Ramas de Magnolia

Desde que lanzamos el primer ramo LEGO® Botanicals, hemos tenido el deseo de crear un set en homenaje a la belleza de la magnolia. A lo largo de los años, hemos experimentado con distintas técnicas de construcción y una variedad de elementos para interpretar el aspecto tan característico de las especies bitono. Inspirados por los sutiles degradados de sus pétalos, nos propusimos desarrollar una nueva versión de uno de nuestros elementos que representan hojas. El equipo de moldeo de piezas introdujo un proceso único que logra fusionar de manera armoniosa los dos colores en una hoja, creando así una transición de color suave y uniforme.

“

Finalmente, pudimos dar vida a nuestro ramo hecho de ramas de magnolia. Conforme vayas construyendo, descubrirás las diferentes fases del crecimiento de las flores, desde los minúsculos brotes hasta las majestuosas corolas en su máximo esplendor. ¡Esperamos que disfrutes abriendo las puertas de tu hogar a la delicada belleza de este magnífico árbol!”

EL EQUIPO DE DISEÑO DE LEGO® BOTANICALS

Raíces milenarias

Los fósiles revelan que las magnolias se cuentan entre las plantas con flor más antiguas que existen: pueden rastrearse hasta hace 95 millones de años.

Una especie diversa

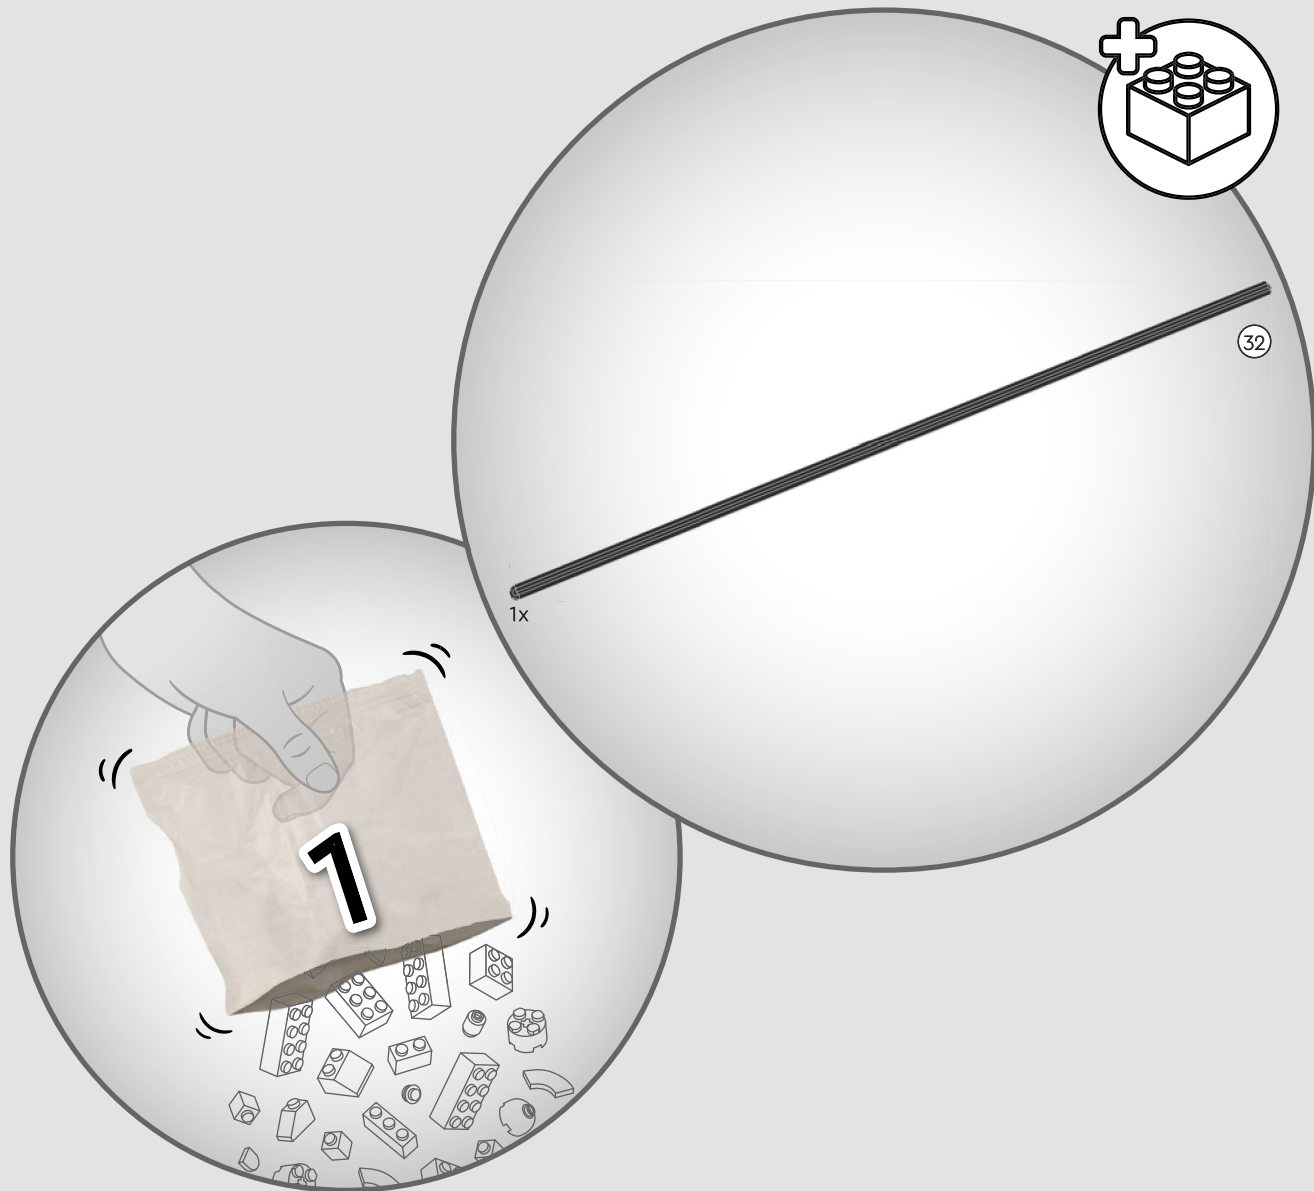

Entre árboles y arbustos, hay casi 250 especies de magnolias distribuidas por Asia, Norteamérica, Centroamérica y el Caribe.

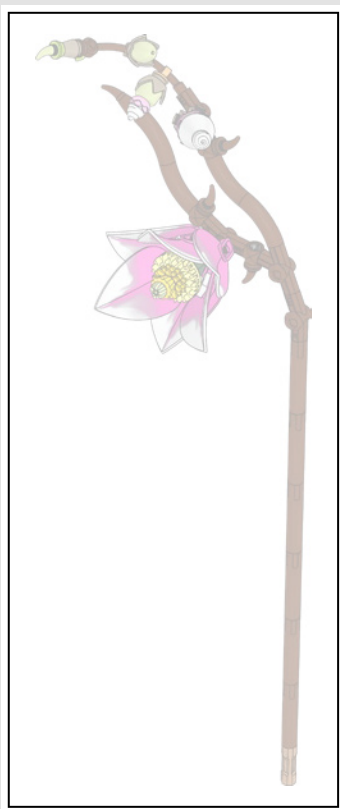

Patrones en espiral

Mientras que muchas otras flores tienen anillos de pétalos bien diferenciados, las magnolias presentan determinadas partes, como los estambres y los carpelos, organizadas en espiral.

Descubre cómo combinar estas flores
con otros sets LEGO® Botanicals.

¡Brrrum! Si eres aficionado a los vehículos, tal vez reconozcas este elemento: en realidad, se trata de un tapacubos que usamos en los coches LEGO®.
