AND THE WINNER IS...

This Republic Attack Gunship is unlike most other LEGO® *Star Wars*™ sets we have released. For one thing, it was the first fan vote, and it is only the third Ultimate Collector Series model based on the *Star Wars* Prequels.

As LEGO *Star Wars* fans, you have shared your passion, ideas and creative takes on this beloved saga with us for more than 20 years. When we posted your top three fan requests on the LEGO Ideas website and asked you to vote for your favorite, we crossed our fingers and hoped a few thousand fans might participate.
Nearly 53,000 of you voted! We are truly humbled by your dedication. So, it gives us great pleasure to present the long-awaited Republic Attack Gunship. Let your own Clone Wars begin.

Jens Kronvold Frederiksen
Design Director & Creative Lead,
LEGO® *Star Wars*™

ET LE GAGNANT EST...

Cette canonnière d'assaut de la République se démarque de la plupart des autres ensembles LEGO® *Star Wars*™ que nous avons lancés. C'était le premier choix des amateurs, et ce n'est que le troisième modèle de la série de collection suprême basé sur les antépisodes de *Star Wars*.

En tant qu'amateurs de LEGO *Star Wars*, vous partagez avec nous depuis plus de 20 ans votre passion pour cette saga bien-aimée, ainsi que vos idées et vos interprétations créatives qui en sont inspirées. Lorsque nous avons publié les trois principales demandes des amateurs sur le site Web de LEGO Ideas et sollicité vos votes, nous avons croisé les doigts et espéré que quelques milliers de personnes allaient participer.
Près de 53 000 d'entre vous ont voté ! Nous sommes vraiment touchés par votre dévouement. C'est donc avec grand plaisir que nous vous présentons la tant attendue canonnière d'assaut de la République. Que votre guerre des clones commence.

Jens Kronvold Frederiksen
Directeur de la conception et responsable de la création,
LEGO® *Star Wars*™

Y EL GANADOR ES...

Este modelo de la cañonera de ataque de la República no se parece a casi ningún otro set LEGO® *Star Wars*™ lanzado al mercado hasta la fecha. Por una parte, se trata del primer set elegido mediante el voto de los fans, además de ser apenas el tercer modelo Ultimate Collector Series basado en las precuelas de *Star Wars*.

Como fans de LEGO *Star Wars*, ustedes nos han compartido su pasión, ideas e interpretaciones creativas de esta entrañable saga por más de 20 años. Cuando publicamos los tres proyectos más solicitados por los fans en el sitio web de LEGO Ideas y pedimos que votaran por su favorito, cruzamos los dedos esperando que participaran unos pocos miles de fans.
¡Pero votaron cerca de 53.000! Su dedicación nos hace sentir muy honrados. Por tal motivo, nos complace enormemente presentarles el tan esperado modelo de la cañonera de ataque de la República. ¡Comiencen su propia Guerra de los Clones!

Jens Kronvold Frederiksen
Director de diseño y jefe creativo,
LEGO® *Star Wars*™

MEET THE MODEL DESIGNER

Hans Burkhard Schlömer
LEGO® *Star Wars*™ Designer

We have released around 150 LEGO® *Star Wars*™ playsets related to the Prequels (*The Phantom Menace, Attack of the Clones, and Revenge of the Sith*), but until now, the only other UCS model based on the *Star Wars* Prequels were 10018 Darth Maul™ (2001) and 10215 Obi-Wan's Jedi Starfighter™ (2010).

We had seen several fan polls that listed the models on everyone's wish lists for the next "big" model, and the Republic Gunship, TIE Bomber and Nebulon-B Frigate kept popping up everywhere. So, we teamed up with the LEGO Ideas team to conduct an official poll of our own, and fans helped us spread the word.
The Republic Gunship received more than 30,000 of the 53,000 votes, smashing all LEGO Ideas records! This is an exciting chance to give fans something they really wish for, and for the adult *Star Wars* fans who were introduced to the saga through the Prequels, this model will definitely bring back happy childhood memories. It has the potential to become a collectible evergreen.

RENCONTRE AVEC LE CONCEPTEUR DU MODÈLE

Hans Burkhard Schlömer
Concepteur LEGO® *Star Wars*™

Nous avons lancé environ 150 ensembles de jeu LEGO® *Star Wars*™ inspirés des antépisodes (*La menace fantôme, L'attaque des clones et La revanche des Sith*), mais jusqu'à présent, les seuls autres modèles de la série de collection suprême basés sur les antépisodes de *Star Wars* étaient 10018 Darth Maul™ (2001) et 10215 Le Jedi Starfighter™ d'Obi-Wan (2010).

Nous avions trouvé plusieurs sondages d'amateurs qui dressaient une liste de souhaits pour le prochain « grand » modèle, et la canonnière de la République, le bombardier TIE et la frégate Nébulon-B revenaient très souvent. Nous avons donc collaboré avec l'équipe de LEGO Ideas pour mener notre propre sondage officiel, et les amateurs nous ont aidés à faire passer le mot.
La canonnière de la République a récolté plus de 30 000 des 53 000 votes, fracassant tous les records de LEGO Ideas ! C'est une chance incroyable de réaliser un souhait cher aux amateurs, et ce modèle rappellera sûrement de bons souvenirs d'enfance aux amateurs adultes de *Star Wars* qui ont découvert la saga à travers les antépisodes. Il a le potentiel de devenir un objet de collection indémodable.

CONOCE AL DISEÑADOR DEL MODELO

Hans Burkhard Schlömer
Diseñador, LEGO® *Star Wars*™

Hemos lanzado al mercado cerca de 150 sets LEGO® *Star Wars*™ relacionados con las precuelas (*La Amenaza Fantasma, El Ataque de los Clones y La Venganza de los Sith*), pero, hasta hace poco, los únicos modelos UCS basados en la trilogía original de *Star Wars* eran Darth Maul™ (10018), de 2001, y Obi-Wan's Jedi Starfighter™ (10215), de 2010.

Vimos múltiples encuestas sobre las expectativas de los fans en cuanto al siguiente "gran" modelo; la cañonera de ataque de la República, el bombardero TIE y la fragata Nebulon-B encabezaban prácticamente todas las preferencias. Eso nos motivó a coordinarnos con el equipo de LEGO Ideas para llevar a cabo nuestra propia encuesta oficial, y los fans nos ayudaron a correr la voz.
El resultado fue contundente: ¡la cañonera de ataque de la República recibió más de 30.000 de los 53.000 votos de la encuesta, rompiendo todos los récords de LEGO Ideas! Este hecho representa una emocionante oportunidad de ofrecer a los fans algo que realmente desean; además, el modelo sin duda evocará recuerdos felices de la infancia en los fans adultos de *Star Wars* que conocieron la saga a través de las precuelas. Tiene el potencial de convertirse en un objeto de colección imperecedero.

Hans Burkhard Schlömer
Jens Kronvold Frederiksen
LEGO
STAR WARS
Republic Gunship

“THE SHROUD OF THE DARK SIDE HAS FALLEN. BEGUN THE CLONE WAR HAS.”

In *Star Wars: Attack of the Clones*, the Republic Attack Gunship, or Low Altitude Assault Transport (LAAT) plays a crucial part in the Battle of Geonosis. Obi-Wan Kenobi, Anakin Skywalker and Senator Padmé Amidala are on the verge of execution in the Petranaki arena when Jedi Master Mace Windu and a large group of Jedi arrive to help them.

But surrounded by Count Dooku’s Separatist Droid Army, the Jedi are fighting a losing battle.

As the droid army closes in on the surviving Jedi, six Republic Attack Gunships arrive with the first infantry of clone troopers led by Master Yoda. In a swift move, they create a protective perimeter around the Jedi, strike down the droid army, and our heroes are airlifted out of the arena.

Count Dooku escapes with Obi-Wan and Anakin in hot pursuit, resulting in an inevitable, fateful lightsaber stand-off. But Dooku has already successfully transmitted the Death Star blueprints to his master. A thousand years of peace in the galaxy have come to at an end. The Clone Wars have begun.

« DU CÔTÉ OBSCUR, LE VOILE VIENT DE SE DÉCHIRER. DE DÉBUTER VIENT JUSTE, LA GUERRE DES CLONES. »

Dans *Star Wars : L'attaque des clones*, la canonnière d'assaut de la République, ou Transport offensif/basse altitude (TO/BA), joue un rôle crucial dans la bataille de Géonosis. Obi-Wan Kenobi, Anakin Skywalker et la sénatrice Padmé Amidala sont sur le point d'être exécutés dans l'arène Petranaki lorsqu'une imposante équipe de Jedi, menée par le maître Jedi Mace Windu, arrive pour les sauver.

Mais cernés par l'armée droïde séparatiste du comte Dooku, les Jedi livrent un combat impossible.

Alors que l'armée droïde se resserre sur les Jedi survivants, six canonnières d'assaut de la République arrivent avec la première infanterie de soldats clones dirigée par Maître Yoda. Elles créent un périmètre de protection autour des Jedi, dévastent l'armée droïde, et transportent nos héros hors de l'arène.
Le comte Dooku réussit à s'échapper, mais est rattrapé par Obi-Wan et Anakin, ce qui donne lieu au fatidique affrontement au sabre laser. Malheureusement, Dooku a déjà transmis les plans de l'Étoile de la Mort à son maître. Mille ans de paix dans la galaxie touchent à leur fin. La guerre des clones commence.

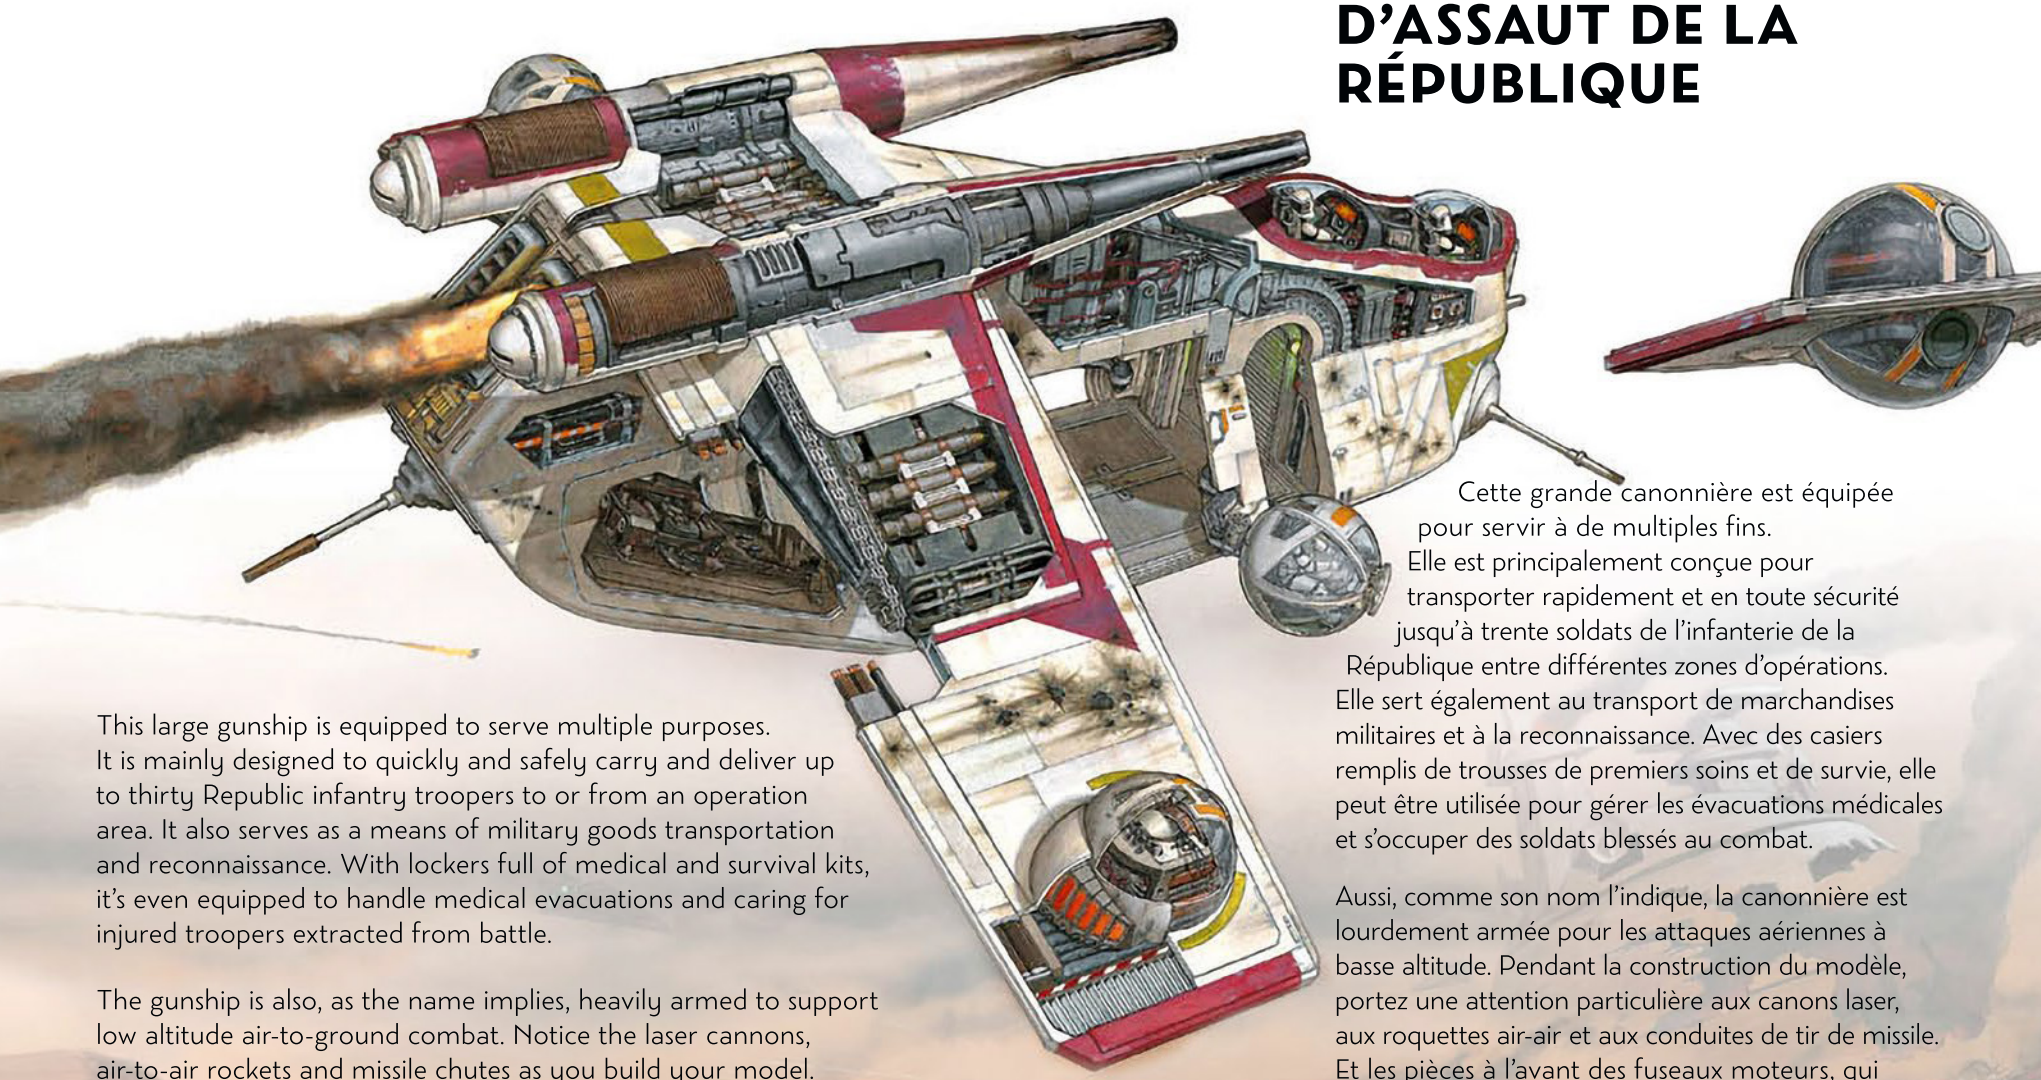

"HA ARRIBADO LA NOCHE DEL LADO OSCURO. INICIÓ LA GUERRA DE LOS CLONES".

En *Star Wars: El Ataque de los Clones*, la cañonera de ataque de la República, o transporte de asalto de baja altitud (LAAT, por sus siglas en inglés), desempeña un rol crucial en la Batalla de Geonosis. Obi-Wan Kenobi, Anakin Skywalker y la Senadora Padmé Amidala están a punto de ser ejecutados en la arena de Petranaki cuando el Maestro Jedi Mace Windu y un nutrido grupo de Jedi llegan en su auxilio.

Pero, rodeados por el Ejército Droide Separatista del Conde Dooku, los Jedi pelean una batalla perdida.

A medida que el Ejército Droide se acerca a los Jedi sobrevivientes, seis cañoneras de ataque de la República aparecen en escena con la primera infantería de Clon Troopers al mando del Maestro Yoda. En un ágil movimiento, crean un perímetro de protección alrededor de los Jedi, someten al Ejército Droide y descienden en la arena para rescatar a nuestros héroes. El Conde Dooku escapa con Obi-Wan y Anakin pisándole los talones, lo que conduce a un inevitable y fatídico enfrentamiento con sables de luz. Pero, para entonces, Dooku ya había transmitido exitosamente los planos de la Estrella de la Muerte a su maestro. Una paz de mil años en la galaxia había llegado a su fin. Comenzaba la Guerra de los Clones.

ABOUT THE REPUBLIC ATTACK GUNSHIP

This large gunship is equipped to serve multiple purposes. It is mainly designed to quickly and safely carry and deliver up to thirty Republic infantry troopers to or from an operation area. It also serves as a means of military goods transportation and reconnaissance. With lockers full of medical and survival kits, it's even equipped to handle medical evacuations and caring for injured troopers extracted from battle.

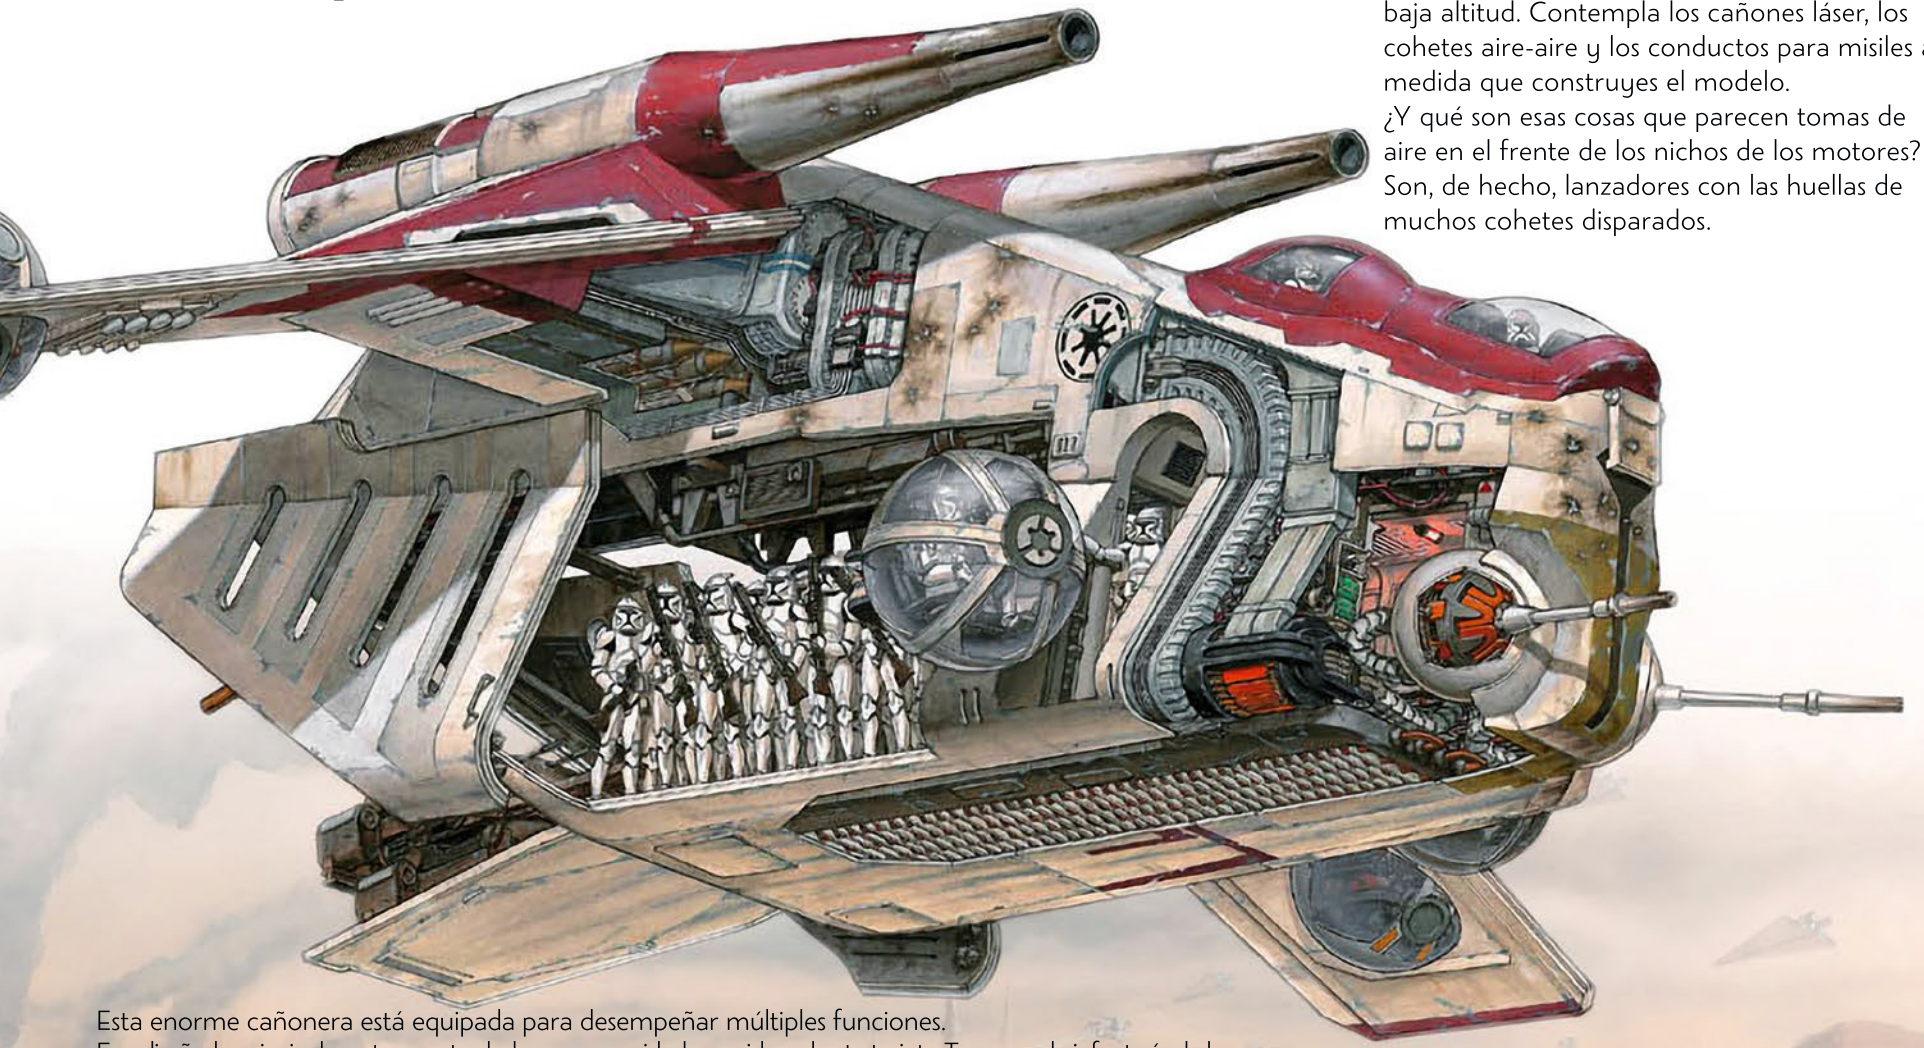

The gunship is also, as the name implies, heavily armed to support low altitude air-to-ground combat. Notice the laser cannons, air-to-air rockets and missile chutes as you build your model. And the front of those engine pods that look like air intakes? They are, in fact, scorched muzzles from rocket launches.

DESCRIPTION DE LA CANONNIÈRE D'ASSAUT DE LA RÉPUBLIQUE

Cette grande canonnière est équipée pour servir à de multiples fins. Elle est principalement conçue pour transporter rapidement et en toute sécurité jusqu'à trente soldats de l'infanterie de la République entre différentes zones d'opérations. Elle sert également au transport de marchandises militaires et à la reconnaissance. Avec des casiers remplis de trousses de premiers soins et de survie, elle peut être utilisée pour gérer les évacuations médicales et s'occuper des soldats blessés au combat.

Aussi, comme son nom l'indique, la canonnière est lourdement armée pour les attaques aériennes à basse altitude. Pendant la construction du modèle, portez une attention particulière aux canons laser, aux roquettes air-air et aux conduites de tir de missile. Et les pièces à l'avant des fuseaux moteurs, qui ressemblent à des conduits d'entrée d'air ? Ce sont en fait des canons roussis par les tirs de roquettes.

ACERCA DE LA CAÑONERA DE ATAQUE DE LA REPÚBLICA

La cañonera está también, como su nombre lo dice, fuertemente armada para participar decisivamente en combates aire-tierra de baja altitud. Contempla los cañones láser, los cohetes aire-aire y los conductos para misiles a medida que construyes el modelo.
¿Y qué son esas cosas que parecen tomas de aire en el frente de los nichos de los motores? Son, de hecho, lanzadores con las huellas de muchos cohetes disparados.

Esta enorme cañonera está equipada para desempeñar múltiples funciones.
Fue diseñado principalmente para trasladar con seguridad y rapidez a hasta treinta Troopers de infantería de la República desde y hacia una zona de operación. También funciona como medio de transporte de suministros militares y para misiones de reconocimiento. Con los compartimentos llenos de kits de sobrevivencia y botiquines, puede incluso llevar a cabo evacuaciones médicas y proporcionar primeros auxilios a los Troopers rescatados de la batalla.

© & ™ Lucasfilm Ltd.

DESIGN DETAILS

LEGO® *Star Wars*™ fans asked for a big model - we listened. Although this model is not to minifigure scale, you can easily imagine it packed with battle gear and troopers en route to their destinations.

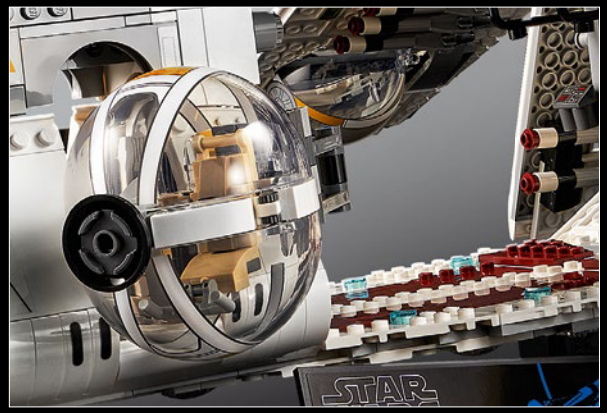

With a wingspan of just over 74 cm (29 in.), the sheer size allowed us to incorporate many of the design features you will recognize from the movie model. The free-swinging doors on both sides are some of the largest moving parts we have ever created in a LEGO *Star Wars* model.
You will also find a total of ten printed windscreen elements (another record for us!): two for the cockpit capsule area, four for the automated guns in the wings, and another four for the turrets.

With the exception of the nose part below the pilot seats, the gunship is completely open.

We wanted to make sure we incorporated adequate support for the model's considerable weight in the design. It required a frame that could be completely hidden by the exterior panels and leave enough room for the passenger compartment doors' lift-arms to move.

A light but sturdy support frame created the necessary structural stability, with the help of LEGO Technic™ elements.

DÉTAILS DE CONCEPTION

Les amateurs de LEGO® *Star Wars*™ voulaient un grand modèle, et nous les avons écoutés. Bien que ce modèle ne soit pas à l'échelle de figurine, vous pouvez facilement l'imaginer rempli de matériel de combat et de soldats en route vers leur destination.

Avec une envergure d'un peu plus de 74 cm (29 po), la taille du modèle nous a permis d'incorporer de nombreuses caractéristiques de conception tirées de la maquette du film. Les portes pivotantes des deux côtés sont parmi les plus grandes pièces mobiles que nous ayons jamais incorporées à un modèle LEGO *Star Wars*.

Vous trouverez également un total de dix éléments de pare-brise imprimés (un autre record pour nous !) : deux pour la capsule du poste de pilotage, quatre pour les canons automatiques dans les ailes, et quatre autres pour les tourelles.

À l'exception de la partie avant sous les sièges des pilotes, la canonnière est entièrement ouverte. Nous voulions nous assurer d'intégrer un support adéquat pour le poids considérable du modèle dans la conception. Il fallait une structure qui puisse être complètement cachée par les panneaux extérieurs tout en laissant suffisamment d'espace pour permettre aux bras de levage des portes de l'habitacle de bouger.

Une charpente de soutien légère mais robuste a fourni la stabilité structurelle nécessaire, avec l'aide d'éléments LEGO Technic™.

DETALLES DEL DISEÑO

Los fans de LEGO® *Star Wars*™ querían un gran modelo, ¡y los escuchamos! Aunque este proyecto no está hecho a escala de minifigura, es fácil imaginarlo repleto de suministros de combate y Troopers en camino a su destino.

Con una envergadura de más de 74 cm, su gran tamaño nos permitió incorporar muchas de las características de diseño que resaltan en el modelo de la película. Las puertas articuladas en ambos lados son de las partes móviles más grandes que hemos creado para un modelo LEGO *Star Wars*.

También encontrarás un total de diez parabrisas impresos (¡un récord más para nosotros!): dos para el área de la cápsula de la cabina, cuatro para las armas automáticas de las alas y otros cuatro para las torretas.

Con excepción de la parte de la nariz, ubicada justo debajo de los asientos de los pilotos, la cañonera está completamente abierta. Quisimos asegurarnos de que el diseño contemplara el apoyo suficiente para el considerable peso del modelo. Se requería una estructura que, además de ocultarse debajo de los paneles exteriores, dejara espacio suficiente para que los brazos elevadores de las puertas de acceso al compartimiento de pasajeros pudieran moverse.

Una estructura firme y ligera construida con ayuda de piezas LEGO Technic™ aportó la estabilidad estructural necesaria.

THE ORIGIN OF CLONE TROOPERS

In *Star Wars: Attack of the Clones*, Obi-Wan Kenobi discovers that Lama Su, prime minister of the planet Kamino, has been producing a clone army for the Republic, by order of the late Jedi Master Sifo-Dyas, a former leading member of the Jedi High Council. 200,000 units are ready to be dispatched, with another million in production.

The original clone host turns out to be the bounty hunter, Jango Fett, who now leads a comfortable life on Kamino with his young clone son, Boba. Jango flees after Obi-Wan suspects him of being involved in the plot to assassinate Senator Amidala. Obi-Wan tracks him to the droid foundries on Geonosis where Jango is ultimately killed by Master Windu in the Battle of Geonosis as Boba watches from the bleachers. The rest is *Star Wars* history.

L'ORIGINE DES SOLDATS CLONES

Dans *Star Wars : L'attaque des clones*, Obi-Wan Kenobi découvre que Lama Su, le premier ministre de la planète Kamino, a créé une armée de clones pour la République, sur ordre du défunt maître Jedi Sifo-Dyas, un ancien membre important du Haut conseil Jedi. Deux cent mille unités sont prêtes à être expédiées, et un autre million est en production.

Le modèle d'origine des clones s'avère être le chasseur de primes Jango Fett, qui mène maintenant une vie tranquille sur Kamino avec son jeune fils et clone, Boba. Jango s'enfuit lorsqu'Obi-Wan le soupçonne d'être impliqué dans le complot visant à assassiner la sénatrice Amidala. Obi-Wan le suit jusqu'aux fonderies de droïdes de Géonosis, où Jango est finalement tué par Maître Windu lors de la bataille de Géonosis, scène à laquelle Boba assiste depuis les gradins. Et on connaît la suite.

EL ORIGEN DE LOS CLON TROOPERS

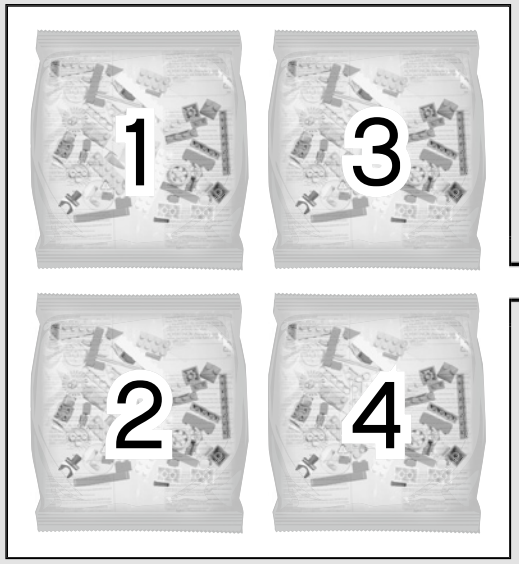

En *Star Wars: El Ataque de los Clones*, Obi-Wan Kenobi descubre que Lama Su, primer ministro del planeta Kamino, ha estado produciendo un ejército de clones para la República por órdenes del difunto Maestro Jedi Sifo-Dyas, un antiguo miembro prominente del Alto Consejo Jedi. 200.000 unidades están listas para entregarse, y hay otro millón en producción.

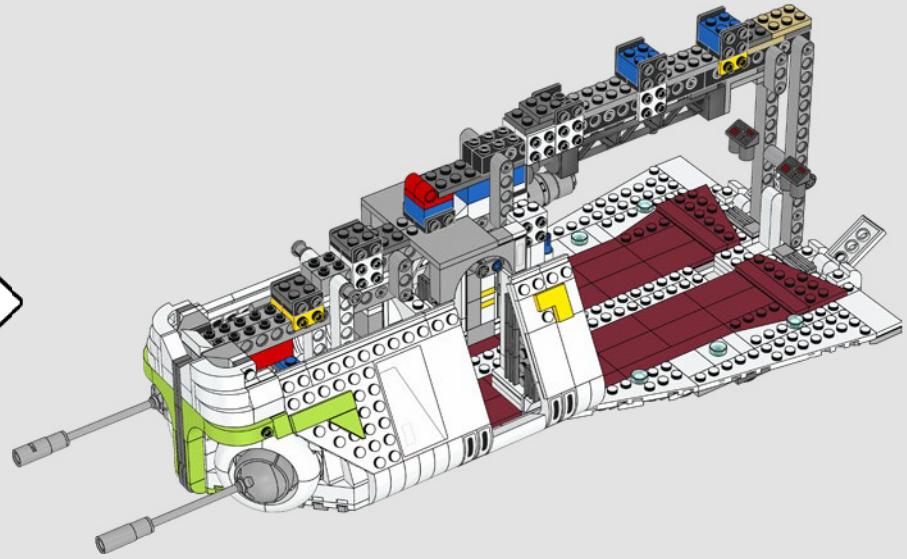

El clon original resulta ser el cazarrecompensas Jango Fett, quien ahora vive plácidamente en Kamino con Boba, su joven hijo clon. Jango huye al darse cuenta de que Obi-Wan sospecha que está involucrado en la conspiración para asesinar a la Senadora Amidala. Obi-Wan lo sigue hasta las fundiciones de droides de Geonosis, donde Jango es finalmente abatido por el Maestro Windu en la Batalla de Geonosis ante la mirada de Boba, quien contempla la escena desde las gradas. El resto es historia de *Star Wars*.
