Rencontre avec le fan concepteur

Le fan concepteur Maximilian Lambrecht (pseudonyme LEGO® Ideas : HisBrickMaterials) est un artiste allemand spécialisé dans les effets visuels, et passionné de nature :

« J'essaie de passer mon temps libre loin des écrans : je joue du piano, je peins, je dessine ou je joue à des jeux de société. Mais la nature est ma source d'inspiration la plus surprenante, la plus spectaculaire et la plus essentielle ! J'aime tout particulièrement les loutres. Pour ce modèle, j'ai regardé des documentaires et je me suis rendu au zoo local, dessinant les grandes lignes et des esquisses pour la version LEGO. Je voulais capturer l'essence enjouée de la loutre et je me réjouissais de pouvoir échanger avec d'autres fans sur les astuces de construction – et faire des jeux de mots "loutrement" mauvais ! La loutre est représentée dans son habitat naturel, avec un sens imaginaire de la profondeur. J'ai ajouté au modèle des éléments rocheux, des accessoires de griffes, des tuiles modifiées, des pentes et divers éléments de végétation, et j'ai ajusté les couleurs des briques pour créer un aspect harmonieux. Pourtant, je n'aurais jamais pu rêver d'un tel résultat – c'est une expérience incroyable que je chérirai pendant looongtemps. »

LA PROPOSITION ORIGINALE DE MAXIMILIAN :

L'expression du visage et la pose adorable de la loutre la rendent très réaliste. Les détails et les couleurs astucieusement intégrés sous la surface transparente de la tuile ajoutent de la profondeur à son environnement.

Un mot de l'équipe de designers LEGO® Ideas

La loutre enjouée de Maximilian nous a tout de suite plu. En travaillant avec lui, nous avons décidé de la rendre plus réaliste tout en conservant son côté mignon, bien sûr. Nous avons donc inclus un bébé loutre endormi sur le ventre de sa mère. Les loutres sont assez grandes, mais la pose flottante était parfaite pour ce modèle, avec les pattes de la loutre recourbées vers le haut. Les couleurs des loutres varient en fonction de l'espèce, de la région et de l'âge. La fourrure mouillée du corps est souvent d'un brun très foncé et celle de la tête d'un brun un peu plus clair. Nous avons donc fait abstraction des couleurs pour améliorer l'expérience de la construction. Nous voulions qu'elle puisse bouger les bras, de façon à pouvoir presser ses mains contre son visage (une pose très courante chez les loutres) et les tendre vers l'avant pour poser une main sur son petit ou sur la palourde. Cela s'est avéré être un défi amusant. Le coude devait sembler « submergé » ou dans l'eau. Nous avons créé une découpe à la surface de l'eau qui correspondait parfaitement à la forme de l'avant-bras, et pour permettre une amplitude de mouvement complète, nous avons ajouté deux points d'articulation. Pour obtenir une gamme complète de mouvements, nous avons inclus deux points d'articulation sous la surface de l'eau.

BRAS EN MOUVEMENT

Oh, être un bébé loutre ! Si celui-ci part jouer un peu plus loin, vous pouvez déplacer doucement les bras de maman et y déposer son repas préféré.

JAMBES RECOURBÉES

Les pattes et les orteils peuvent être articulés pour imiter les différentes poses enjouées de la loutre.

PROFONDEUR DES DÉTAILS

Nous avons ajouté de la profondeur aux parties aquatiques, avec des éléments bleus et verts superposés et une couche de contour sous la couche d'eau, afin de créer l'illusion de la taille réelle de la loutre.

Le vieil homme de la mer

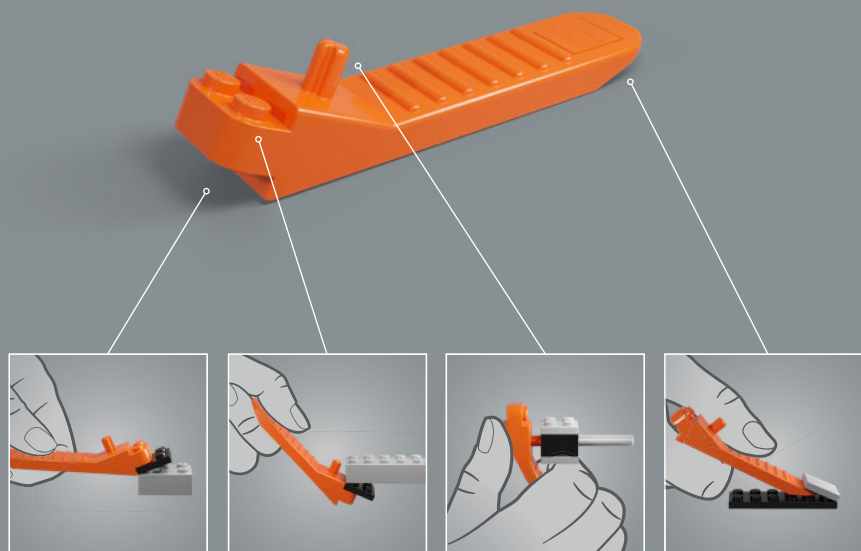

Avec leurs grands yeux sombres et leur allure de peluche, les loutres donnent l'impression de pouvoir être prises dans les bras et embrassées ! Si l'on ajoute à cela leur comportement intelligent, le facteur « mignonnerie » atteint des sommets. Elles flottent sur le dos, font la sieste dans les varechs et se tiennent même la main pour ne pas s'éloigner l'une de l'autre (oooh !). À l'aide de pierres (certaines cachent même leur pierre préférée dans une petite poche pratique), elles ouvrent des palourdes, des moules ou des crabes. En grignotant sur leur ventre, elles ont l'air de vivre leur meilleure vie, comme des vacances permanentes au bord de la piscine. Étant donné qu'elles n'ont pas de graisse pour rester au chaud, les loutres comptent sur leur fourrure incroyablement dense : jusqu'à un million de poils par pouce carré. Avec toute cette fourrure, rester propre et bien soignée est un travail à plein temps. Elles sont très sociables, élèvent leurs petits dans l'eau et les serrent contre elles tout en leur apprenant à nager, à jouer et à s'épanouir. Si vous avez la chance d'en apercevoir une dans la nature, n'oubliez pas que le « vieil homme de la mer » tient à son espace personnel, alors admirez la loutre à bonne distance.

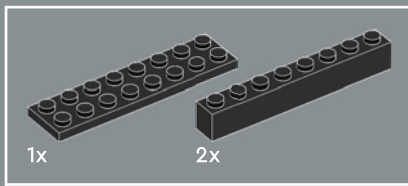

Le long des eaux côtières peu profondes de l'Alaska et du Pacifique Nord, les loutres se trouvent généralement sur les côtes rocheuses, les récifs-barrières, les forêts de varech et les estrans.

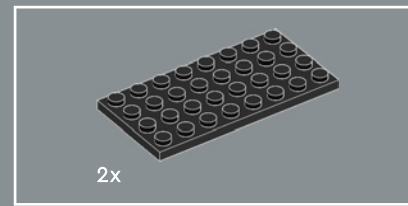

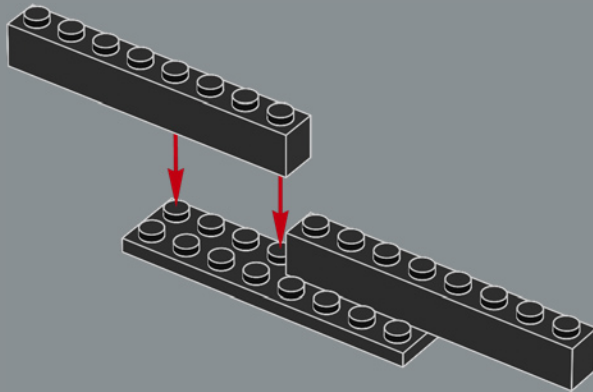

Elles prennent grand soin de leurs « outils » (les pierres) et de leurs congénères. Nous espérons que vous aimerez prendre soin de celle-ci !

40

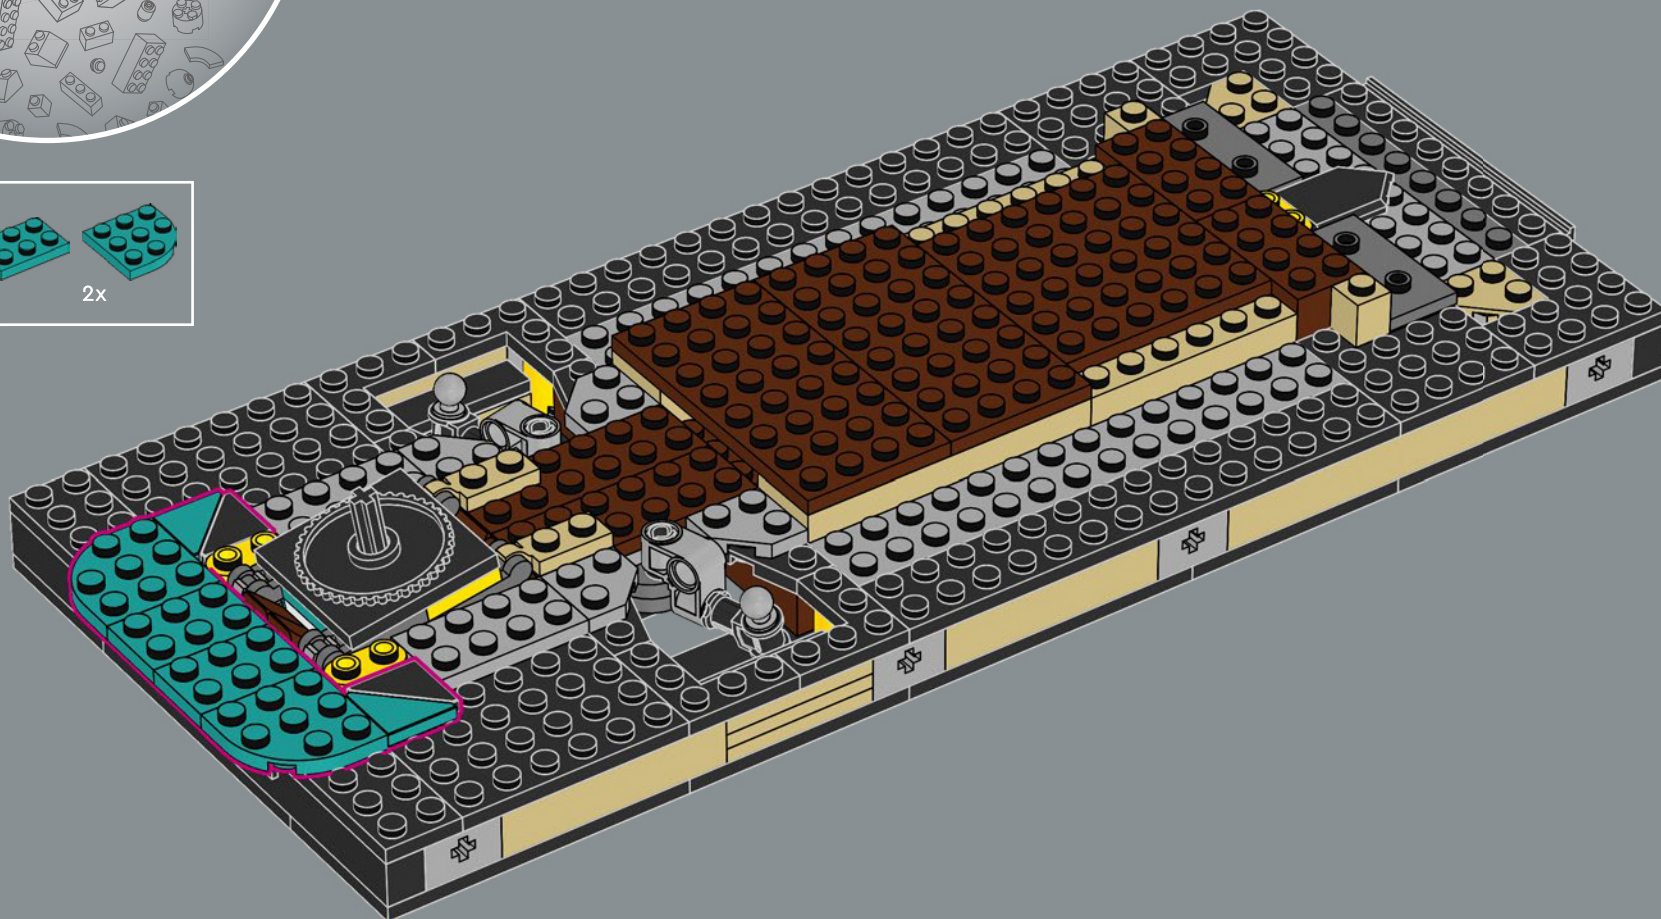

This diagram illustrates step 40 of a LEGO Technic assembly. The main view shows a rectangular base plate with a grey and black grid of holes. A large brown Technic plate is positioned in the center. On the left side, a motor assembly is shown, consisting of a grey motor housing, a yellow gear, and a red curved arrow indicating rotation. A white arrow points to the motor assembly. A circular inset on the right provides a close-up view of the motor assembly, showing the yellow gear and the red curved arrow indicating rotation. The inset also shows a yellow Technic pin and a grey Technic pin.
