Rami di magnolia

Da quando abbiamo lanciato il primo bouquet LEGO® Botanicals, abbiamo desiderato creare un set che celebrasse la bellezza dell'albero di magnolia. Nel corso degli anni, abbiamo sperimentato diverse tecniche di costruzione ed elementi per riprodurre l'aspetto distintivo delle specie di magnolia a due tonalità.

Alla fine, ispirati dalle delicate sfumature dei petali, abbiamo deciso di sviluppare una nuova versione di uno dei nostri elementi fogliari esistenti. Il nostro team di modellazione degli elementi ha utilizzato un procedimento innovativo che fonde armoniosamente due colori in un unico elemento foglia, generando una transizione graduale e uniforme della tonalità.

“

Siamo finalmente riusciti a dare vita al nostro bouquet di rami di magnolia. Durante la costruzione, potrete osservare le diverse fasi di crescita dei fiori, dai piccoli boccioli fino alla piena fioritura. Ci auguriamo che vi divertirete ad aggiungere la delicata bellezza di questo magnifico albero alla vostra casa!”

IL LEGO® BOTANICALS DESIGN TEAM

Radici antiche

I reperti fossili rinvenuti dimostrano che le magnolie sono tra le piante da fiore più antiche; le loro origini risalgono a ben 95 milioni di anni fa.

Una specie diversificata

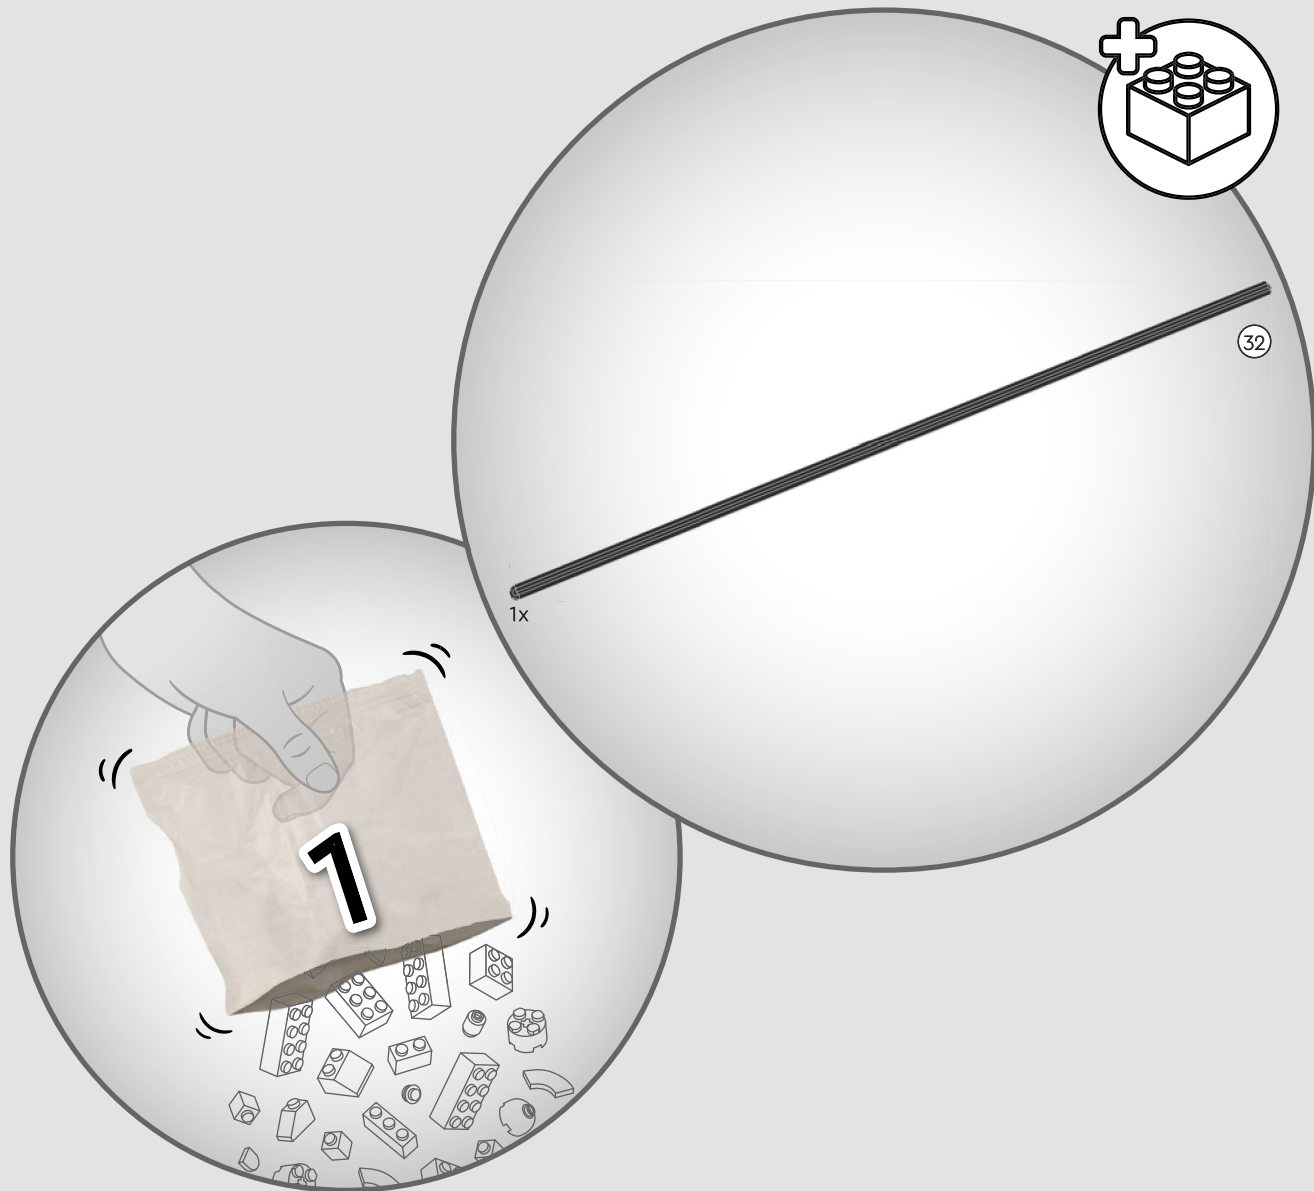

Sono presenti quasi 250 specie di alberi e arbusti di magnolia in Asia, America del Nord e America Centrale e nei Caraibi.

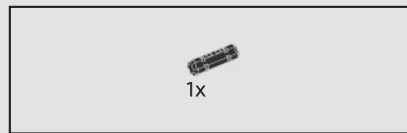

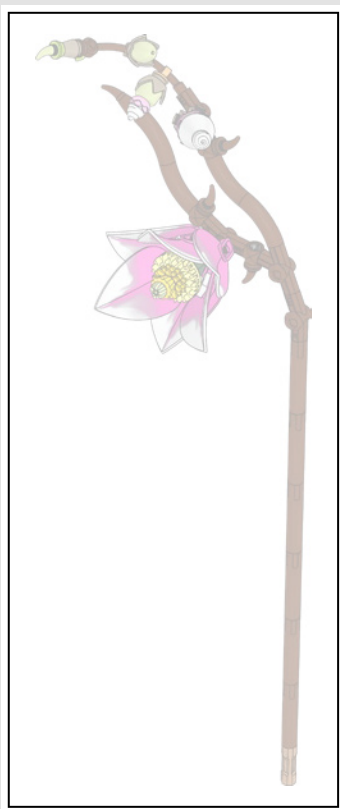

Modelli a spirale

I fiori di magnolia si distinguono dagli altri per la loro struttura unica: gli stami e i carpelli, invece di essere disposti in cerchi regolari, sono organizzati a spirale, creando un effetto naturale e affascinante.

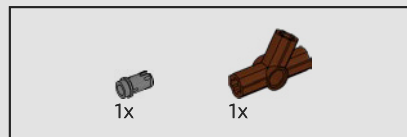

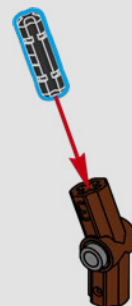

Scopri come combinare questi fiori con
altri set LEGO® Botanicals
