EL AT-ST SE PRESENTA EN TODO SU ESPLENDOR

Han pasado casi dos décadas desde la última vez que lanzamos una versión LEGO® Star Wars™ Ultimate Collector Series del caminante AT-ST (10174, en 2006). Desde entonces, la saga ha seguido atrayendo a nuevas generaciones de fans de las películas, las series de Internet y LEGO Star Wars. Nada nos hace más felices que compartir contigo modelos altamente detallados de vehículos populares como este y, con suerte, inspirar y despertar la emoción de los fans de todo el mundo. Desde que tuvieron lugar las batallas de Hoth y Endor en *El Imperio Contraataca* y *El Retorno del Jedi*, han aparecido versiones actualizadas de los caminantes AT-ST en *Los Últimos Jedi*, *Rogue One: Una Historia de Star Wars* y *The Mandalorian*. Con este modelo, volvemos a su diseño original, si bien ahora con más detalles y características que nunca.

¡Que disfrutes construyendo!

Jens Kronvold Frederiksen
Jefe creativo y coordinador
de diseño, LEGO® Star Wars™

TRANSPORTE DE EXPLORACIÓN TODOTERRENO: EL ATERRADOR PRIMO HERMANO DEL AT-AT

El caminante AT-ST, que suele actuar junto a unidades AT-AT más grandes, es un recurso vital para las fuerzas del Imperio. Se trata de un vehículo de exploración para dos personas con cañones bláster instalados en la parte inferior de la cabina y lanzagranadas de impacto de montaje lateral que destaca en misiones de reconocimiento y apoyo terrestre. La combinación de un estabilizador giroscópico y un sistema locomotor avanzado le permite moverse más rápido que el AT-AT con un modo característico de caminar similar al de una criatura viva. En los pacíficos bosques de Endor, grupos de estos vehículos atraviesan el santuario natural de los Ewoks dejando una estela de destrucción y sin que parezca haber una manera de detenerlos. En medio del caos, hacen que la misión de desactivar el escudo deflector de la Estrella de la Muerte a cargo de los rebeldes penda de un hilo. Esto es así hasta que, al igual que con otras fuerzas expedicionarias imperiales, los rebeldes y sus aliados encuentran formas creativas de aprovechar las debilidades de los caminantes. Sin dejarse intimidar, los Ewoks defienden su hogar valiéndose de ingeniosas trampas, armamento artesanal y piedras, lo que permite a Chewbacca y a unos pocos de los Ewoks más inteligentes tomar el control de una unidad, asegurando su camino hacia la victoria.

IMPRESIONES DEL EQUIPO DE DISEÑO DE LEGO® STAR WARS™

La mayoría de los vehículos de *Star Wars*™ son conocidos por tener un aspecto robusto y presentan marcas auténticas de desgaste y deterioro. Este modelo muestra sutiles matices de color que sugieren restos de óxido y suciedad acumulados en sus travesías por los bosques de Endor y, por primera vez, también cuenta con un interior detallado. Construir un vehículo con esta forma, largas y delgadas patas, y una *cabeza* grande y pesada exige cierta ingeniería. En las versiones cinematográficas, las patas se estabilizaban mediante una varilla de acero horizontal, algo que resulta inviable en una versión LEGO®! Experimentamos con las proporciones y ajustamos el diseño para optimizar la posición del centro de gravedad. Integramos elementos antideslizantes de goma en la parte inferior de los apoyos de las patas, que hicimos ligeramente más largos junto con las cuchillas cortavallas, y colocamos las patas en ángulo. Esto nos ayudó a crear una postura dinámica y a garantizar la estabilidad del modelo.

A detailed LEGO Star Wars AT-AT Walker, constructed from grey and black bricks. The model is shown from a side profile, highlighting its massive size and intricate mechanical details. The head is a complex assembly of bricks with a large circular sensor or eye on the right side. The body is a rectangular box with various ports and details. The legs are long and segmented, ending in large, treaded feet. The entire model is set against a dark green background.

DETALLES DE LA CABEZA A LOS PIES

Los detalles basados en la técnica de sobrecarga son una característica común de los vehículos de *Star Wars*™, y siempre nos divertimos recreándolos. Mientras construyes, ¡busca elementos LEGO® inusuales, como bastones de esquí y rodillos para pintar!

Dentro de la cabina hay controles, pantallas de visualización y holoproyectores que ayudan a los pilotos imperiales a ver lo que tienen delante y detrás de ellos para desplazarse por cualquier terreno y detectar las amenazas que se aproximan.

Abre la sección superior completa para ver el interior más de cerca.

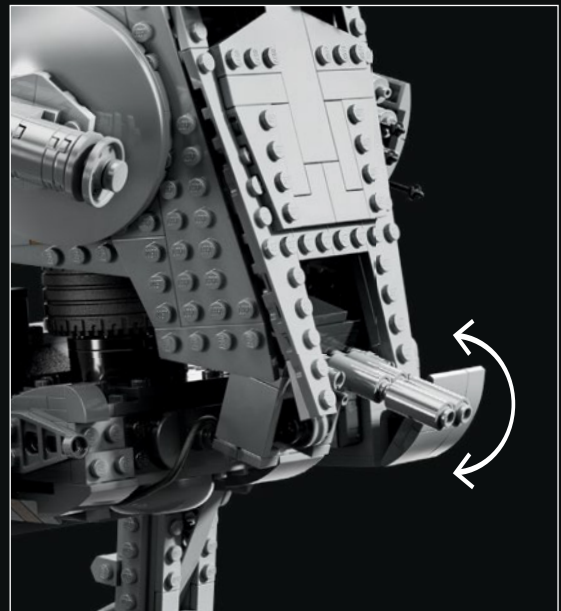

La escotilla se abre hacia atrás para permitir a los pilotos entrar al caminante y salir de él.

Mueve la *cabeza* de un lado a otro.

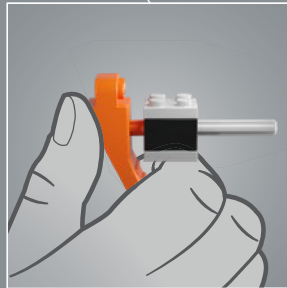

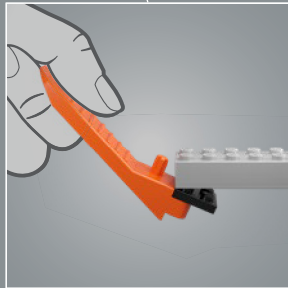

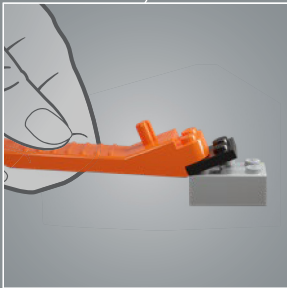

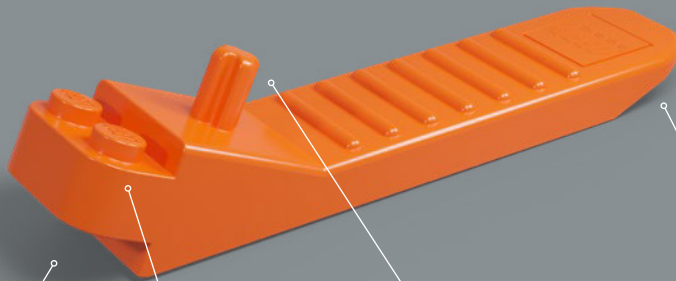

El cañón bláster ligero (izquierda) y el lanzagranadas de impacto (derecha) tienen margen de giro hacia arriba y hacia abajo.

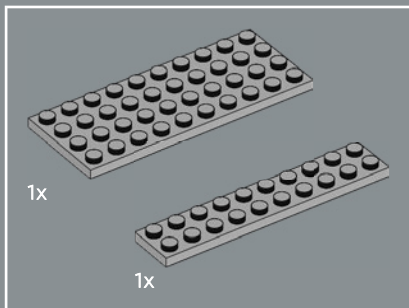

El cañón bláster doble instalado en la parte inferior de la cabina se mueve hacia arriba y hacia abajo.
