Alex knows all about taking care of pigs and built this Pig House to help keep them safe from the Creepers™. There is even a garden full of tasty carrots and a fence to make sure the pigs don't run away!

A pig from a neighbouring flock has wandered into Alex's yard, looking for food. Can you find the mystery pig from these clues?

The pig:

- Is wearing a saddle
- Has spots
- Likes carrot tops
- Likes to eat alone
- Has long legs

Make Your Pigs Happy

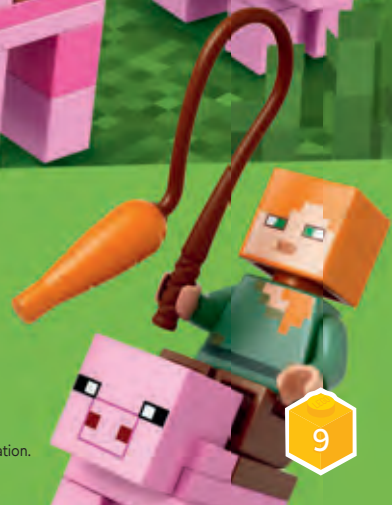

We built a giant carrot just to give our pigs a special gift. What would you build? A pig pen? Pig roller coaster? Pig spa? Build something awesome, take a photo, and share it in the #Minecraft™ group in the LEGO® Life app.

Getting Places on Your Pig

- You can ride a Minecraft pig if you have a saddle, a fishing rod and a carrot.
- Dangle the carrot in front of the pig to get it to go where you want.
- The ride will end when the pig finishes eating the carrot. So bring extra carrots!

ANIMALS AT WORK

Did you know that animals can have jobs, just like people do? Here are just a few of the ways they help out every day:

1 Service dogs are animals that assist people who are blind, deaf or face other physical challenges. Service dogs train for hundreds, sometimes thousands, of hours to gain the skills to do their jobs.

2 Search and rescue dogs look for people who are missing, relying on their amazing sense of smell.

3 Therapy dogs help people recovering from injury or who just need companionship.

TEN YEARS OF LEGO® NINJAGO!

The NINJAGO® saga is celebrating its 10th anniversary this year. Let's take a look back at some of the ninja team's greatest adventures. Nya becomes the Water Ninja.

2016

The ninja clash with the powerful Djinn Nadakhan and his crew of Sky Pirates. Jay uses a wish to undo all the events of this adventure, so that only he and Nya remember it ever happened.

Lloyd leads the team against Acronix and Krux, also known as the Hands of Time, and their Vermillion army, in an effort to rescue Master Wu and save the world.

Photo Tips!

Here are some tips on how you can take awesome photos of your models.

Check out the "Take Photos Like a Pro!" video on the LEGO Life app!

TIP 1: Composition

Objects in your picture can be in the foreground, middle ground or background. Where they stand determines what the viewer pays attention to first.

TIP 2: Lighting

You can use regular lamps or flash lights. Keeping lights further away from your camera will help the model look 3-dimensional in the picture.

TIP 3: Background

A good background tells the viewer where your picture takes place, and helps give it a story. Make your own backgrounds by drawing or painting on paper or cardboard or building something with LEGO bricks.

BUILD AND REBUILD WITH TRANSPARENT BRICKS!

Check out these amazing models and tips on using transparent bricks in your own LEGO® creations.

BUILD A DUCK

Here's a cute little duck you can build using pieces from your LEGO collection. **Don't worry about matching the colours. You can use any colours you like.**

Why do fish swim in schools?

Because we can't fly!

GOLDFISH

This goldfish takes her swimming seriously as she travels through the fish tank. She's in training for the Fish Olympics!

Building the goldfish out of transparent bricks helps it "glitter" in the light, just like a real fish, and stand out from your other models.

UNICORN

Unicorns are one of the most popular mythical animals. Did you know that, according to legend, unicorns can tell if someone is telling the truth? Well, this is an awesome model, and that's the truth!

Using a transparent brick for part of the unicorn's horn lends the model a little sparkle.

Why do ducks fly south for the winter?

Because it's too far to waddle.

WIZARD

We're not sure if this wizard can really cast spells, but the model is pretty magical. Still, if your bricks start mysteriously disappearing, you know who to talk to.

The transparent pieces in the Wizard model could be valuable gems, enchanted crystals or whatever you choose.

DUCK

There's an old legend that a duck's quack doesn't echo. They say that's not true, but we don't know for sure. We haven't been able to get this duck to quack to test it out.

Transparent feet let this duck see where it's walking. They also give the illusion of the duck being in the crystal clear water.

What's big, and furry and makes a whole lot of noise?

A lion with a drum set!

LEGO CLASSIC

Instructions PLUS

LION

He's the "King of the Jungle", but lions don't actually live in jungles. They live on savannahs, grasslands and in open woodlands, except for this one ... he lives on your desk.

The lion's transparent mane looks awesome when you shine a torch light through it, as if he is standing in the setting sun.

Make Your Own Patterns

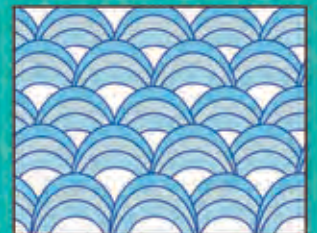

A pattern is a design in which lines, shapes, forms or colours are repeated. You see them everywhere, from cups to pillowcases to bedsheets, and more. Create your own pattern using plain paper or graph paper and coloured pencils. Here are some examples to help you get started.

Patterns can start from small, simple line designs. You can use straight lines, curved lines or angled lines.

Feel free to mix up different designs until you get one you really like.

Trace your design onto plain paper or graph paper multiple times until you have filled up the page. Colour in your pattern.
