*Le fan concepteur  
LEGO® Ideas Alexis  
Dos Santos avec son  
modèle original*

# RENCONTRE AVEC LE FAN CONCEPTEUR

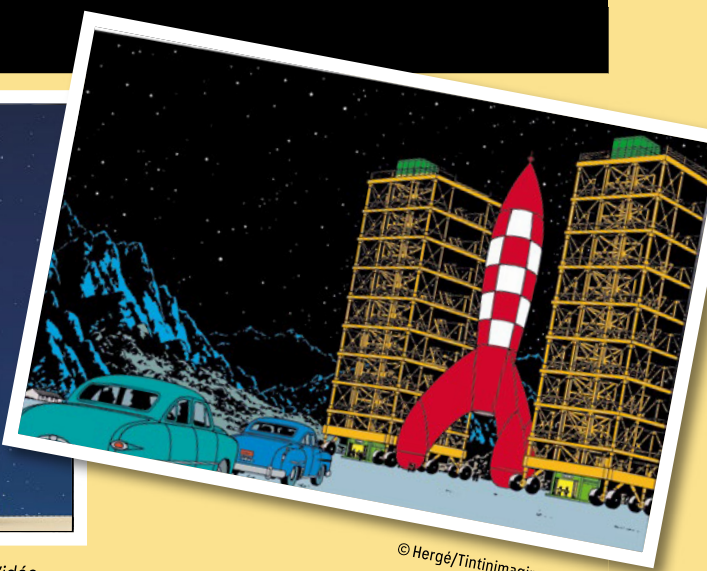

Comment Alexis Dos Santos (nom LEGO® Ideas : Tkel86) du Portugal trouve-t-il assez d'heures dans la journée pour son travail de programmeur et de créateur de sites Web ? C'est un mystère pour nous. Avec un vaste portefeuille de MOC (Mes propres créations) complexes, ce fan concepteur ne chôme pas !

« Pendant mon temps libre, j'aime faire tout ce qui mêle créativité et ingéniosité : construction de LEGO, projets électroniques, travail du bois, dessin, conception graphique, modèles 3D et sculpture. J'adore réutiliser des matières premières à des fins nouvelles, comme démonter un set LEGO pour en créer un autre. Depuis toujours, je me souviens d'avoir joué avec des briques LEGO. Quand j'étais enfant, j'ai hérité d'une boîte pleine de pièces d'un cousin, et à partir de là, j'ai agrandi ma collection jusqu'à l'adolescence. J'ai connu ce qu'on appelle une « période sombre », loin des briques, de 16 à 26 ans. Puis j'ai redécouvert ma passion en visitant par hasard une exposition de fans de LEGO créée par une communauté. J'ai fini par les rejoindre et ce loisir s'est développé de manière exponentielle. Ce projet a duré environ six mois. J'ai toujours admiré Tintin, et un collègue de

travail m'a incité à recréer ce modèle en briques LEGO. J'ai utilisé des pièces Technic pour obtenir les raccords des pieds d'atterrissage et du cône supérieur. Ce que j'aime particulièrement à propos de ce modèle, c'est qu'il utilise des éléments ronds et coniques fabriqués à partir de pièces multiples, car c'est toujours un défi de pouvoir réduire les écarts visibles avec des raccords relativement complexes. Certains de ces éléments en rouge étaient difficiles à trouver ! Après l'avoir partagé sur le site Web de LEGO Ideas, mon plan était de continuer à le perfectionner, mais petit à petit, alors que j'étais occupé à travailler sur d'autres projets, il a atteint 10 000 fans. J'aime quand les modèles combinent mouvements mécanisés et belle esthétique. J'espère que les fans adoreront le côté époustouflant du modèle final. »

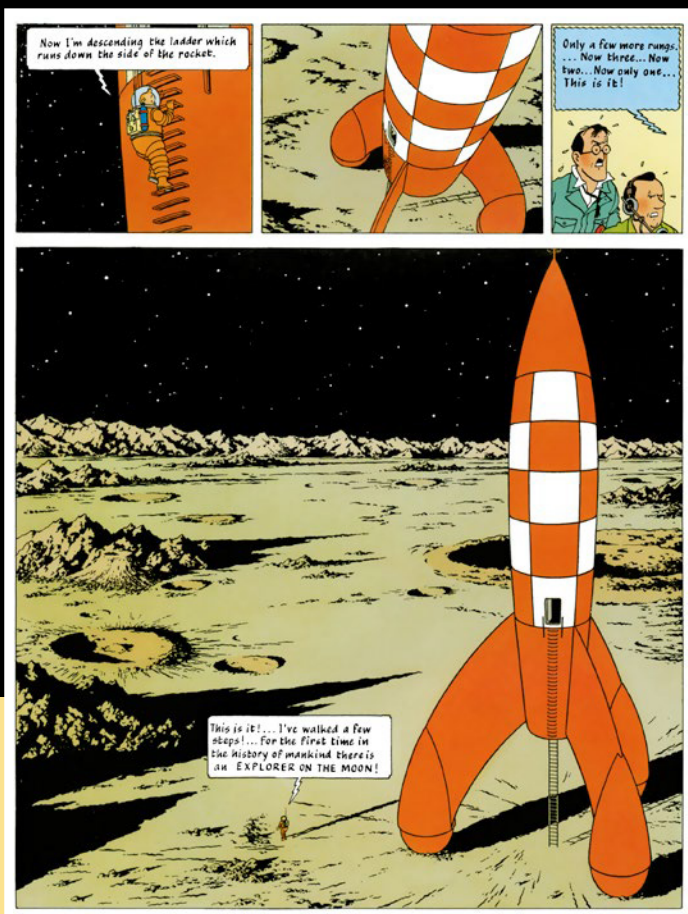

Le modèle d'Alexis, et l'image du livre qui lui a donné l'idée

# ON A MARCHÉ SUR LA LUNE !

La fusée à damier rouge et blanc d'*Objectif Lune* (1953) et d'*On a marché sur la Lune* (1954) reste l'un des symboles les plus reconnaissables des *Aventures de Tintin*. Tintin, le Capitaine Haddock, Milou et le Professeur Tournesol entreprennent un voyage audacieux pour explorer le côté obscur de la Lune, en lançant une fusée révolutionnaire depuis la Syldavie, un pays fictif. Lors de sa première publication, cette aventure a transporté les lecteurs dans un avenir où le voyage spatial humain semblait à portée de main, à une époque où un véritable alunissage n'était encore qu'un rêve. La fusée est rapidement devenue une image emblématique du progrès technologique et de l'innovation, tandis que Tintin et ses amis ont captivé l'imagination de millions de personnes avec un mélange d'aventure, de suspense et de sciences modernes.

© Hergé/Tintinimaginatio 2026

# LES SCIENCES ET LA TECHNOLOGIE AU SERVICE DE L'ART

L'histoire mêle harmonieusement les plaisanteries, l'esprit et l'humour familiers des personnages à un récit d'espionnage et de découverte scientifique plein de suspense. La conception de la fusée, le Centre de recherches atomiques de Sprodj et les détails techniques du voyage étant tous basés sur des recherches réelles disponibles à l'époque, l'histoire est à la fois nouvelle et convaincante. Les scènes richement détaillées ont permis de faire connaître les sciences avancées à un public plus large. L'héritage de Tintin est aujourd'hui préservé dans des lieux tels que le Musée Hergé, et l'esprit pionnier de sa fusée continue d'inspirer les rêveurs et les explorateurs.

© Hergé/Tintinimaginatio 2026

De nombreux détails étaient basés sur des sciences réelles.

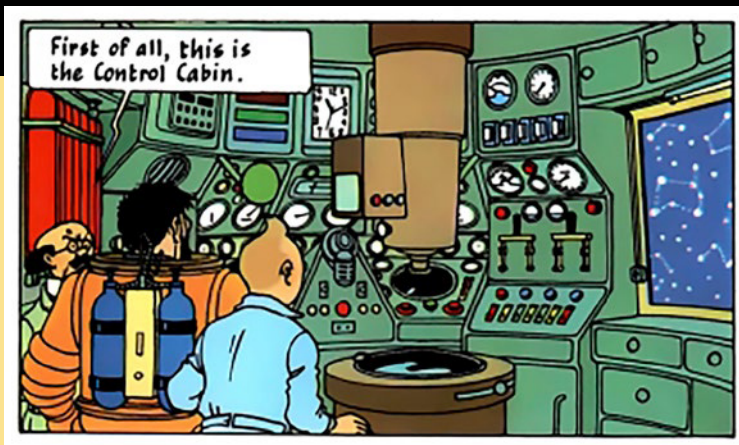

© Danny Gys - Atelier Christian de Portzamparc Hergé-Tintinimaginatio 2026

Hergé a compilé de nombreux documents et matériaux de recherche. Certaines ont une origine incertaine, comme ces photos en noir et blanc, qui sont classées dans une catégorie distincte « Documentation Hergé ».

# LE MOT DE L'ÉQUIPE LEGO® IDEAS

Le modèle du fan était vraiment bien fait... et surtout énorme ! Nous avons convenu de supprimer la tour et se concentrer sur la fusée en elle-même, pour faire passer le modèle d'Alexis de la Terre à l'espace. Nous avons inclus les personnages dans leurs combinaisons spatiales emblématiques, y compris, bien sûr, une figurine LEGO® de Milou ! Hergé était célèbre pour son souci du détail et de l'exactitude, et nous voulions rendre justice à son travail. La fusée est une forme à 6 côtés, avec une courbe subtile de haut en bas. Nous avons exploré un nombre incalculable de techniques de construction et d'angles différents pour obtenir cette forme. Les carrés du motif en damier sur la surface de la fusée sont

trapézoïdaux. Afin de rester fidèle au dessin d'origine, la surface lisse et le motif authentique ont constitué un défi passionnant. Les empennages constituaient une autre partie technique du modèle. La solution a consisté à utiliser un triangle réfléchi pour chacun des empennages afin de créer l'angle correct et de les amarrer pour ajouter de la puissance au modèle. Pour le cône supérieur de la fusée, nous avons créé un nouvel élément de cône similaire aux pieds de la fusée, pour des raisons de cohérence.

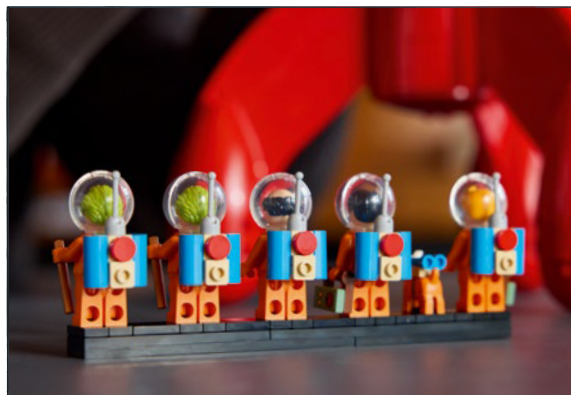

© Hergé/Tintinmaginaireto 2026

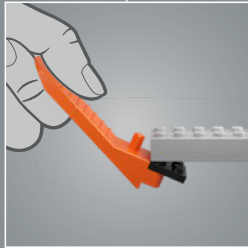

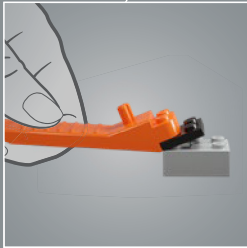

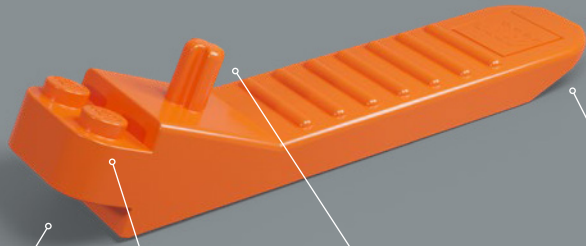

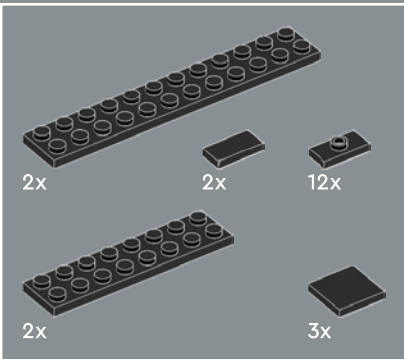

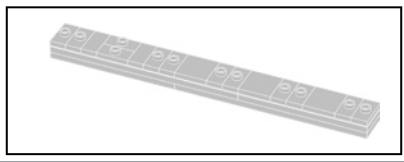

Nous avons inclus une salle de contrôle au sommet de la fusée pour montrer une scène emblématique après le décollage, lorsque les personnages voient la Terre depuis l'espace pour la première fois. Nous l'avons rendu aussi précise que possible, avec des décorations, des détails et des autocollants, et nous avons même réussi à ajouter la trappe de la porte dans le niveau suivant de la fusée.

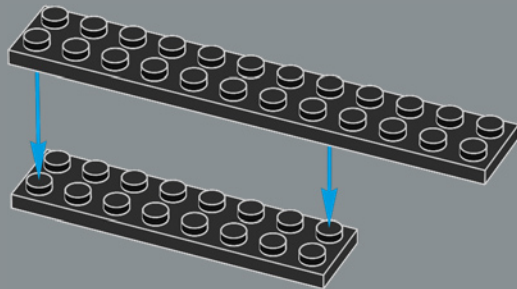

Le fait de « traduire » les personnages en minifigurines a été un processus très amusant. Ils ont une personnalité bien marquée et une longue histoire comique dans les bandes dessinées. Nous avons donc réduit notre choix à des expressions qui reflètent ce scénario. Les combinaisons spatiales sont inspirées du livre *On a marché sur la Lune*, et Dupond et Dupont ont les cheveux verts, un clin d'œil à une scène hilarante de la bande dessinée !
