APRESENTAMOS O ANE MÆRSK

O ANE MÆRSK é o primeiro da sua espécie – o primeiro grande navio porta-contentores capaz de funcionar com combustível de baixas emissões, como bioetanol e metanol sintético. Desde que o ANE MÆRSK foi lançado ao mar em janeiro de 2024, partiram muitos outros navios de combustível duplo, marcando um novo e importante capítulo na descarbonização do transporte marítimo e do comércio global.

O ANE MÆRSK tem 350 metros de comprimento e 53,5 metros de largura. Vazio, o navio pesa 47.700 toneladas enquanto completamente carregado com mercadoria, combustível e tripulação, o navio consegue transportar umas incríveis 190.000 toneladas, o que equivale a 29.000 elefantes africanos.

O navio tem capacidade para carregar 16.592 contentores TEU (unidade equivalente a vinte pés) e, se os alinhássemos todos, eles estender-se-iam por 100,5 km, o correspondente a 959 campos de futebol.

WAY

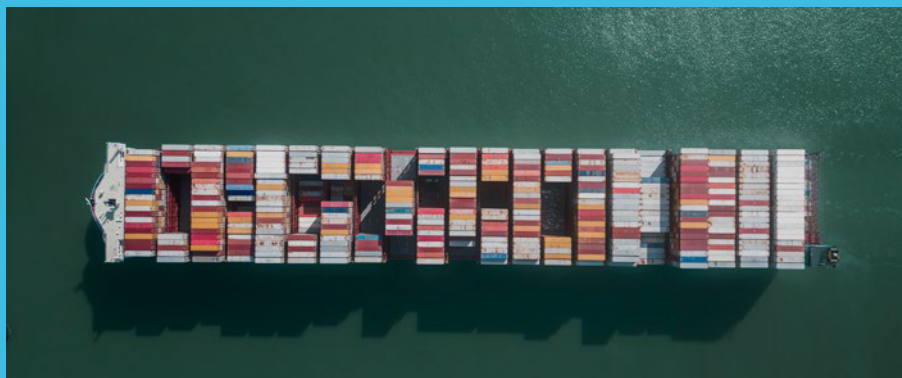

NAVEGANDO PELA MUDANÇA – A HISTÓRIA DO TRANSPORTE MARÍTIMO

Os seres humanos transportam mercadorias por via marítima há mais de 5000 anos, mas até à Revolução Industrial e à invenção do motor a vapor, dependíamos das condições meteorológicas. Sem vento, sem travessia. Com a introdução da energia a vapor, a tripulação de um navio deixou de depender das condições meteorológicas ou da propulsão manual pela primeira vez na história da humanidade. A invenção revolucionou completamente o transporte marítimo, possibilitando novas rotas e impulsionando significativamente o comércio marítimo.

Embora os motores a vapor fossem uma grande melhoria em relação às velas, ainda eram ineficientes, e não demoraria muito até que o transporte marítimo fosse novamente transformado pela invenção do motor a diesel. No entanto, as revoluções no transporte marítimo levam tempo, e levaria várias décadas até que o diesel substituísse totalmente a energia a vapor. A Maersk adquiriu o seu primeiro navio movido a diesel, o LEISE MÆRSK, em 1921, apenas nove anos após o lançamento do primeiro navio mercante oceânico movido a diesel.

Em 1956, a indústria transformou-se mais uma vez, quando foi introduzida a eficiência da «carga em contentores», em que os camiões eram carregados diretamente nos navios. A introdução do contentor reduziu o tempo necessário para carregar e descarregar navios de vários dias para apenas algumas horas.

Graças ao contentor e ao código de barras – os facilitadores invisíveis do comércio mundial –, um fabricante em qualquer parte do mundo pode vender os seus produtos em todos os mercados, tornando a globalização fisicamente possível. O mundo como o conhecemos hoje depende profundamente das cadeias de abastecimento globais. Do produtor de bananas na Colômbia à criança dinamarquesa que descasca uma banana para comer, as cadeias de abastecimento mantêm o mundo conectado e garantem o fluxo de alimentos, medicamentos, mercadorias e materiais para pessoas em todo o mundo.

QUAL É O SIGNIFICADO DO NOME?

Desde 1906, todos os navios da frota da Maersk têm «MÆRSK» como parte do seu nome. A maioria dos primeiros navios tinha nomes próprios relacionados com a família fundadora, mas à medida que a frota cresceu e os nomes da família deixaram de ser suficientes, a tradição de nomear os navios teve de ser ajustada. Hoje, também é possível ver navios da Maersk com nomes de cidades e rios, por exemplo.

Ao decidir como nomear a nova série de navios de combustível duplo, a Maersk voltou à tradição de nomear os navios em homenagem a membros da família fundadora – desta vez começando com a letra A para assinalar uma nova era.

ANE MÆRSK recebeu o nome de Ane Mærsk Mc-Kinney Uggla, presidente da A.P. Moller Holding, empresa-mãe da A.P. Moller - Maersk. A A.P. Moller – Maersk foi fundada em 1904 por Arnold Peter Møller. Ane é neta do fundador do Grupo, Arnold Peter Møller, e da sua esposa, Chastine Mc-Kinney Møller.

ANE MAERSK

A ESTRELA BRANCA – UM FAROL DE ESPERANÇA

A icónica estrela branca de sete pontas faz parte da herança da Maersk desde antes da fundação da empresa, em 1904, e é um símbolo perene dos fortes laços familiares que ainda hoje, mais de 100 anos depois, continuam a ser o coração da empresa.

No início da sua carreira, o capitão Peter Mærsk Møller, pai de A.P. Møller, trabalhou para um armador inglês, e a sua esposa, Anna, por vezes, acompanhava-o nas viagens. Foi numa dessas viagens que Anna ficou gravemente doente. Temendo que ela não sobrevivesse, Peter Mærsk Møller subiu ao convés e rezou a Deus por um sinal de que a sua esposa iria recuperar. Foi então que viu uma única estrela a iluminar o céu cinzento.

Anna recuperou e, em 1886, quando Peter Mærsk Møller comprou o seu primeiro navio a vapor – o LAURA – decorou a chaminé do navio com uma estrela branca de sete pontas sobre um fundo azul-claro, em homenagem à sua amada esposa. Para Peter Maersk Møller, a estrela passou a simbolizar a recuperação da sua esposa e a sorte dos dois.

Desde então, a estrela branca de sete pontas sobre o emblemático fundo azul-celeste tornou-se sinónimo da Maersk, mas o logótipo em si passou por algumas mudanças ao longo dos anos. Houve muitas versões do logótipo, mas o logótipo atual da Maersk remonta ao início da década de 1970, quando se decidiu que era necessária uma abordagem mais moderna.

MELHORAR A VIDA DE TODOS ATRAVÉS DA INTEGRAÇÃO DO MUNDO

Como líder global em serviços de logística, a Maersk tem mais de 100.000 clientes, opera em quase 130 países e emprega mais de 100.000 pessoas. Desde o seu humilde início como empresa de navios a vapor até se tornar uma empresa de logística integrada que trabalha para conectar e simplificar as cadeias de abastecimento dos seus clientes, a Maersk opera mais de 700 navios e transporta quase 20% dos alimentos, materiais e mercadorias do mundo.

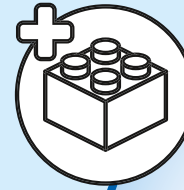

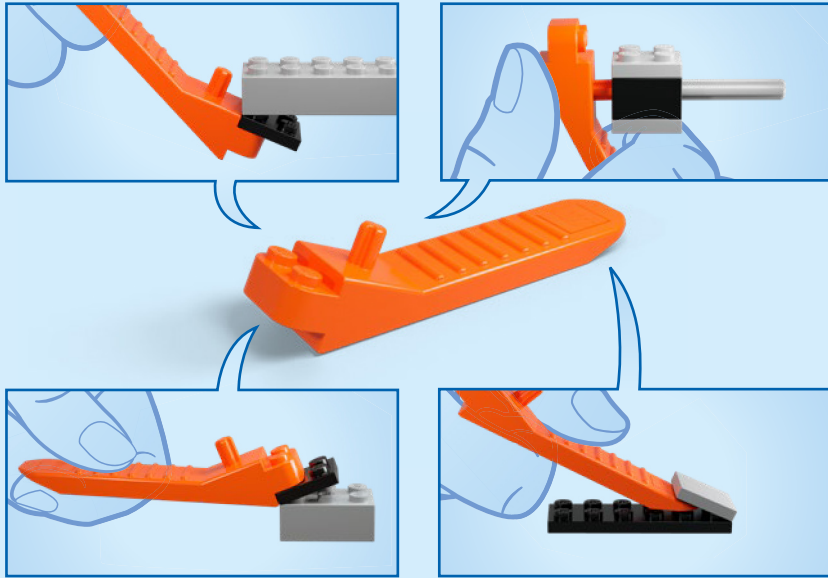

ALL
THE WAY TO ZERO

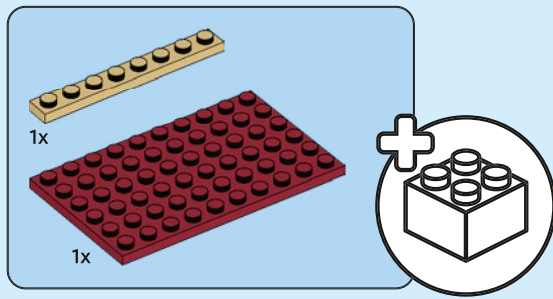

REDUZIR COMPLETAMENTE – UM COMPROMISSO COM UM FUTURO DESCARBONIZADO

À medida que o mundo enfrenta emergências climáticas, o futuro das cadeias de abastecimento e do comércio global depende da capacidade de inovar e promover novas fontes de energia. A Maersk assumiu o compromisso sério de atingir zero emissões líquidas de gases de efeito estufa até 2040 em toda a sua atividade. Ao mesmo tempo que descarboniza as suas próprias operações, a Maersk também assumiu um compromisso social de liderar o combate à crise climática, descarbonizando as cadeias de abastecimento globais e possibilitando uma transição justa para uma economia neutra em emissões carbono.

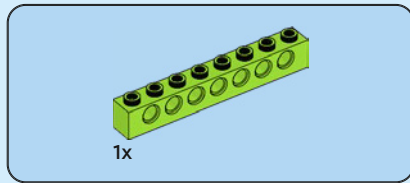

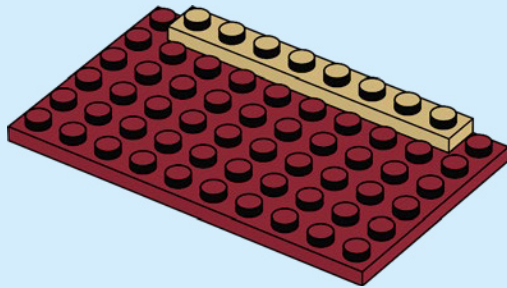

A Maersk definiu metas ambiciosas para 2040, a fim de garantir um progresso significativo nesta década: no mar, em terra, no ar e nos nossos terminais. E com a encomenda e entrega de muitos navios de combustível duplo, capazes de navegar com combustíveis de baixas emissões, como o bioetanol, o metanol sintético e o biometano, até agora a missão de descarbonizar a frota está no bom caminho.
