TRÉSORS TROPICAUX PAISIBLES

Cultiver un paysage aquatique riche en flore marine et en faune est une source de joie infinie ! Vous pouvez passer des heures à créer et organiser un monde aquatique miniature où la vie peut ralentir un peu. Un aquarium tropical peut transformer un petit coin de votre espace de vie en une pièce d'exposition méditative unique. Quelles que soient vos recherches, vos préparatifs et le soin que vous apportez à votre aquarium, il ne cesse jamais de vous inspirer. Prêt(e) à plonger et à en savoir plus ? Découvrons ce paradis sous-marin LEGO® qui vous permet d'explorer la beauté, la sérénité – et des surprises – dans un environnement créatif !

CRÉATURES LEGO® INSOUCIANTES

Bienvenue dans l'univers des poissons tropicaux LEGO®. Des personnalités hautes en couleur aux mouvements ondulants, vous découvrirez un aquarium rempli de créatures créatives, chacune avec son propre charme. Vous en avez peut-être déjà vu certaines lors d'une séance de plongée avec tuba, mais nous n'avons évidemment pas pu résister à l'idée d'ajouter une touche d'imagination !

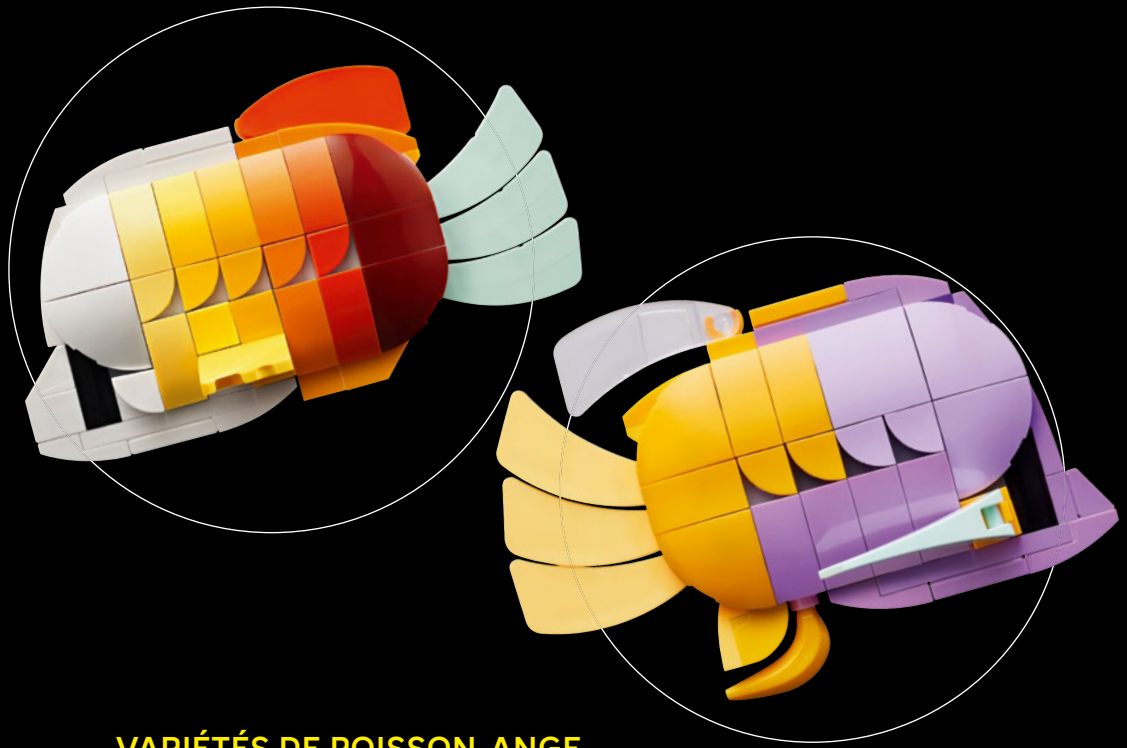

CRABE

Les crabes existent depuis le Jurassique. Les plus petites espèces connues mesurent moins d'un centimètre de long, tandis que la plus grande, le crabe-araignée géant du Japon, peut mesurer jusqu'à 3,7 m d'une pince à l'autre !

POISSONS BRIQUES RAYÉS

Tout comme la sébaste, qui a développé un camouflage naturel pour imiter les rochers, le poisson brique rayé ressemble étrangement à des éléments LEGO ! Ce poisson incroyablement rare est né uniquement dans l'imagination des designers LEGO et se trouve désormais exclusivement dans votre Aquarium tropical LEGO Icons.

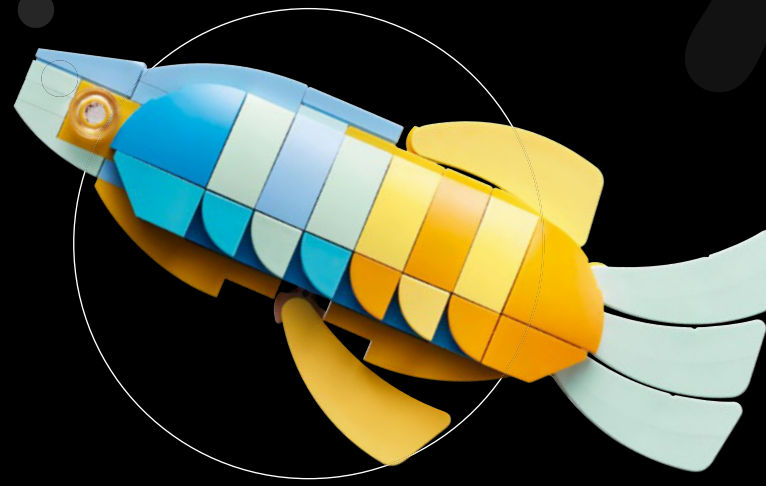

VARIÉTÉS DE POISSON-ANGE

Les Pomacanthidae, communément appelés poissons-anges, sont une famille de poissons marins qui comporte plus de 80 espèces. Ils sont fascinants. Souvent aperçus dans les écosystèmes de récifs coralliens, ils semblent presque éthérés lorsqu'ils tourbillonnent dans l'eau. Les couleurs et les tailles des poissons-anges sont très variées. Les jeunes poissons-anges peuvent également être très différents des adultes, car leurs rayures et leurs marques changent au fur et à mesure qu'ils grandissent.

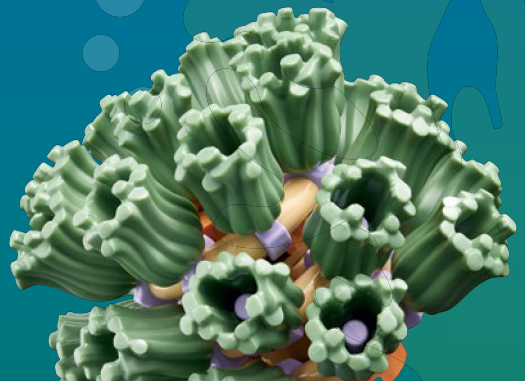

POISSON ARC-EN-CIEL

Nous nous sommes inspirés de la similitude des couleurs de l'arc-en-ciel aux couleurs LEGO. La plupart des poissons arc-en-ciel vivent en eau douce, certains vivent dans des eaux saumâtres et des estuaires, tandis que d'autres se sont adaptés aux aquariums d'eau salée. Celui-ci a évolué pour vivre en plein air !

DES CORAUX HYPNOTISANTS

Un récif corallien se compose d'une pléthore de créatures symbiotiques. Les coraux, qui ondulent doucement avec le courant, contribuent au cercle diversifié de la vie sous-marine. Certains présents dans votre aquarium s'inspirent de la vie réelle, d'autres n'existent que dans ce modèle LEGO®.

NOUVELLES ESPÈCES LEGO

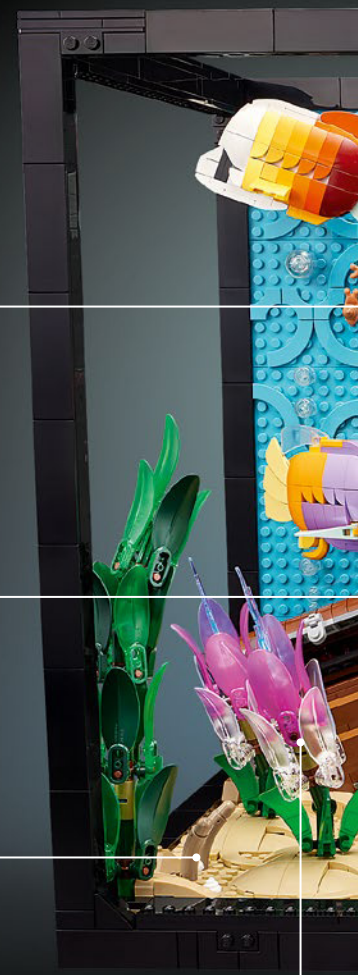

Les biologistes marins découvrent régulièrement de nouvelles espèces océaniques. Votre aquarium LEGO abrite de nouvelles variantes de coraux étonnantes à découvrir et à nommer !

CORAIL CERVEAU

Élément essentiel d'un récif en bonne santé, ce corail à croissance lente peut atteindre une hauteur de 150 à 170 cm. Certains spécimens vivent jusqu'à 900 ans !

ANGUILLE DES JARDINS

On les trouve communément dans des terriers sur le fond marin. En général, elles sortent uniquement pour attraper la nourriture qui dérive dans le courant.

ALGUES

Les algues peuvent ressemblent à des plantes terrestres, mais elles sont structurellement différentes. Les parties en forme de feuille sont des « lames », celles en forme de tige sont des « stipes » et les ancres en forme de racine sont des « crampons ».

ANÉMONE VIOLETTE TIRE-BOUCHON

Saviez-vous que les anémones tire-bouchon pouvaient piquer les intrus ou se recouvrir complètement de sable lorsqu'elles se sentent menacées ? (Celle-ci est en sécurité !)

ANÉMONE À BOUTS RENFLÉS

Ces organismes absorbent les nutriments en filtrant les particules avec leurs tentacules ou en consommant des débris produits par les poissons qui évoluent dans leur habitat.

ALGUE MARINE

« L'algue marine » désigne différents types d'algues océaniques. On estime qu'elles produisent environ la moitié de l'oxygène de la Terre grâce à la photosynthèse !

UNE TOUCHE CRÉATIVE

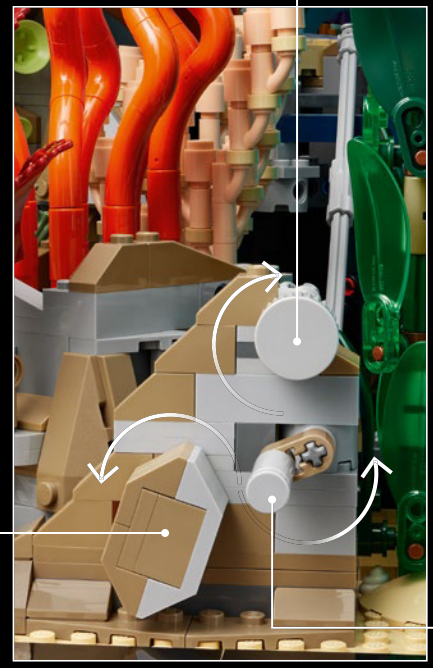

Les leviers cachés ajoutent des éléments de surprise supplémentaires. Grâce à l'utilisation créative d'articulations et d'essieux, ainsi que la magie de l'ingénierie, vous pouvez faire bouger les pièces comme de vraies créatures marines. À l'aide de plateaux tournants placés à des distances correspondant à des triplets pythagoriciens (on adore les mathématiques !), nous avons recréé des formes organiques, des mouvements et une esthétique naturelle.

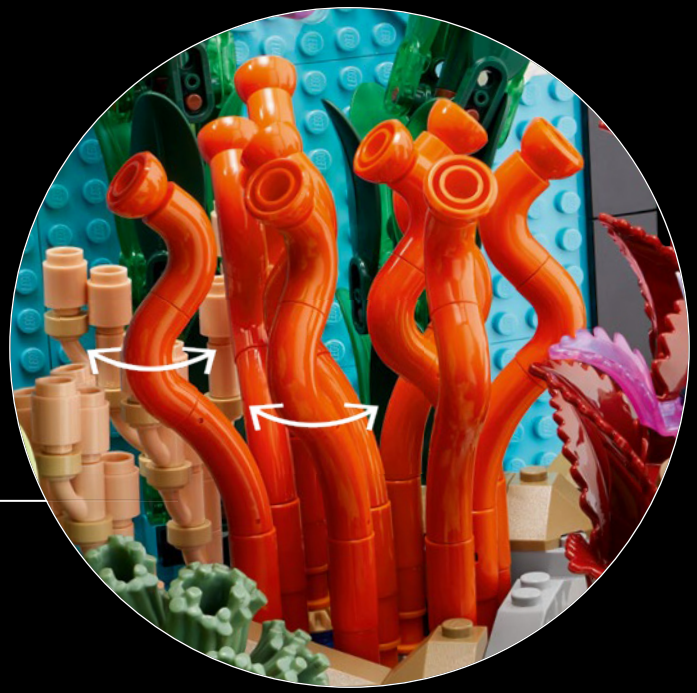

DÉPLACER LE CRABE

Tournez l'élément « pierre » et faites sortir le crabe de sa grotte.

FAIRE TOURNER LES CORAUX

Tournez le bouton gris pour faire tourbillonner les anémones de mer.

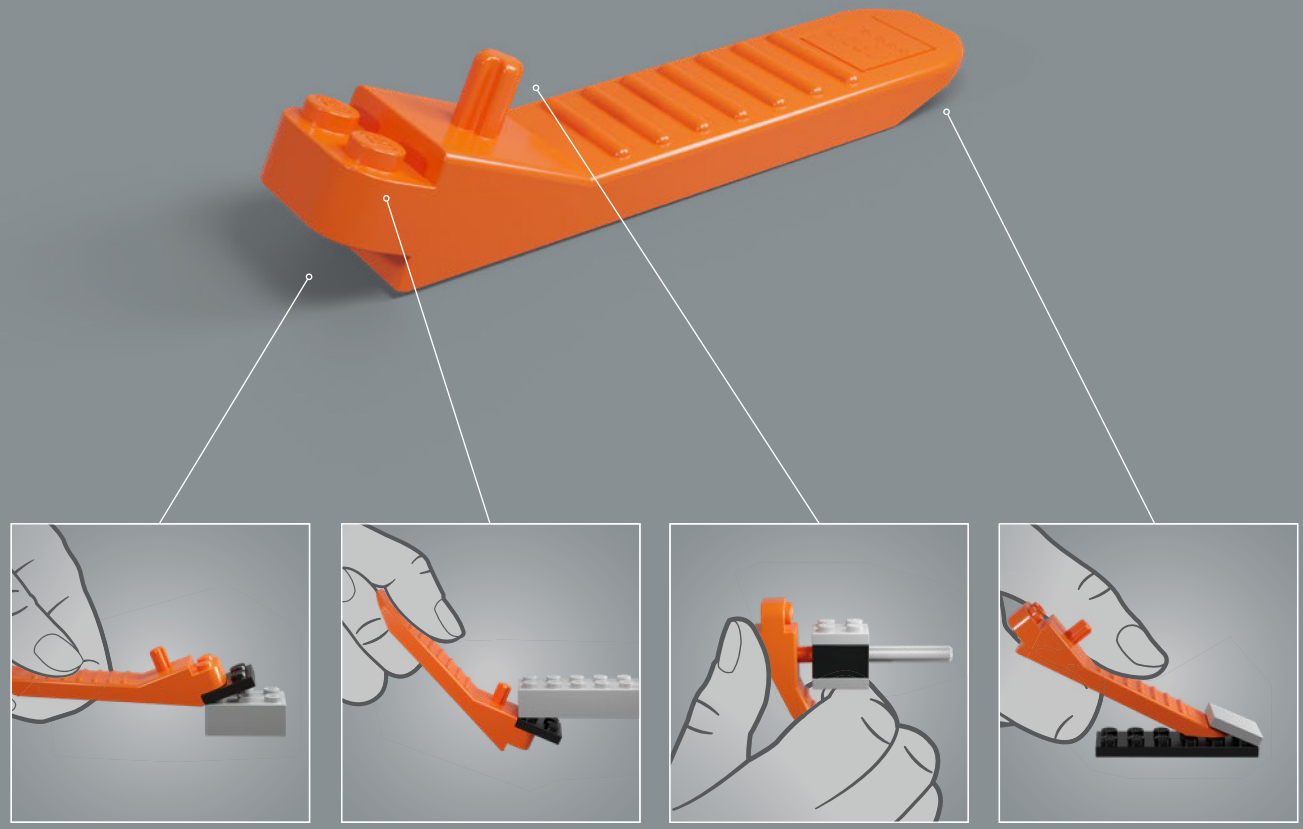

OUVRIR LE COFFRE AU TRÉSOR

Tournez la manivelle derrière le coffre au trésor pour ouvrir et fermer le couvercle.

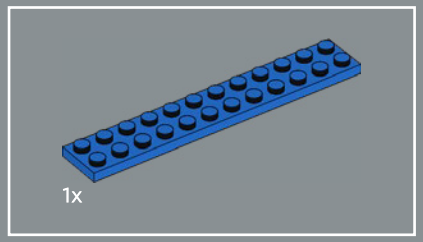

ANIMER LE POISSON

Tournez la manivelle sur le côté du modèle pour faire remuer et « nager » le rare poisson-brique à rayures.

LE GRAND MÉNAGE

Des éléments de serpillière et de balai LEGO® sont utilisés dans tout le set, comme dans ces structures de corail turquoise/bleu clair.

CHAPEAUX BAS

Cinq types de chapeaux et de casques LEGO sont utilisés pour recréer des coraux réalistes. Le corail cerveau utilise les chapeaux violets de minifigurines de chefs cuisiniers LEGO, et le corail vert clair est construit avec des casques coloniaux !

DÉCOUVRIR EN CONSTRUISANT

Ce qui rend un aquarium LEGO spécial, c'est que tout n'est pas forcément ce qu'il paraît être. Si vous y regardez de plus près, vous constaterez qu'en combinant les éléments LEGO différemment ou en utilisant d'autres couleurs, vous pouvez créer de nouvelles structures surprenantes qui ne ressemblent pas au modèle original ! Observez ces détails pendant la construction.

UNE ANCIENNE DÉFENSE

À l'origine, les tentacules des anémones ont été conçus comme des défenses d'éléphant LEGO !

DES CORAUX QUI FONCTIONNENT AVEC L'ÉNERGIE DES NINJAS ?

L'élément de corail jaune clair était, à l'origine, un élément de pouvoir magique dans les sets LEGO NINJAGO®.

UN COQUILLAGE SOUPLE ??

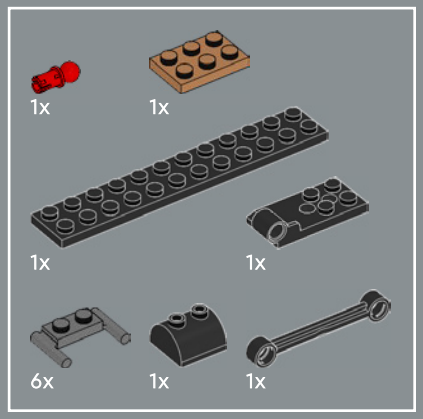

Les éléments utilisés pour les minuscules coquillages sont des dessus de cupcake LEGO.

LAISSEZ UNE LUMIÈRE ALLUMÉE

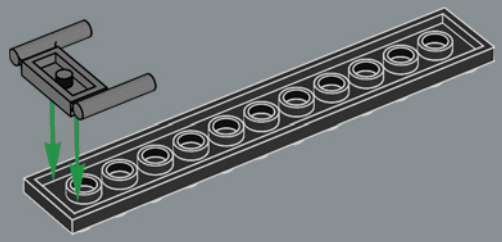

L'élément qui abrite l'anémone violette tire-bouchon a été conçu à l'origine comme une pièce de lampe de bureau !

LE MOT DE L'ÉQUIPE DE DESIGNERS LEGO® ICONS

Nous avons accordé à chaque centimètre de ce modèle toute l'attention qu'un véritable aquarium tropical mérite. Lors de la conception de l'aquarium, nous souhaitions réinventer des formes organiques et jouer avec des dégradés de couleurs dynamiques et des effets de transparence afin de créer un kaléidoscope de coraux éclatants, d'anémones ondoyantes et de poissons tropicaux plus vrais que nature. Pour une touche d'interaction supplémentaire, nous avons ajouté un peu de mouvement activé par des leviers camouflés dans tout le modèle. Pour les nageoires délicates des poissons, un tout nouvel élément nous a permis d'obtenir un rendu impeccable et léger – qui, en plus, fonctionne parfaitement comme algue marine ! Nous espérons que vous vous amuserez lors de la construction et pourrez profiter de la quiétude océanique chez vous.
