the exclusive LEGO® Art
Milky Way soundtrack.

Globular clusters

Globular clusters consist of tens of thousands to millions of stars bound tightly by gravitational attraction. Often spherical in shape, these clusters have been detected in all known types of galaxies – with around 150 detected so far in the Milky Way alone. Most stars in each cluster formed around the same time and their stability allows them to live long lives. One of the oldest known is Messier 15, estimated at around 12 billion years old.
