VI PRESENTIAMO L'ANE MÆRSK

L'ANE MÆRSK è una nave davvero unica nel suo genere: la prima grande nave portacontainer alimentata a carburante a basse emissioni come bio-metanolo ed e-metanolo. Da quando l'ANE MÆRSK ha solcato le onde per la prima volta nel gennaio 2024, numerose navi dual-fuel hanno preso il largo, segnando un capitolo nuovo e cruciale nella decarbonizzazione dei trasporti marittimi e del commercio globale.

L'ANE MÆRSK è lunga 350 metri e larga 53,5 metri. Senza carico, il natante pesa 47.700 tonnellate, e ha una capacità di carico complessiva di 190.000 tonnellate, l'equivalente di 29.000 elefanti africani, più che sufficiente per trasportare merci, carburante ed equipaggio.

La nave può trasportare 16.592 TEU (equivalente a 6 m), e se li disponessimo in fila, si estenderebbero per 100,5 km, ovvero la lunghezza di 959 campi da calcio.

 MAERSK

ALL THE 10 ZERO WAY

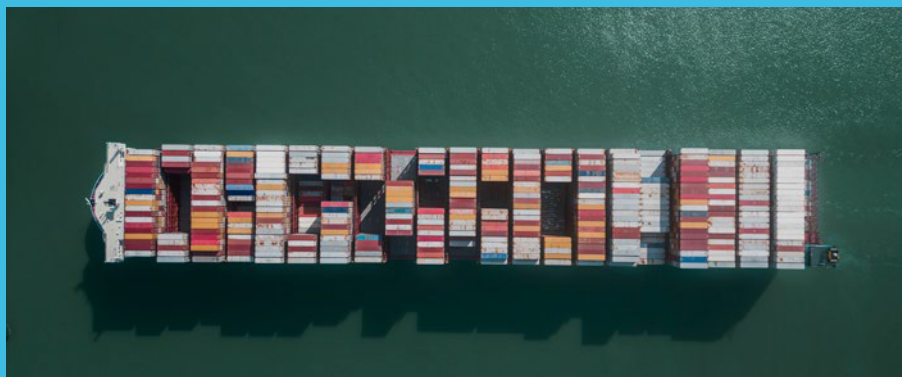

NAVIGARE IL CAMBIAMENTO – LA STORIA DELLE SPEDIZIONI MARITTIME

Da migliaia di anni, gli esseri umani trasportano merci per mare, ma fino alla Rivoluzione Industriale e all'invenzione del motore a vapore, eravamo completamente alla mercé delle condizioni meteorologiche. Niente vento, niente traversata. Con l'avvento del motore a vapore, per la prima volta nella storia dell'umanità, l'equipaggio di una nave non dipendeva più dalle condizioni meteo o dalla propulsione manuale. L'invenzione ha completamente rivoluzionato il trasporto marittimo, rendendo possibili nuove rotte e dando al commercio marittimo una grande spinta.

Sebbene i motori a vapore rappresentassero un notevole progresso rispetto alle vele, erano ancora poco efficienti, e non sarebbe passato molto tempo prima che la navigazione venisse rivoluzionata dall'invenzione del motore diesel. Tuttavia, le rivoluzioni nel settore marittimo richiedono tempo, e sarebbero trascorsi diversi decenni prima che il diesel sostituisse completamente la propulsione a vapore. Maersk acquistò la sua prima nave diesel, la LEISE MÆRSK, nel 1921, appena nove anni dopo il lancio della prima nave mercantile oceanica diesel.

Nel 1956, l'industria subì un'altra rivoluzione con l'introduzione della "movimentazione dei container", un sistema che permetteva di caricare direttamente i rimorchi dei camion sulle navi, aumentando significativamente l'efficienza delle operazioni di trasporto marittimo. L'introduzione del container ridusse il tempo necessario per caricare e scaricare le navi da diversi giorni a poche ore.

Grazie al container e al codice a barre – l'eroe "invisibile" del commercio mondiale – un produttore in una qualsiasi parte del mondo può vendere i propri prodotti su tutti i mercati, rendendo la globalizzazione fisicamente attuabile. Il mondo che conosciamo oggi dipende profondamente dalle catene di approvvigionamento globali. Dal produttore di banane in Colombia, fino al bambino danese che consuma una banana per il suo pranzo, le supply chain mantengono il mondo connesso e garantiscono il flusso di cibi, medicine, merci e materiali per le persone di tutto il mondo.

 MAER

 MAERS

 MAERSK

 MAERSK

IL SIGNIFICATO DI UN NOME

Dal 1906, tutte le navi della flotta Maersk includono "MÆRSK" nel loro nome. La maggior parte delle prime imbarcazioni portava nomi legati alla famiglia fondatrice ma, man mano che la flotta cresceva, i nomi disponibili si esaurirono e la tradizione di denominare le navi in questo modo fu interrotta. Oggi, le navi Maersk portano anche i nomi di città e fiumi.

Quando Maersk si trovò a denominare la nuova serie di navi dual-fuel, ritornò alla tradizione familiare di assegnare i nomi dei membri della famiglia fondatrice, scegliendo questa volta nomi che iniziavano con la lettera A, per simboleggiare l'inizio di una nuova era.

ANE MÆRSK prende il nome da Ane Mærsk Mc-Kinney Uggla, presidente di A.P. Moller Holding, la società madre di A.P. Moller - Maersk. A.P. Moller - Maersk fu fondata nel 1904 da Arnold Peter Møller. Ane è la nipote del fondatore del Gruppo, Arnold Peter Møller, e sua moglie, Chastine Mc-Kinney Møller.

ANE MAERSK

LA WHITE STAR – UN FARO DI SPERANZA

L'iconica stella bianca a sette punte fa parte del retaggio di Maersk da prima della fondazione dell'azienda nel 1904 ed è un simbolo duraturo dei forti legami familiari che ancora supportano la società, oltre 100 anni dopo.

Agli inizi della sua carriera, il Capitano Peter Mærsk Møller, padre di A.P. Møller, lavorava per un armatore inglese, e sua moglie Anna talvolta lo accompagnava nei suoi viaggi in mare. Fu proprio durante uno di questi viaggi che Anna si ammalò gravemente. Temendo che non ce l'avrebbe fatta, Peter Mærsk Møller salì sul ponte e implorò Dio di dargli un segno che sua moglie si sarebbe ripresa. Fu in quel momento che scorse una stella solitaria illuminare il cielo altrimenti grigio.

Anna si riprese, e nel 1886, quando Peter Mærsk Møller acquistò la sua prima nave a vapore – la LAURA – decorò il fumaiolo con una stella bianca a sette punte su sfondo azzurro chiaro, come omaggio alla sua amatissima moglie. Per Peter Maersk Møller, la stella divenne il simbolo della sua guarigione e della loro buona sorte.

Da allora, la stella bianca a sette punte su uno sfondo azzurro rappresenta l'identità di Maersk, e nel corso degli anni ha subito alcune trasformazioni grafiche che ne hanno arricchito il significato e l'impatto visivo. Ci sono state molte versioni del logo, ma l'attuale logo Maersk risale all'inizio degli anni Settanta, quando si decise di adottare un approccio più moderno.

ALL THE WAY
TO ZERO

MIGLIORARE LA VITA DI TUTTI CONNETTENDO IL MONDO

In qualità di leader globale di servizi logistici, Maersk vanta oltre 100.000 clienti, opera in quasi 130 paesi e dà lavoro a più di 100.000 dipendenti. Dalle sue umili origini come compagnia di navi a vapore fino a diventare un'azienda logistica integrata che lavora per connettere e semplificare le catene di approvvigionamento dei suoi clienti, Maersk schiera oltre 700 navi e trasporta quasi il 20% dei cibi, materiali e merci del mondo.

ALL
THE WAY
TO ZERO

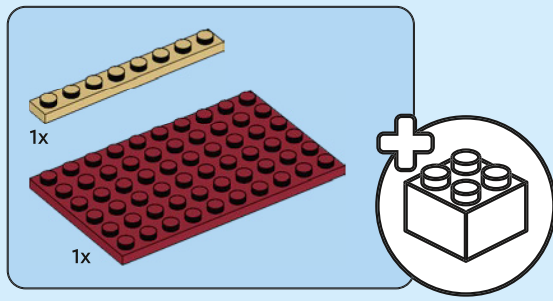

VERSO IL NET ZERO – UN IMPEGNO PER UN FUTURO SENZA EMISSIONI

Di fronte all'emergenza climatica globale, il futuro delle supply chain e del commercio internazionale dipende dalla capacità di innovare e promuovere nuove fonti energetiche. Maersk ha assunto un impegno cruciale: raggiungere zero emissioni nette di gas serra entro il 2040 in tutti i settori aziendali. Mentre Maersk riduce le proprie emissioni di carbonio, l'azienda si è anche impegnata socialmente nella lotta alla crisi climatica, promuovendo la decarbonizzazione delle catene di approvvigionamento globali e favorendo una transizione equa verso un'economia net-zero.

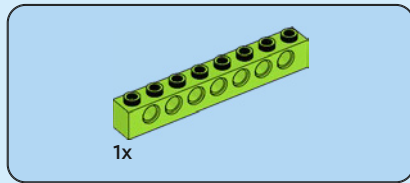

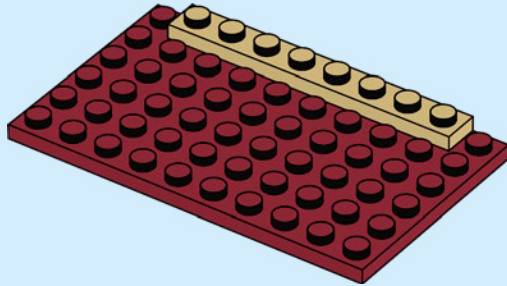

Maersk ha stabilito obiettivi ambiziosi per il 2040, mirando a conseguire progressi significativi in questo decennio: via mare, terra, aria e nei suoi terminal. Con l'ordinazione e la consegna di numerose navi dual-fuel, alimentate da combustibili a basso impatto ambientale come il bio-metanolo, l'e-metanolo e il biometano, la missione di decarbonizzazione della flotta sta procedendo a gonfie vele.
