BMW M 1000 RR

When BMW Motorrad's in-house performance experts announced the first-ever M-developed motorcycle, the BMW M RR, everyone knew that the result was going to be something special. In the same way, the LEGO® Technic team realised it would take something never seen before to pay true tribute to the M RR. The result is both a motorcycle and a Technic model that are state-of-the-art within their respective fields.

THE PINNACLE OF PERFORMANCE

The quest for enhanced performance on both racetrack and road is what defines this M version of a high-performance motorcycle. With the original RR superbike as the perfect foundation, the BMW Motorrad team set about coercing more power out of the water-cooled 999-cc inline four-cylinder engine, while also introducing design upgrades like carbon fibre wheels and titanium exhaust system to reduce overall weight.

A MATTER OF SCALE

The first challenge the LEGO® Technic designers faced was to set the scale of the model. Too small and it would be difficult to replicate the many features and functions of the real M 1000RR. Too big and it would challenge the Technic building system. With a 1:5 scale, it became the largest Technic motorcycle model ever created. The Technic team worked closely with the designers and engineers at BMW Motorrad to ensure the LEGO Technic version was as close to the real M 1000RR as possible.

SAMUEL TACCHI
Designer
LEGO® Technic

“

**IT TOOK ME BACK TO WHEN I WAS
DESIGNING MOTORCYCLES.”**

Samuel Tacchi

With a background in motorcycle design and a huge passion for riding them as well, LEGO® Technic designer Samuel Tacchi was the natural choice to lead this project.

PUSHING THE TECHNIC BUILDING SYSTEM

The Technic version of the M RR needed the design of eight new pieces and Senior Designer Daniel Sri Sudarsono oversaw this process. It started with the new front and rear suspension setup needed to support the 1.4 kg (3 lbs.) weight of the model. New rims, disc brakes and a transparent windscreen quickly followed, all of which had to be tried and tested before being approved for use in the final model.
