WILD ABOUT FLOWERS

🌸 'Whether you are growing your LEGO® Botanical Collection or this is your first LEGO flower arrangement, you are probably as wild about flowers as we are. This bouquet is a fresh mix of flowers you might pick for yourself in a field or garden, and we paired colours and complementary species from all over the world to celebrate our planet's biodiversity and the soothing beauty we cherish in nature.

Enjoy building!'

LEATHERLEAF FERN

(Rumohra adiantiformis)

✿ The lush, bushy Leatherleaf Fern, native to most tropical climates in the Southern Hemisphere, has become popular with garden owners all over the world. Although it does not produce flowers, the feathery foliage is also a beloved favourite in the cut flower industry as a decorative filler in floral arrangements.

COW PARSLEY/ QUEEN ANNE'S LACE

(Anthriscus Sylvestris)

✿ This airy, cloudlike umbrella of tiny white flowers is commonly found in shady areas all over Europe, in Asia and Africa. Its blossom fireworks are a treat for bees, moths, butterflies and other insects looking for pollen in the early spring. Did you know it is also often used as a mosquito repellent?

WELSH POPPY

*(Meconopsis cambrica/
Papaver cambricum)*

✿ A sure sign of spring and summer in the British Isles and Western Europe is the arrival of the soft, golden Welsh Poppy in hedgerows, fields and roadsides. Despite its tender frame and petals, it also thrives in rocky environments with very little soil and in cracks in your paved garden or city sidewalks.

The palm leaf element was first introduced in our LEGO® Pirates theme in the 1990s. Now it is repurposed to create the Leatherleaf Fern.

Using existing elements in unusual ways is at the heart of LEGO® building. Here a car hub is used to represent the stigma at the centre of the Welsh Poppy.

The nickname Queen Anne's Lace traces back to an old saying that flowers would bloom for Anne, Queen of Great Britain (1702-1707) and her ladies-in-waiting as a complement to their lace dresses.

CORNFLOWER

(Centaurea cyanus)

✿ The brightly coloured, paper-light Cornflower decorates fields and gardens alike in white, pink and blue from early to mid-summer, particularly in Europe, North America and Asia. Its delicate fragrance and nectar attract butterflies and bees, making the Cornflower an alluring companion to your vegetable garden or orchard.

LAVENDER

(Lavandula)

✿ An evergreen shrub with bursting pops of purple colours and a soothing aroma, the ornamental Lavender is as purposeful as it is decorative. Native to the Mediterranean, the Middle East and North Africa, it is widely used as an aromatic culinary herb, for the distillation of essential oils for cosmetics and in herbal medicines.

The LEGO Group is working to build a more sustainable future for children. Currently more than 80 LEGO® elements including trees, leaves and bushes are made from a plant-based plastic, produced using sustainably sourced sugarcane, Plants from Plants! These elements represent the first steps of a bigger mission to make LEGO bricks from sustainable sources by 2030.

LUPIN

(Lupinus)

🌸 Originally native to North America, Lupins also thrive in the wild in the Mediterranean and Europe. Wildly diverse in colour, their ombré spikes climb tall to attract pollinators' attention – and ours – across the North American prairie, along roads and in gardens all over the world.

The minifigures who wore these pirate hats back in 1989 could never have imagined that their fancy headgear would one day be used as Lupin petals!

11

A collection of LEGO flowers. At the top is a tall, thin green stem with several blue buds and two blue flowers. Below it are two more blue flowers. In the middle is a large yellow sunflower-like flower with a brown center. At the bottom are two pink Gerbera daisy flowers with purple centers and green stems.

LARKSPUR

(Consolida ajacis)

✿ The Larkspur gifts us eye-catching wildflower seas in blooming hues of blues across fields and gardens throughout the Northern Hemisphere. An annual species, it arrives in early spring and, along with its close relative the perennial Delphinium, adds height and an airy, elegant pop of colour to your bouquet.

GERBERA DAISY

(Gerbera jamesonii)

✿ A cousin to the sunflower, the lustrous Gerbera comes in a rainbow of colour variations. Native to South Africa, it is also known as the African daisy, Transvaal daisy, or Hilton daisy. With its soft scent and majestic, elevated crown brimmed with velvet-like petals, it radiates light in any garden, field or bouquet.
