# COLOSSEUM

III

Design Lead Jamie Berard and LEGO® designer Rok Zgalin Kobe

Design Lead Jamie Berard e LEGO® designer Rok Zgalin Kobe

## FROM THE DESIGN TEAM

For Design Lead, Jamie Berard, there were many good reasons for choosing the Colosseum: *It's both historically significant and architecturally relevant, plus it's one of the most requested sets we're asked for. But more importantly, it's an impressive and inspiring LEGO® model that should be a fun challenge to build!*

Before becoming a LEGO designer, Rok Zgalin Kobe studied and worked as an architect, so creating the LEGO version of such an architectural icon has always been a goal: *The Colosseum was always at the top of my LEGO to-do list! I started by building the outer curved walls and the scale remained the same from that point on. We never set out to create the biggest LEGO model of all time; but the more the model was being perfected, the more pieces went into capturing its details.*

## DAL DESIGN TEAM

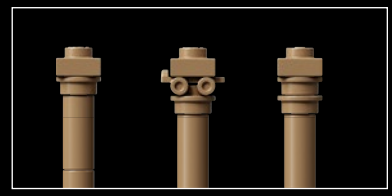

Per il Design Lead, Jamie Berard, le ragioni alla base della selezione del Colosseo sono tante: *è storicamente significativo e rilevante dal punto di vista architettonico e inoltre è uno dei set più richiesti dai fan. Ma soprattutto, è un modello LEGO® incredibile e appassionante, una vera sfida di costruzione.*

Prima di diventare un designer LEGO, Rok Zgalin Kobe, ha studiato e lavorato come architetto, quindi creare la versione LEGO di un monumento così famoso è sempre stato un suo obiettivo: *il Colosseo è sempre stato in cima alla mia lista di modelli LEGO da costruire! Ho iniziato costruendo le pareti curve esterne e da allora non ho più modificato la scala del modello. Non volevamo creare il modello LEGO più grande mai realizzato, ma più lo perfezionavamo, più pezzi abbiamo usato per catturarne tutti i dettagli.*

The Colosseum features 3 types of columns; Doric, Ionic and Corinthian. All are faithfully interpreted in the LEGO® model.

Il Colosseo presenta 3 tipi di colonne: doriche, ioniche e corinzie. Sono state tutte riprodotte fedelmente nel modello LEGO®.

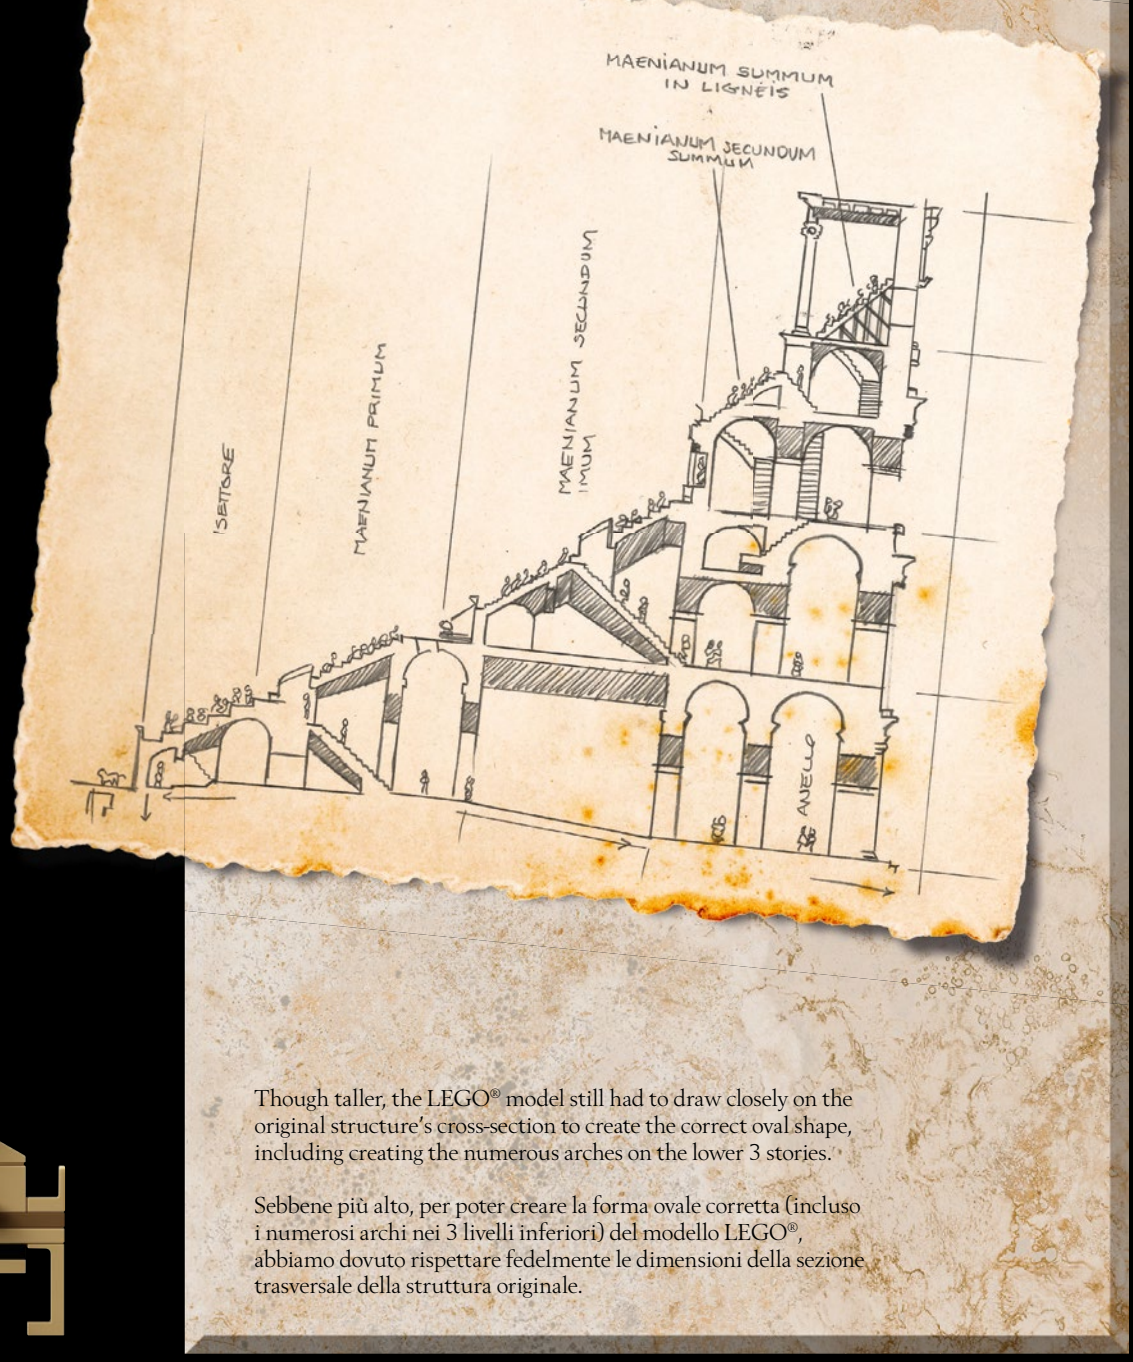

## DRAMATIC SCALE

If built exactly to scale, this LEGO® Creator Expert model would actually be lower in height. Senior LEGO Designer, Rok Zgalin Kobe, used a technic called vertical exaggeration – often employed on topographical maps – in order to emphasize and convey the dramatic vertical nature of the actual Colosseum.

## SCALA IMPRESSIONANTE

Se fosse stato costruito esattamente in scala, questo modello LEGO® Creator Expert sarebbe più basso. Il senior designer LEGO, Rok Zgalin Kobe, ha usato una tecnica chiamata "esagerazione verticale" spesso impiegata per le mappe topografiche per enfatizzare e trasmettere la spettacolare natura verticale del vero Colosseo.

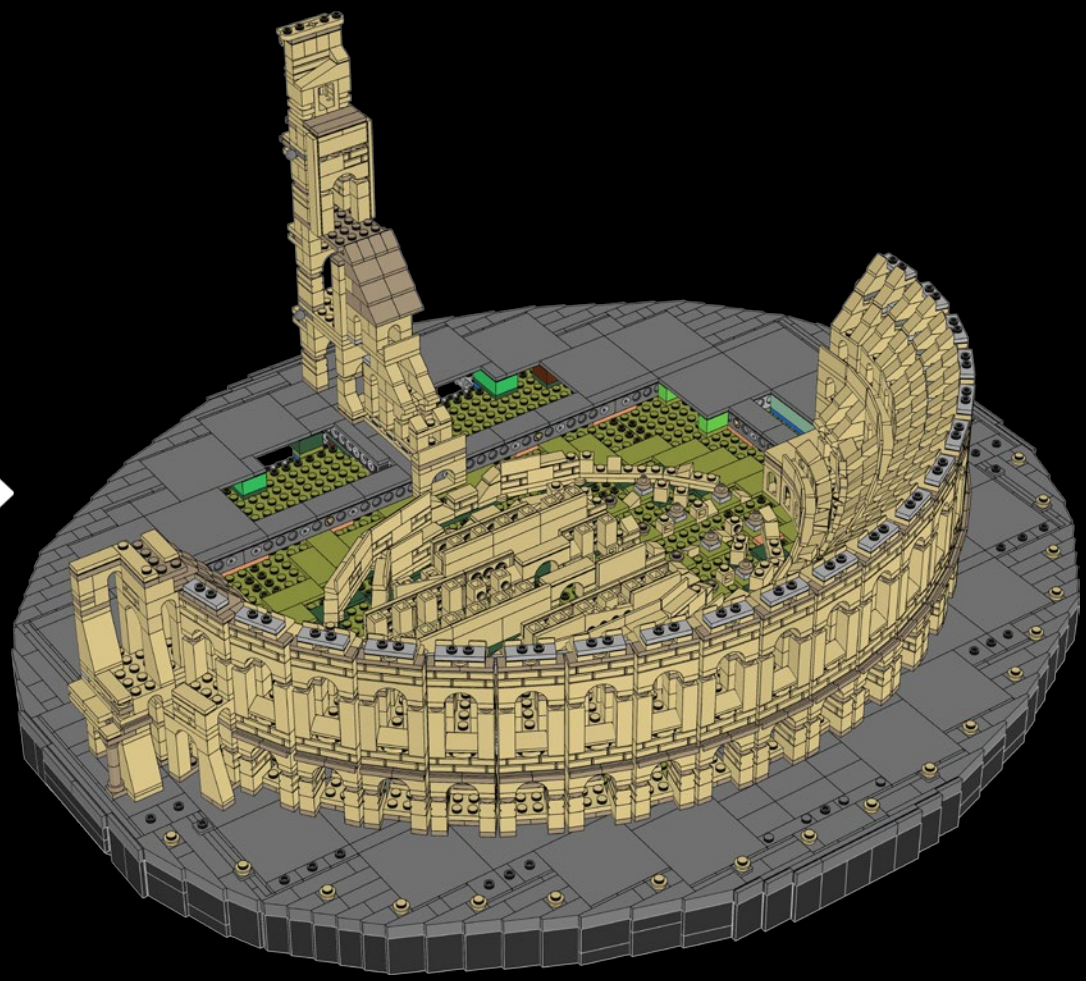

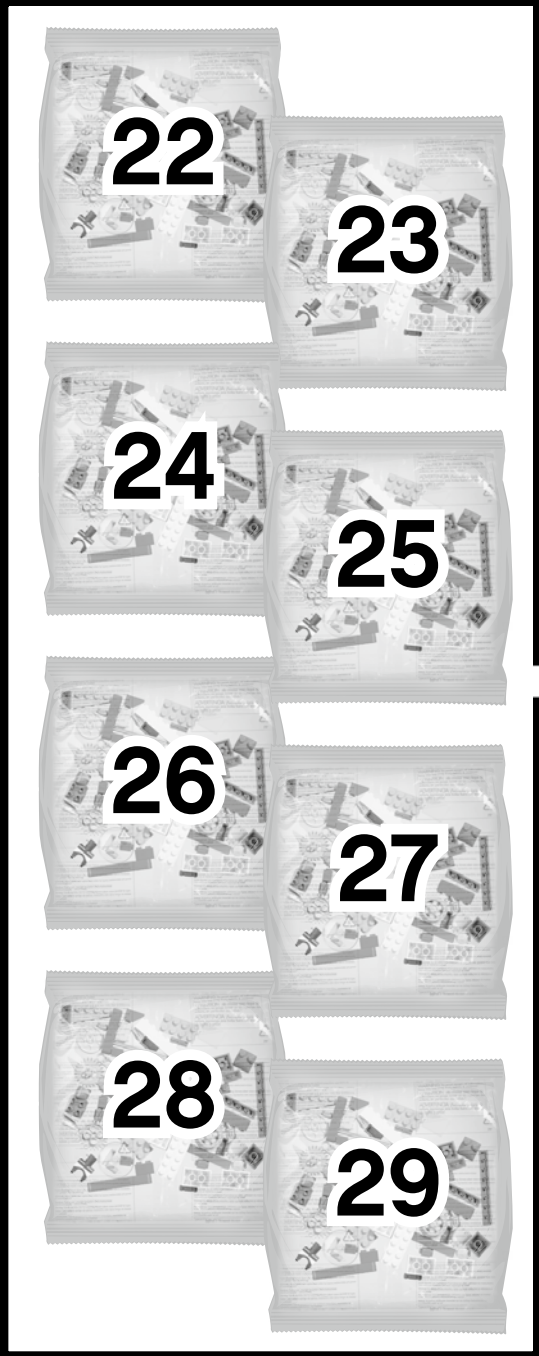

Though taller, the LEGO® model still had to draw closely on the original structure's cross-section to create the correct oval shape, including creating the numerous arches on the lower 3 stories.

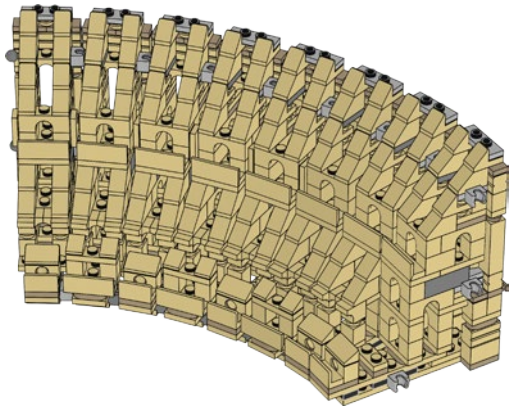

Sebbene più alto, per poter creare la forma ovale corretta (incluso i numerosi archi nei 3 livelli inferiori) del modello LEGO®, abbiamo dovuto rispettare fedelmente le dimensioni della sezione trasversale della struttura originale.

To recreate the Ionic column's scrolls, the LEGO® designer repurposed an existing LEGO roller-skate element.

Per ricreare le pergamene della colonna ionica, il designer LEGO® ha riutilizzato un elemento LEGO speciale: i pattini a rotelle.
