

STAR
WARS™

A RITE OF PASSAGE FOR EVERY LEGO® STAR WARS™ FAN

Even after four decades, the Rebel Alliance keeps growing in our galaxy as the *Star Wars™* saga continues to excite new generations of fans. And where would the Alliance be without X-wing starfighters? These reliable starships have brought formidable Imperial forces to their knees in movies as well as other series like *Star Wars Rebels*, *The Mandalorian* and *The Book of Boba Fett*.

The most memorable scene is, perhaps, the trench run in *A New Hope*, when Luke Skywalker in his X-wing launches a successful attack on the Death Star. Just as this scene was a rite of passage for young Skywalker, building your first LEGO® X-wing starfighter is a special occasion for many fans. Whether you're new to the fleet or have piloted others before, we're honored to have you on our team.

Enjoy building!

UN RITE DE PASSAGE POUR TOUT AMATEUR DE LEGO® STAR WARS™

Même après quatre décennies, l'Alliance rebelle continue de croître dans notre galaxie, alors que la saga *Star Wars™* continue de passionner de nouvelles générations d'amateurs. Et que serait l'Alliance sans les chasseurs X-Wing ? Ces vaisseaux fiables ont terrassé de redoutables forces impériales dans des films et d'autres séries comme *Star Wars Rebels*, *The Mandalorian* et *Le livre de Boba Fett*. La scène la plus mémorable est sans doute la course-poursuite dans la tranchée dans *Un nouvel espoir*, où Luke Skywalker, à bord de son X-Wing, lance une attaque réussie contre l'Étoile de la Mort. Tout comme cette scène était un rite de passage pour le jeune Skywalker, construire son premier chasseur X-Wing LEGO® est une occasion spéciale pour de nombreux amateurs. Que vous soyez nouveau dans la flotte ou que vous ayez déjà piloté d'autres véhicules, nous sommes honorés de vous accueillir dans notre équipe.

Bonne construction !

UN RITO DE INICIACIÓN PARA TODOS LOS FANS DE LEGO® STAR WARS™

Incluso después de cuatro décadas, la Alianza Rebelde continúa expandiéndose por nuestra galaxia de la mano de la saga *Star Wars™*, cuya popularidad crece como la espuma entre las nuevas generaciones. ¿Y qué sería de la Alianza sin los cazas espaciales X-wing? Estas confiables naves han puesto de rodillas a formidables fuerzas imperiales en las películas y en series como *Star Wars Rebels*, *The Mandalorian* y *El Libro de Boba Fett*. La escena más memorable es, tal vez, el recorrido por las trincheras de *Una Nueva Esperanza*, cuando Luke Skywalker lanza un exitoso ataque contra la Estrella de la Muerte al mando de su caza X-wing. Al igual que esta escena representó un rito de iniciación para el joven Skywalker, construir su primer caza espacial X-wing LEGO® es una ocasión especial para muchos fans. Tanto si eres nuevo en la flota como si has pilotado en el pasado, nos sentimos honrados de tenerte en nuestro equipo.

¡Que disfrutes la construcción!

SPEED, PRECISION AND FIREPOWER

Like many other *Star Wars™* starships and vehicles, X-wing starfighters are marked by the wear and tear of missions and battles. (As are their astromech droid co-pilots.) Nevertheless, these modestly sized crafts are no small feats of engineering and are favored among Rebel pilots as sturdy, reliable and chock-full of character. Built for battle, with four laser cannons, two proton torpedo launchers and the ability to activate hyperdrive, they can maneuver with speed and precision and were instrumental in the successful evacuation of the Rebels' Echo Base on Hoth.

For the first movie scale models, Lucasfilm Ltd. model designers originally based the body of the X-wing starfighter on dragster car cockpits. While most scale models were created using plastic or metal, the X-wing starfighter models were carved out of wood and decorated to achieve the rugged look of aged starships riveted together, rather than a fleet of sleek, identical modern designs. It wasn't unusual for different models to be used to represent the same X-wing starfighter in various shots, and the full-scale models were highly detailed to add authenticity and depth to the closeup shots of Rebel pilots on the ground and in dogfights.

VITESSE, PRÉCISION ET PUISSANCE DE FEU

Comme beaucoup d'autres vaisseaux et véhicules de Star Wars™, les chasseurs X-Wing sont marqués par l'usure des missions et des batailles. (Tout comme leurs copilotes droïdes astromech.) Néanmoins, ces vaisseaux de taille modeste sont de véritables prouesses d'ingénierie et sont appréciés des pilotes rebelles pour leur robustesse, leur fiabilité et leur caractère. Conçus pour le combat, ils sont équipés de quatre canons laser et de deux lance-torpilles à proton, possèdent la capacité d'activer l'hyperpropulsion et peuvent être manœuvrés avec rapidité et précision. Ils ont joué un rôle déterminant dans l'évacuation de la base Echo des Rebelles sur Hoth.

Pour les premières maquettes des films, les modélistes de Lucasfilm Ltd. ont initialement basé le corps du chasseur X-Wing sur les habitacles des véhicules de course d'accélération. Alors que la plupart des maquettes ont été créées en plastique ou en métal, les maquettes de chasseurs X-Wing ont été sculptées dans du bois et décorées pour donner l'aspect usé de vieux vaisseaux rivetés ensemble, plutôt qu'une flotte de modèles modernes, élégants et identiques. Il n'était pas rare que des maquettes différentes soient utilisées pour représenter le même chasseur X-Wing dans différents plans, et les maquettes grandeur nature étaient très détaillées pour ajouter de l'authenticité et de la profondeur aux gros plans des pilotes rebelles au sol et en combat.

VELOCIDAD, PRECISIÓN Y POTENCIA DE FUEGO

Al igual que muchas otras naves y vehículos de Star Wars™, los cazas espaciales X-wing tienen huellas de desgaste a causa de las numerosas misiones y batallas por las que han pasado. (Lo mismo puede decirse de los droides astromecánicos que ayudan a sus pilotos). No obstante, estas naves de tamaño modesto son grandiosas obras de ingeniería muy apreciadas entre los pilotos rebeldes por su gran solidez y confiabilidad, así como por su inconfundible carácter. Construidas pensando en la batalla y equipadas con cuatro cañones láser y dos lanzadores de torpedos de protones, pueden activar la hiperpropulsión y maniobrar con velocidad y precisión. Por tal motivo, se considera que tuvieron una importancia crucial en el éxito de la evacuación de los rebeldes de Hoth, donde habían instalado la base Echo.

Los modelistas de Lucasfilm Ltd. que crearon los modelos a escala que podemos ver en la primera entrega se inspiraron en la forma de las cabinas de los drágsters para crear el fuselaje del caza espacial X-wing. Aunque la mayoría de los modelos utilizados en la película se fabricaron en plástico o metal, los modelos de cazas espaciales X-wing estaban hechos de madera tallada y decorados al estilo de vehículos desgastados y reparados en múltiples ocasiones. No era inusual que se usaran diferentes modelos para representar el mismo caza espacial X-wing en varias tomas, ya que las recreaciones a escala completa estaban repletas de detalles que añadían autenticidad y profundidad a las tomas cerradas de los pilotos rebeldes en tierra firme y mientras participaban en combates cercanos.

"RED FIVE STANDING BY."

The T-65 X-wing starfighter is a mere 12.5 meters (41 ft.) long and weighs 10 metric tonnes (22,046 lbs). Fusial thrust engines generate a maximum speed of 1,050 kph (652 mph) and the smooth maneuvering with the signature double wings gives pilots a clear advantage when dodging fire from enemy starships. The combination of a deflector shield projector and generator provides significant protection in battle, while torpedo launchers and laser cannons allow for precision attacks on fast-moving targets.

In case of crashes on swampy planets, or similar emergencies, the starfighter comes with a fully equipped survival kit including field rations to last the pilot a week. Letting an astromech droid serve as a combined navigation system and built-in mechanic is a stroke of genius by the Incom Corporation, as the droid may be used for multiple purposes on missions and on the ground – like transporting Death Star blueprints or disabling trash compactors.

« RED CINQ, TOUT EST PARÉ. »

Le chasseur X-Wing T-65 mesure 12,5 mètres de long et pèse 10 tonnes métriques. Les moteurs de poussée fusiale permettent d'atteindre une vitesse maximale de 1 050 km/h. La fluidité des manœuvres avec les doubles ailes caractéristiques donne aux pilotes un avantage certain lorsqu'ils esquivent les tirs des vaisseaux ennemis. La combinaison d'un projecteur de bouclier déflecteur et d'un générateur offre une protection substantielle au combat, tandis que les lance-torpilles et les canons laser permettent des attaques précises sur des cibles se déplaçant rapidement.

En cas d'écrasement sur des planètes marécageuses ou d'autres situations d'urgence similaires, le chasseur est équipé d'une trousse de survie complète, qui comprend des rations permettant au pilote de tenir une semaine. Laisser un droïde astromech servir à la fois de système de navigation et de mécanicien intégré est un coup de génie de la part de la Corporation Incom, car le droïde peut être utilisé à de multiples fins en mission et au sol – comme transporter les plans de l'Étoile de la Mort ou désactiver les compacteurs de déchets.

"ROJO 5 EN POSICIÓN".

El caza espacial T-65 X-wing tiene una longitud de 12,5 m y pesa 10 t. Sus motores de empuje de fusión generan una velocidad máxima de 1050 km/h y la ágil maniobrabilidad que aportan sus inconfundibles alas dobles dan a los pilotos una clara ventaja para no ser alcanzados por el fuego enemigo. La combinación de un proyector de escudo deflector y un generador ofrece una importante protección en la batalla. Además, los lanzadores de torpedos y los cañones láser permiten realizar ataques de precisión contra objetivos que se mueven rápidamente.

Y, por si llegara a estrellarse en un planeta pantanoso o le ocurriera otra emergencia parecida, viene equipado con un kit de supervivencia que incluye raciones de alimentos para una semana. Permitir que un droïde astromecánico ayude como combinación de sistema de navegación y mecánico a bordo, entre otras cosas, fue una fantástica idea de los ingenieros de Incom Corporation. Sumamente versátiles, los droides pueden ser muy útiles tanto allá arriba, cumpliendo misiones (como transportar los planos de la Estrella de la Muerte o desactivar los compactadores de residuos), como en tierra firme.

"Every time we release a new LEGO® X-wing starfighter, we hear from Star Wars™ fans who want to share their excitement after they have built their first one. It's a familiar feeling. I have worked as a LEGO Model Designer for over 25 years now, and the first model I ever worked on was the first Ultimate Collector Series X-wing starfighter (set 7191 released in 2000). There are always new details or techniques to explore and, like their movie model counterparts, each version we have released has its own unique characteristics."

"It was a high priority to decorate the cockpit. This is the first time we have done that. We developed new wing plates to get the correct angle on the rear edge of the wings. To increase the size of the engines, we created a new wall element, too. In the films, we see Luke in a few different variations of the cockpit of the legendary Red Five and we wanted to incorporate the best of these versions."

RENCONTRE AVEC LE CONCEPTEUR DU MODÈLE

« Chaque fois que nous lançons un nouveau chasseur X-Wing LEGO®, des amateurs de Star Wars™ expriment leur joie d'avoir construit leur premier. C'est un sentiment familier.

Je travaille en tant que concepteur de modèles LEGO depuis plus de 25 ans maintenant, et le premier modèle sur lequel j'ai travaillé était le premier chasseur X-Wing de la Série de collection suprême (l'ensemble 7191, lancé en 2000). Il y a toujours de nouveaux détails ou de nouvelles techniques à explorer et, comme les maquettes des films, chaque version que nous avons produite possède ses propres caractéristiques. »

« La décoration de la cabine était une priorité absolue. C'est la première fois que nous faisions cela. Nous avons développé de nouvelles plaques d'ailes pour obtenir le bon angle sur le bord arrière des ailes. Nous avons également créé un nouvel élément de mur pour augmenter la taille des moteurs. Dans les films, nous voyons Luke dans quelques variations différentes de la cabine du légendaire Red Cinq, et nous voulions incorporer la meilleure de ces versions. »

CONOCE AL DISEÑADOR DEL MODELO

"Cada vez que lanzamos un nuevo caza espacial X-wing LEGO®, recibimos noticias de fans de Star Wars™ que quieren compartir su emoción luego de crear su primer modelo de la nave. Es una sensación familiar. He trabajado como modelista de LEGO durante más de 25 años y aún recuerdo el primer set con el que trabajé: un caza espacial X-wing Ultimate Collector Series (referencia 7191, lanzado en 2000). Siempre hay nuevos detalles o técnicas que explorar y, al igual que sus contrapartes de la pantalla grande, cada versión que lanzamos cuenta con características únicas".

"La decoración de la cabina era una prioridad de primer nivel. Esta es la primera vez que lo hacemos. Desarrollamos placas nuevas para las alas con el fin de que la parte posterior de estas, justo detrás de los bordes, tuviera el ángulo correcto. Y, para aumentar el tamaño de los motores, creamos un nuevo elemento de muro. En las películas vemos a Luke en diferentes variantes de la cabina del legendario Rojo 5 y quisimos incorporar lo mejor de todas ellas".
