ȚI-O PREZENTĂM PE ANE MÆRSK

ANE MÆRSK este prima navă din categoria portcontainerelor de dimensiuni mari capabile să funcționeze pe bază de combustibil cu emisii reduse, cum ar fi biometanolul și e-metanolul. De când ANE MÆRSK a fost lansată la apă în ianuarie 2024, multe alte nave cu combustibil dual au fost puse în funcțiune, marcând un capitol nou și important în decarbonizarea transportului maritim și a comerțului mondial.

ANE MÆRSK are o lungime de 350 de metri și o lățime de 53,5 metri. Când este goală, nava cântărește 47.700 de tone, iar când este complet încărcată cu marfă, combustibil și echipaj, nava poate transporta o cantitate uimitoare de 190.000 de tone, echivalentul a 29.000 de elefanți africani.

Nava are capacitate pentru 16.592 de containere TEU (unitate echivalentă douăzeci de picioare), iar dacă le-ai alinia pe toate, acestea s-ar întinde pe 100,5 km, adică lungimea a 959 de terenuri de fotbal.

 MAERSK

ALL THE 10 ZERO WAY

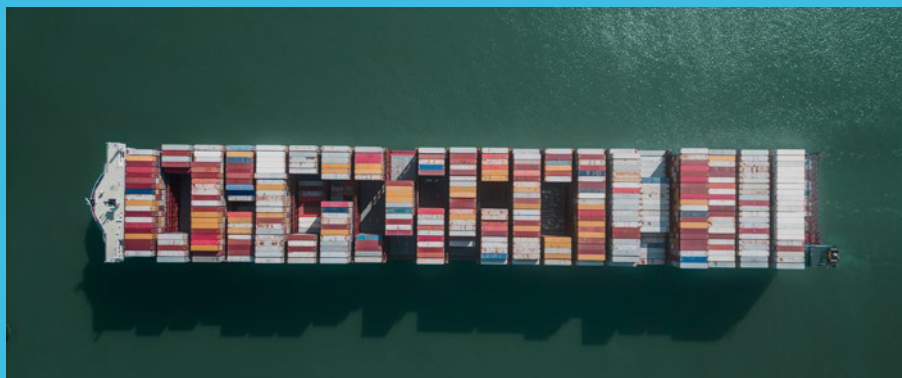

TRANSFORMAREA NAVIGAȚIEI – ISTORIA TRANSPORTULUI MARITIM

Oamenii transportă mărfuri pe mare de peste 5.000 de ani, dar până la Revoluția Industrială și inventarea motorului cu aburi, depindeam de vreme. Dacă nu exista vânt, nu se putea naviga. Odată cu introducerea puterii aburului, pentru prima dată în istoria omenirii, echipajul unei nave nu mai depindea de vreme sau de propulsia manuală. Această invenție a revoluționat complet transportul maritim, făcând posibile noi rute și dând comerțului maritim un impuls major.

Deși motoarele cu aburi au reprezentat o îmbunătățire considerabilă față de pânze, acestea erau încă ineficiente și nu a trecut mult timp până când transportul maritim a fost din nou transformat odată cu inventarea motorului diesel. Cu toate acestea, revoluțiile în domeniul transportului naval necesită timp și au mai trecut câteva decenii până când motorina a înlocuit complet puterea aburului. Maersk a achiziționat prima sa navă cu motor diesel, LEISE MÆRSK, în 1921, la doar nouă ani după lansarea primei nave comerciale de navigație oceanică cu motor diesel.

În 1956, a avut loc o nouă transformare în acest domeniu odată cu introducerea „încărcăturii containerizate” eficiente, prin care remorcile de camion sunt încărcate direct pe nave. Folosirea containerelor a redus timpul necesar pentru încărcarea și descărcarea navelor de la câteva zile la câteva ore.

Datorită containerelor și a codurilor de bare – mecanismele ascunse din spatele comerțului global – un producător din orice parte a lumii își poate vinde mărfurile pe toate piețele, făcând globalizarea posibilă din punct de vedere fizic. Lumea, așa cum o știm astăzi, depinde foarte mult de lanțurile de aprovizionare globale. De la cultivatorul de banane din Columbia la copilul din Danemarca pe care ni-l putem imagina curățând o banană la prânz, lanțurile de aprovizionare mențin lumea conectată și asigură fluxul de alimente, medicamente, bunuri și materiale către oamenii din întreaga lume.

 MAERSK

CARE ESTE SEMNIFICAȚIA UNUI NUME?

Din 1906, toate navele din flota Maersk au inclus cuvântul „MÆRSK” în denumirea lor. Majoritatea navelor inițiale aveau denumiri care făceau referire la familia fondatoare, dar, pe măsură ce flota a depășit numărul de nume disponibile, tradiția a trebuit să fie ajustată. Astăzi poți vedea și nave Maersk denumite, de exemplu, după orașe și râuri.

Atunci când a decis cum să numească noua serie de nave cu combustibil dual, Maersk a revenit la tradiția de a numi navele după membrii familiei fondatoare, de data aceasta începând cu litera A pentru a anunța o nouă eră.

ANE MÆRSK este denumită după Ane Mærsk Mc-Kinney Uggla, președinta A.P. Moller Holding, care este societatea-mamă A.P. Moller-Maersk. A.P. Moller-Maersk a fost fondată în 1904 de Arnold Peter Møller. Ane este nepoata fondatorului Grupului, Arnold Peter Møller, și a soției acestuia, Chastine Mc-Kinney Møller.

ANE MAERSK

STEAUA ALBĂ – UN SIMBOL AL SPERANȚEI

Emblematica stea de culoare albă, cu șapte vârfuri, a făcut parte din patrimoniul Maersk încă dinaintea de înființarea companiei în 1904 și este un simbol durabil al legăturilor puternice de familie, care încă reprezintă esența companiei după mai bine de 100 de ani.

La începutul carierei sale, căpitanul Peter Mærsk Møller, tatăl lui A.P. Møller, a lucrat pentru un armator englez, iar soția sa, Anna, îl însoțea uneori în călătorii. Într-una dintre aceste călătorii, Anna s-a îmbolnăvit grav. Temându-se că nu va supraviețui, Peter Mærsk Møller a urcat pe punte și s-a rugat la Dumnezeu pentru un semn că soția sa își va reveni. În acel moment, a văzut o singură stea luminând cerul, de altminteri gri.

Anna și-a revenit, iar în 1886 Peter Mærsk Møller a achiziționat primul vapor cu aburi, denumit LAURA, și a împodobit coșul navei cu o stea albă cu șapte vârfuri pe un fundal albastru deschis, ca omagiu adus soției sale iubite. Pentru Peter Maersk Møller, steaua reprezenta recuperarea ei și simbolul norocului lor.

De atunci, steaua albă cu șapte vârfuri pe emblematicul fundal albastru a fost sinonimă cu Maersk, însă logoul în sine a evoluat de-a lungul anilor. Au existat multe versiuni ale logoului, dar logoul Maersk din prezent datează de la începutul anilor 1970, când s-a decis că este nevoie de o abordare mai modernă.

ALL THE WAY
TO ZERO

ÎMBUNĂTĂȚIREA VIEȚII TUTUROR PRIN INTEGRAREA LUMII

Ca lider mondial în domeniul serviciilor logistice, Maersk are peste 100.000 de clienți, operează în aproape 130 de țări și are peste 100.000 de angajați. De la începuturile sale modeste ca o companie de nave cu aburi, până la a deveni o companie de logistică integrată care lucrează pentru a conecta și a simplifica lanțurile de aprovizionare ale clienților săi, Maersk utilizează peste 700 de nave și transportă aproape 20% din alimentele, materialele și bunurile lumii.

DRUMUL PÂNĂ LA ZERO EMISII: ANGAJAMENTUL PENTRU UN VIITOR DECARBONIZAT

Pe măsură ce lumea se confruntă cu urgențe climatice, viitorul lanțurilor de aprovizionare și al comerțului global depinde de capacitatea de a inova și de a promova noi surse de energie. Maersk și-a asumat o obligație serioasă de a atinge nivelul net de zero emisii de gaze cu efect de seră până în 2040, în cadrul tuturor operațiunilor sale. În timp ce își decarbonizează operațiunile, Maersk și-a asumat totodată un angajament social de a fi lider în abordarea crizei climatice prin decarbonizarea lanțurilor de aprovizionare globale și prin facilitarea unei tranziții corecte către o economie cu emisii nete zero.

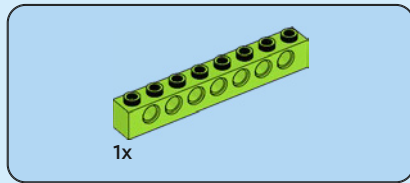

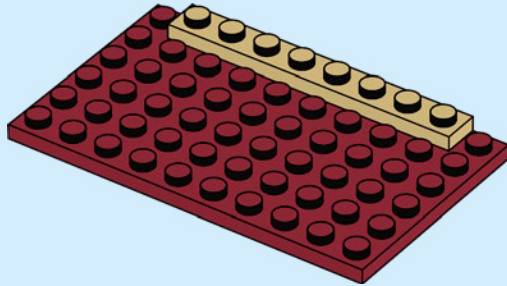

Maersk a stabilit obiective ambițioase până în 2040 pentru a asigura progrese semnificative în acest deceniu: în cadrul sectoarelor maritime, terestre, aeriene, precum și la terminalele noastre. În contextul comandării și livrării de numeroase nave cu combustibil dual care pot naviga cu emisii reduse, cum ar fi biometanolul și e-metanolul, precum și biometanolul, misiunea de decarbonizare a flotei este în grafic.
