LEGO® Builder

ESISTENZA SEMPLICE E SELVAGGIA

Quando esploriamo la natura con una mentalità curiosa, inevitabilmente avvertiamo un senso di dualità nel cambio delle stagioni. La decomposizione coesiste in perfetta armonia con la nuova vita. Questo ecosistema LEGO® cattura una magica sezione di terreno boschivo ai margini di un bosco del Nord Europa, nel periodo di transizione tra l'estate e l'autunno. Immagina una fruttuosa escursione alla ricerca di cibo, durante la quale potrai esplorare una ricca varietà di funghi e colchidi autunnali. Sebbene una collezione di specie così densa possa sembrare improbabile in natura, volevamo creare una scena visivamente accattivante e teoricamente plausibile. Ogni elemento è progettato con cura per bilanciare il realismo con un fascino estroso.

Il LEGO® Botanicals Design Team

Colchicum autumnale

COLCHICO D'AUTUNNO

Questa pianta rosa e viola appartiene alla famiglia delle Colchicaceae e fiorisce in autunno. Elegante e aggraziata, ma tossica, prospera nelle praterie e nei boschi in Europa e Asia.

Pteridium aquilinum

FELCE

Una delle piante più comuni al mondo, prospera sotto il sole o all'ombra, nelle praterie o nelle aree più trafficate. Con fronde che raggiungono un'altezza di 1 m, è una pianta da giardino molto apprezzata e decorativa.

Mycena galericulata

BONNET COMUNE

Questo delicato fungo a grappolo con tipico cappello a campana è reperibile sui tronchi e sui ceppi caduti nelle zone umide e nei boschi misti. Noto per il suo aspetto meraviglioso e incantevole, ha ispirato artisti di tutte le epoche.

Pleurotus ostreatus

ORECCHIONE

Cerca questo fungo con cappello a forma di conchiglia con lamelle decorrenti e stelo corto o assente sul legno in decomposizione nelle foreste o persino nelle aree urbane. Tipicamente bianco o grigio, può crescere fino a 25 cm di larghezza.

Amanita muscaria

OVOLO MALEFICO

Con il suo cappello rosso-arancio lucido punteggiato di bianco, l'ovolo malefico aggiunge un tocco di colore vivace agli inverni europei, ed è spesso presente sotto betulle, pini e abeti rossi. Se avvistato in natura, maneggialo con cura!

Cantharellus cibarius

GALLINACCIO

I gallinacci presentano trombe dorate con creste smussate e biforcute al posto delle lamelle. Di non facile reperimento, i fungaioli spesso tendono a non rivelare i luoghi in cui abbondano in quanto li considerano una squisita prelibatezza.

INOCYBE HIRTELLA

Nonostante il suo cappello fibroso emani un bel profumo di mandorla, è meglio ammirare questo fungo da una distanza di sicurezza! Presente nelle zone erbose, fornisce zuccheri e sostanze nutritive agli alberi circostanti.

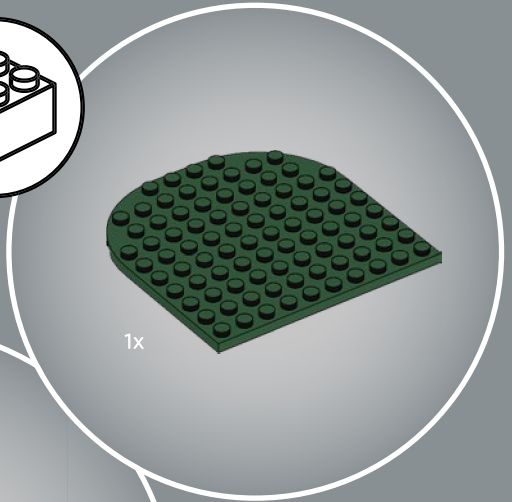

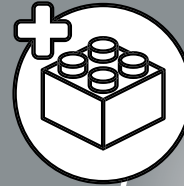

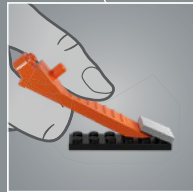

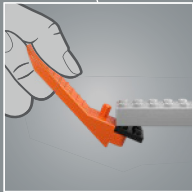

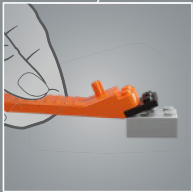

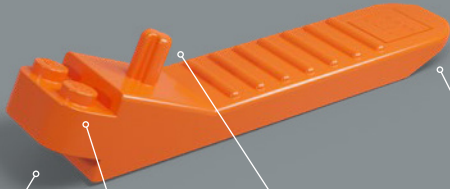

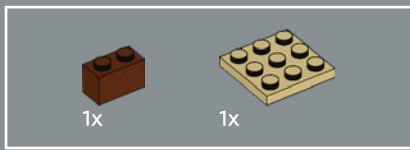

Geastrum triplex

STELLA DI TERRA A COLLARE

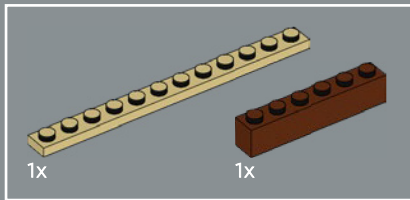

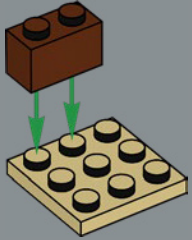

Cerca questo spettacolare fungo nei boschi e nelle praterie. Dal corpo rotondo e pieno di spore, apre le sue braccia a forma di stella per rilasciare le spore in un vero e proprio spettacolo pirotecnico in miniatura!

Gli elementi artiglio possono essere utilizzati per molto più che semplici animali e creature LEGO®. Qui sono utilizzati per le lamelle sotto i grandi cappelli degli ovoli malefici.

Quando si ricreano forme un po' insolite, ogni tipo di elemento LEGO® entra in gioco. Per la forma caratteristica della stella di terra a collare, abbiamo combinato cartelli stradali triangolari con elementi scudo per minifigure.
