

# Ninja Chopstick Skills

How to set up & play

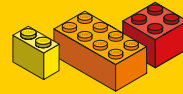

## How it works

Every child gets a paper plate containing LEGO® bricks. They need to use chopsticks to move the bricks onto another paper plate.

The winner is the ninja who moves the bricks the quickest. The older the children the smaller the bricks can be to make it more difficult.

## Things you need:

LEGO bricks

Optional Prize for the winner

Two paper plates per child  
Split into teams if that works out better

Chopsticks

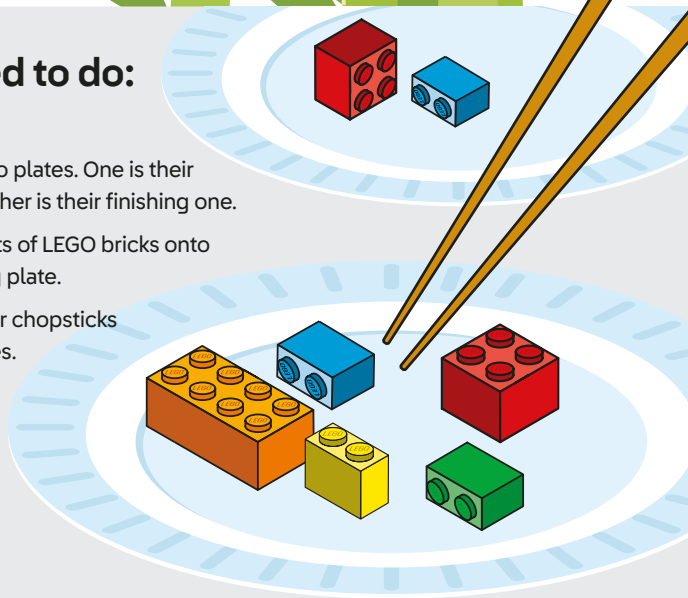

Timer/stopwatch

## What you need to do:

### On the day

1. Hand each child two plates. One is their starting plate the other is their finishing one.
2. Place equal amounts of LEGO bricks onto each child's starting plate.
3. Give each child their chopsticks and explain the rules.

## NINJAGO® facts:

Kai was trapped in the Netherspace and in his place Nokt was released.

Jay lost his memories in The Merge and began working at The Administration.

**1-3 mins**  
per round.

Anyone can move a LEGO brick. But it takes special ninja skills to move bricks with chopsticks!
