we know we would wind up in the middle of an adventure!

**MIA:** I flew my helicopter near the top of a mountain to check out some alpacas on the high slope. Just then, my instruments showed the mountain was a volcano about to erupt. I had to act fast.

**STEPHANIE:** Mia radioed me and we came up with a plan. I made my way to the herd of alpacas and slipped harnesses around the animals. One by one, Mia airlifted them with the helicopter and deposited them where they would be out of danger.

Not long after that, Andrea and Emma arrived by hot-air balloon.

What the four of us learned is that the wild is a place of great beauty, but unexpected dangers too. Animals and birds of all kinds call the wilderness home. If it gets destroyed, they will have no place to live and may go extinct.

**TIP:** You can help migrating birds to make it home to Central and South America. By putting a bird bath or a bird house in your yard, you can provide water and shelter for birds as they fly south for the winter.

**DID YOU KNOW?**  
Alpacas are sometimes used to **guard sheep herds**. They're so tall they can **spot danger** before the sheep do.

Jay is one of the heroic ninjas who have saved the world of NINJAGO® again and again. Although the battles in Shintaro are constant, we were able to quickly interview him before evil villains regrouped for their next attack.

# MEET JAY

## THE LIGHTNING NINJA!

**So, Jay, what brought you to the ninja kingdom of Shintaro?**

**JAY:** My fellow ninjas and I were invited to a princess' birthday party. We were excited to attend - we heard Shintaro is a really cool place. Turns out, it's fantastic for epic battles! Not so much for birthdays.

**How come?**

**JAY:** Cole found out that underneath the city

there are these dark, damp dungeons. There's a wicked Skull Sorcerer forcing two tribes to work for him. So, we're going to take him down because that's what ninjas do!

**Is he dangerous?**

**JAY:** He knows a lot of magic and he's got skeleton warriors and this big skeleton dragon working for him. Lots of skeletons. But I guess when you've got "skull" in your name, that kind of goes with it.

**Any advice for the students at our school?**

**JAY:** Well, I'm an inventor, so science is the best. Staying in shape is important too - you never know when you might have to fight your way out of a dungeon. And if you get invited to a birthday party, make sure you at least get a piece of cake before things get messy.

**Finally, tell us something about you that no one knows.**

**JAY:** In between adventures, sometimes I like to write funny haiku poems about my friends, I wrote one about Kai that you can have, okay?

## CREATE YOUR OWN HAIKU!

A haiku is a special kind of poem. It is only three lines long. The first line has five syllables, the second line has seven and the third line has five. Check out the example on the right written by Jay and then try writing your own below.

1 2 3 4 5  
Kai|is|cooking|food,

1 2 3 4 5 6 7  
Phew!|What|is|that|awful|smell?

1 2 3 4 5  
Time|to|order|out.

## CAN PEOPLE LIVE UNDER THE SEA?

Written by: Jack Neighbour

### MEET NATIONAL GEOGRAPHIC UNDERWATER EXPLORER GRACE YOUNG.

Did you know that scientists and explorers have been living underwater for years now? An engineer named Grace Young spent two weeks living in an underwater habitat called the Aquarius – an air-filled living space not much bigger than a school bus.

While she was inside, Grace adapted a high-speed camera for use underwater that's fast enough to catch underwater critters in action. She has filmed all kinds of creatures with her camera, like the mantis shrimp, which hides and then snatches prey. She's also filmed how a lizardfish moves along by coiling its body like a spring and shooting itself out of the sand.

Grace Young loved her time living under the sea, and even after breaking the surface to feel the sun on her face again, she can't wait until she can return underwater after dreaming up more ways to study the mysterious marine life that lives there.

# UNDERSEA TREASURES!

### DID YOU KNOW?

Submarines come in all shapes and sizes. The very **first submarine** was built way back in **1620** by Dutch inventor **Cornelis Drebbel**.

## SEA JUNK MAZE

It's important that we all do our part to keep the oceans clean.

Can you help the deep sea diver clean up all 4 pieces of junk as you navigate through the maze?

**START**

SUPPORTING  
NATIONAL GEOGRAPHIC  
EXPLORERS

LEGO® City supports National Geographic Society Explorer Grants. National Geographic Insignia and Identifiers have been provided by and used with permission of National Geographic.

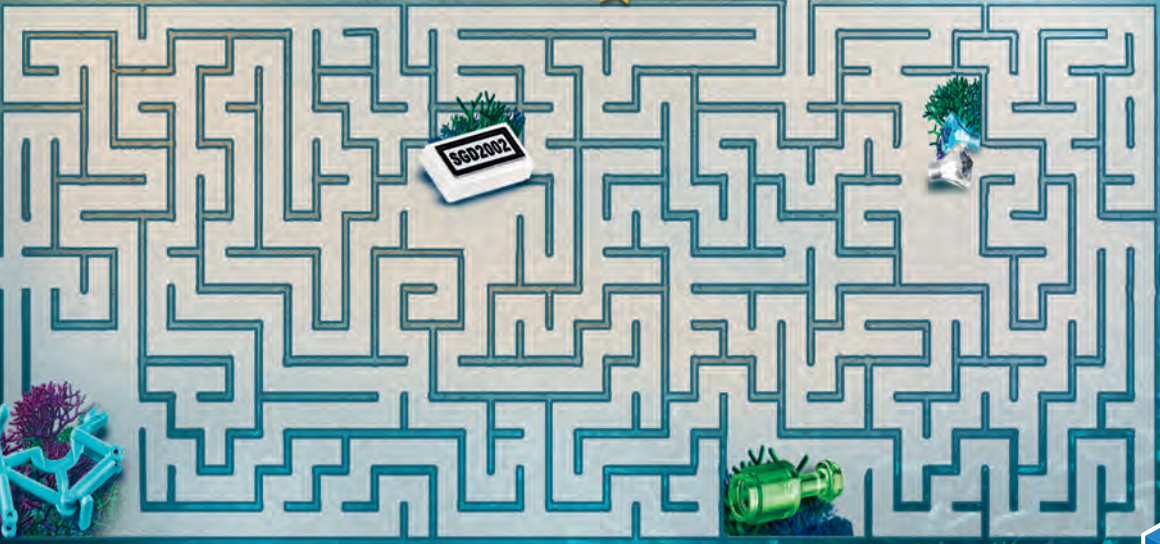

Science class this month has been all about the things you can find under the sea. Not only are there shipwrecks and treasures down there, but also thousands of different species of marine life. Most of the planet Earth is made up of oceans, but we have barely explored any of it. Scientists and explorers discover new and exciting things about the ocean every day.

**DID YOU KNOW?**  
The bottom of the sea isn't flat. If **all the water disappeared** we'd see an amazing landscape of **deep valleys, canyons** and **mountains**, along with **huge plains!**  
Fact provided by National Geographic Kids

★ FINISH

# GET YOUR STUFF IN ORDER!

School work is way easier if you have everything you need right where you can get it.

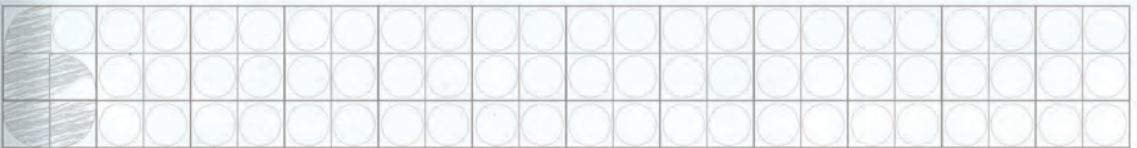

Building a desk organizer like this one is a great way to start and it's something you'll use every day. You can build and design one with the LEGO® bricks you have at home.

There are other things you can do, too, to help get your school year started right:

- Clean any clutter off your desk. Anything you don't need to do your work with should be put away someplace.
- Keep your stuff together – all your pencils and pens should go in one spot, notebooks and folders in another.
- Get a calendar so you can write down when your assignments are due, and other important dates to remember.

## EASY AS A, B, C ...

Build yourself a nameplate for your room using pieces from your LEGO® collection. Use this grid below to practice what your DOTS name would look like.

# BUILDING A BETTER SCHOOL

**Big machines get ready to do a big job as school construction project begins.**

Construction work has started on a new gymnasium for our school. When the work is finished, it will be even bigger and better than it is now, with plenty of room for all sorts of

school activities (as well as gym class!) The concrete mixer truck was here Monday morning, rotating its drum to combine water, sand, gravel and cement into concrete. This is an important substance used in construction to make building foundations, floors, walls and

more. We tried to get a list of the other vehicles that would be working on the gym project, but the words got as mixed up as... well, the cement.

## BUILDING LAUGHS

**What kind of bird works at a construction site?**

A crane

**What kind of building weighs the least?**

A lighthouse

**What do electricians grow in their gardens?**

Power plants

**Unscramble the letters to reveal the names of the construction vehicles:**

We gave you a few letters to get you started.

1. KAHBCEO
