LEGO® Builder

# UNA EXISTENCIA SENCILLA Y SALVAJE

Si exploras la naturaleza con una mentalidad curiosa, es inevitable que acabes percibiendo una sensación de dualidad durante el cambio de estaciones. La vida en declive coexiste en perfecta armonía con la que renace. Este ecosistema construido con LEGO® captura un mágico fragmento de suelo de la linde de un bosque del norte de Europa cuando tiene lugar la transición del verano al otoño. Imagina una fructífera excursión de recolección que te permita explorar una amplia variedad de hongos y azafranes silvestres. Aunque una concentración tan densa de especies podría ser improbable en la naturaleza, queríamos dar forma a una escena visualmente cautivadora y, al menos en teoría, plausible. Cada elemento está diseñado con todo cuidado para equilibrar el realismo con un encanto caprichoso.

El equipo de diseño de LEGO® Botanicals

*Colchicum autumnale*

## AZAFRÁN SILVESTRE

A diferencia de su primo primaveral, este azafrán silvestre rosa y morado pertenece a la familia de las colquicáceas y florece en otoño. Elegante y grácil, aunque también tóxico, crece en praderas y bosques de Europa y Asia.

*Pteridium aquilinum*

## HELECHO COMÚN

Una de las especies vegetales más comunes del mundo, crece tanto al sol como a la sombra y tanto en praderas como en áreas concurridas. Con frondes que se extienden hasta 1 m, es una planta muy popular para decorar jardines.

*Mycena galericulata*

## MICENA EN FORMA DE SACO

Esta delicada seta acampanada se encuentra en zonas húmedas y bosques mixtos, donde forma pequeños grupos sobre troncos caídos y tocones. Conocida por su belleza encantadora, ha inspirado a artistas durante siglos.

*Pleurotus ostreatus*

## SETA DE OSTRA

Estas populares setas con sombrero semejante a una concha, láminas decurrentes y pie corto (o carentes de pie) crecen sobre la madera en descomposición en bosques o incluso en zonas urbanas. Acostumbran a ser blancas o grises y pueden alcanzar una anchura de hasta 25 cm.

*Cantharellus cibarius*

## REBOZUELO

Los rebozuelos exhiben unas trompetas doradas con pliegues gruesos y ramificados en lugar de láminas. Con justificada fama de esquivos, los recolectores los consideran un manjar exquisito y suelen proteger celosamente sus ubicaciones.

*Amanita muscaria*

## SETA MATAMOSCAS

Con su brillante sombrero bermellón salpicado de puntos blancos, la matamoscas aporta una vibrante pincelada de color a los inviernos europeos y se encuentra normalmente bajo abedules, pinos y píceas. Si la ves en la naturaleza, ¡manéjala con cuidado!

*Inocybe hirtella*

## SETAS DE SOMBRERO FIBROSO

A pesar de que su sombrero fibroso despiden un irresistible aroma parecido al de las almendras, ¡es mejor admirar esta seta desde una distancia segura! Podrás encontrarla en zonas cubiertas de hierba, donde proporciona azúcares y nutrientes a los árboles circundantes.

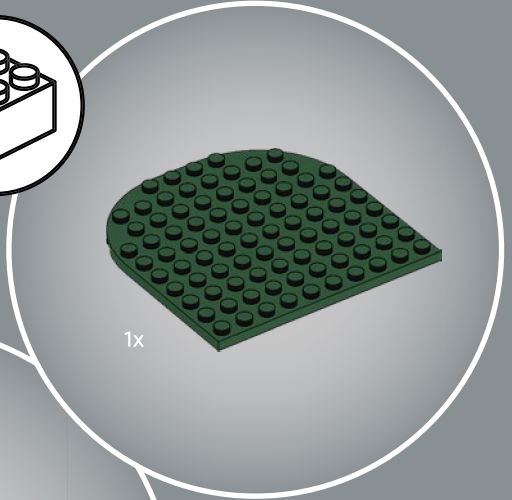

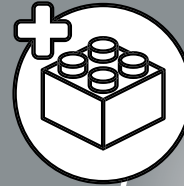

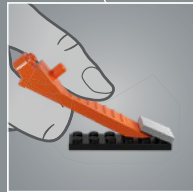

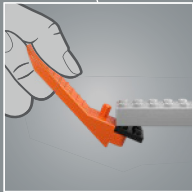

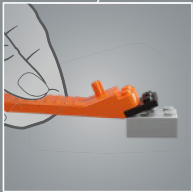

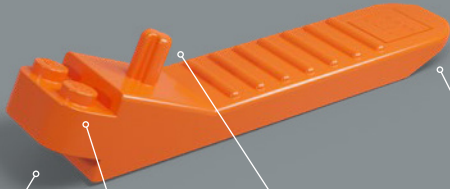

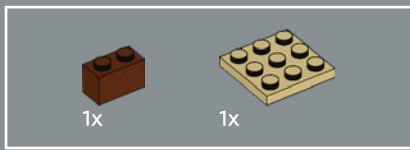

*Geastrum triplex*

## ESTRELLA DE TIERRA

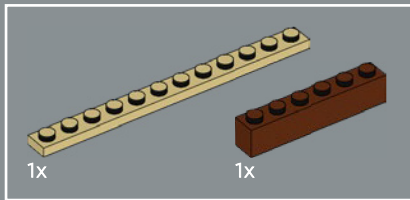

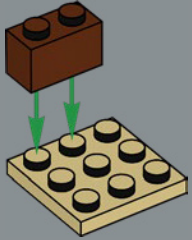

Busca esta espectacular seta en bosques y praderas. Desde un cuerpo redondo lleno de esporas, ¡extiende sus brazos formando una estrella para liberarlas en lo que podría considerarse un auténtico espectáculo de pirotecnia en miniatura!

Los elementos que representan garras pueden usarse para mucho más que animales y criaturas LEGO®. Aquí, forman las láminas bajo las grandes setas matamoscas.

A la hora de recrear figuras caprichosas, entran en juego todo tipo de elementos LEGO®. Para conseguir la forma característica de la estrella de tierra con collar, combinamos señales de tráfico triangulares con escudos de minifiguras.

La micena, con su delicado sombrero y su esbelto pie, parece sacada directamente de las páginas de un cuento de hadas. La parte superior de esta versión es, en realidad, un sombrero de minifiguras LEGO® de enanos.
