SPIN THE COLOUR WHEEL!

One way to keep colours organised and show how they are related to each other is with a colour wheel. Here are some fun facts you might not know about colour!

Three colours on the wheel are called **primary colours**. All of the other colours on the wheel can be made from these three. They are **red**, **blue** and **yellow**. Any colour made by mixing two or more of red, blue and yellow is called a secondary colour.

Did you know different colours can actually affect your mood and even your health? They can! Here are just some of the ways colours can make you feel:

Red

The colour of danger and anger, red can make your heart beat faster and raise your blood pressure.

Orange

This colour can make you hungry, so you will eat more oranges!

Yellow

Pleasant and cheerful, yellow can put you in a better mood. But babies cry more in yellow rooms, so I guess they want to redecorate!

Green

Green is said to be good for the eyes, so you will see that cabbage coming before it hits you!

Blue

Blue calms you down too. It is also supposed to make you less hungry, which might be why there aren't a lot of blue foods!

Purple

Purple can help you think deep happy thoughts, as well as inspire creativity.

COLOUR ME IN!

CALLING ALL CAR FANS!

Try building your own garage for your LEGO vehicle collection!

DON'T BLAME THE TOOLS!

The LEGO® garage crew has been working so hard and so fast that they have lost some of their tools! **Can you find the missing items hidden in this picture?** Here's what you need to look for:
