WE'RE MAKING OUR PACKAGING MORE SUSTAINABLE

We're transitioning from single-use plastic to paper-based packaging. As we progress, you may find a mix of paper and plastic in our boxes.

NOUS RENDONS NOS EMBALLAGES PLUS DURABLES

Nous passons des emballages en plastique à usage unique aux emballages à base de papier. Durant la transition, vous pourriez trouver un mélange de papier et de plastique dans nos boîtes.

QUEREMOS HACER MÁS SUSTENTABLES NUESTROS MATERIALES DE EMBALAJE

Estamos cambiando las bolsas de plástico desechables por bolsas con base de papel. Conforme avanzamos en este propósito, puedes encontrar una mezcla de papel y de plástico en nuestras cajas.

Back to LEGO® Blacktron

When we reminisce about the LEGO® Space theme heyday in the late 1970s and 80s, the Blacktron *Renegade* 6954 always seems to hover in orbit right above us. Since its release in 1987, it has continued its journey through time and space as one of LEGO Space fans' top favorite models. Part of the appeal is how it speaks to builders' imagination and allows them to invent their own extraordinary stories about these first mysterious, villainous Blacktron forces in the LEGO Space story universe. Who are they, where do they come from and what do they want? A strong black and yellow color scheme emphasized the 'bad guys' look in their uniforms and vessels, and transparent yellow windshield and transparent red highlights added design unity and coolness to the series. The extremely versatile design allowed builders to be really creative with their play and displays. All sets were composed of modules, so multiple sets could be combined or separated into various forms. At the time, it was a completely groundbreaking LEGO design and would inspire new generations of space-themed models.

Le retour de LEGO® Blacktron

Lorsque nous nous remémorons l'apogée du thème LEGO® Space à la fin des années 1970 et dans les années 1980, le Blacktron *Renegade* 6954 semble toujours graviter autour de nous. Depuis sa sortie en 1987, il poursuit son voyage à travers le temps et l'espace en tant que l'un des modèles préférés des amateurs de LEGO Space. L'attrait de ce modèle réside en partie dans le fait qu'il sollicite l'imagination des constructeurs et leur permet d'inventer leurs propres histoires extraordinaires sur les mystérieux méchants Blacktron dans l'univers LEGO Space. Qui sont-ils, d'où viennent-ils et que veulent-ils ? La combinaison des couleurs noire et jaune mettait en valeur le côté « vilains » de leurs uniformes et de leurs vaisseaux, et les pare-brises jaunes transparents ainsi que les accents rouges transparents contribuaient à uniformiser la conception et à dynamiser la gamme. La conception extrêmement polyvalente permettait aux constructeurs de faire preuve d'une grande créativité tant au niveau du jeu et de l'exposition. Tous les ensembles étaient composés de modules, de sorte que plusieurs ensembles pouvaient être combinés ou séparés sous différentes formes. À l'époque, il s'agissait d'une conception LEGO totalement révolutionnaire qui allait inspirer de nouvelles générations de modèles sur le thème de l'espace.

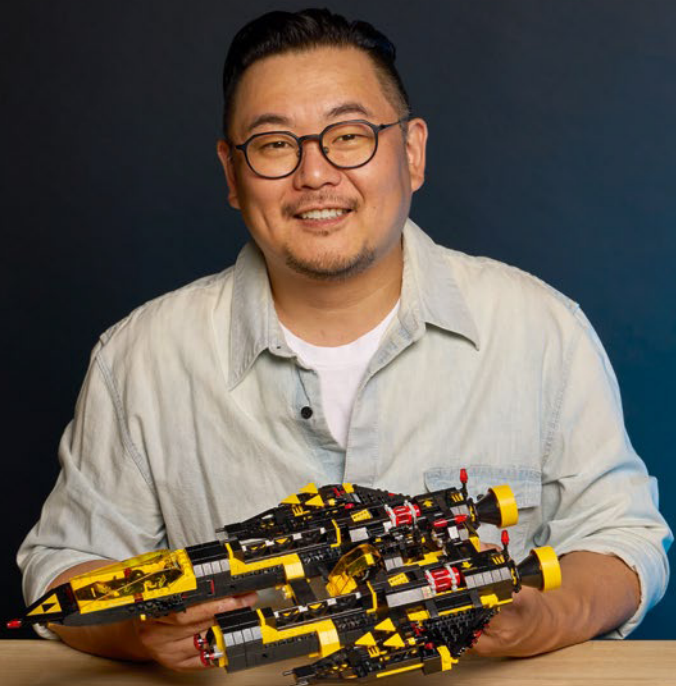

Vuelve LEGO® Blacktron

Cuando recordamos los maravillosos días de finales de los años 70 y principios de los 80 en los que el tema LEGO® Space gozó de su máxima gloria, el set Blacktron *Renegade* (6954) siempre parece reincorporarse a su órbita justo encima de nuestras cabezas. Desde su lanzamiento en 1987, su viaje a través del tiempo y el espacio como uno de los modelos favoritos de los fans de LEGO Space ha seguido un curso estable. Parte de su atractivo reside en cómo le habla a la imaginación de los constructores, a quienes permite inventar sus propias historias fantásticas sobre Blacktron, la primera fuerza misteriosa y siniestra del universo de LEGO Space. ¿Quiénes son, de dónde vienen y qué es lo que quieren? La imponente combinación de colores en negro y amarillo de sus uniformes y naves acentuaba su carácter de "tipos malos", y los parabrisas con tonalidad amarilla, así como los detalles en rojo traslúcido, aportaban frescura y coherencia a la estética de toda la serie. Su versatilidad llevada al extremo permitía a los constructores ser verdaderamente creativos en sus juegos y exhibiciones. Todos los sets estaban conformados por módulos, lo que abría la posibilidad de combinar varios sets o utilizar segmentos de ellos de múltiples formas. Además de ser algo totalmente revolucionario en su momento, este diseño LEGO sirvió como inspiración para generaciones posteriores de modelos de temática espacial.

BLACKTRON™

From the LEGO® Design Team

"We're extremely excited to revive 6954 Blacktron *Renegade* (combined with elements from 6894 *Invader* and 6941 *Battrax*!), for fans of all ages. Staying true to the classic, asymmetrical *Renegade* design, we decided to make this new version about 1.5 times larger. This gave us the opportunity to enhance the model with more advanced features, fun functions and exciting building techniques. We also fit two pilots into the cockpit, built a new dropship function and the small cargo rover can now be dropped directly from the ship. The small spaceships on both sides of the original wings were reborn as a new type of space scooter with a new classic-looking droid. With a new universal connection, all modules of the ship can be built independently and freely combined front and back. So put on your spacesuit, get ready for take-off and invite your friends and family to share the building experience!"

JAE WON LEE,
LEGO® Senior Designer

Un mot de l'équipe de conception LEGO®

« Nous sommes très heureux de faire revivre le Blacktron *Renegade* 6954 (combiné avec des éléments de l'*Invader* 6894 et du *Battrax* 6941 !), pour les amateurs de tous âges. Tout en restant fidèles à la conception asymétrique classique du *Renégat*, nous avons décidé de rendre cette nouvelle version environ 1,5 fois plus grande. Cela nous a permis d'améliorer le modèle avec des caractéristiques plus avancées, des fonctions amusantes et des techniques de construction passionnantes. Nous avons également installé deux pilotes dans l'habitacle, créé une nouvelle fonction de largage, et le petit astromobile cargo peut désormais être largué directement depuis le vaisseau. Les petits vaisseaux spatiaux situés de part et d'autre des ailes d'origine ont été transformés en un nouveau type de scouteur spatial doté d'un nouveau droïde d'apparence classique. Grâce à une nouvelle connexion universelle, tous les modules du vaisseau peuvent être construits indépendamment et combinés librement à l'avant et à l'arrière. Enfilez votre combinaison spatiale, préparez-vous au décollage et invitez vos amis et votre famille à partager l'expérience de la construction ! »

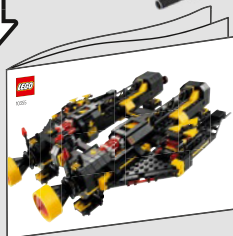

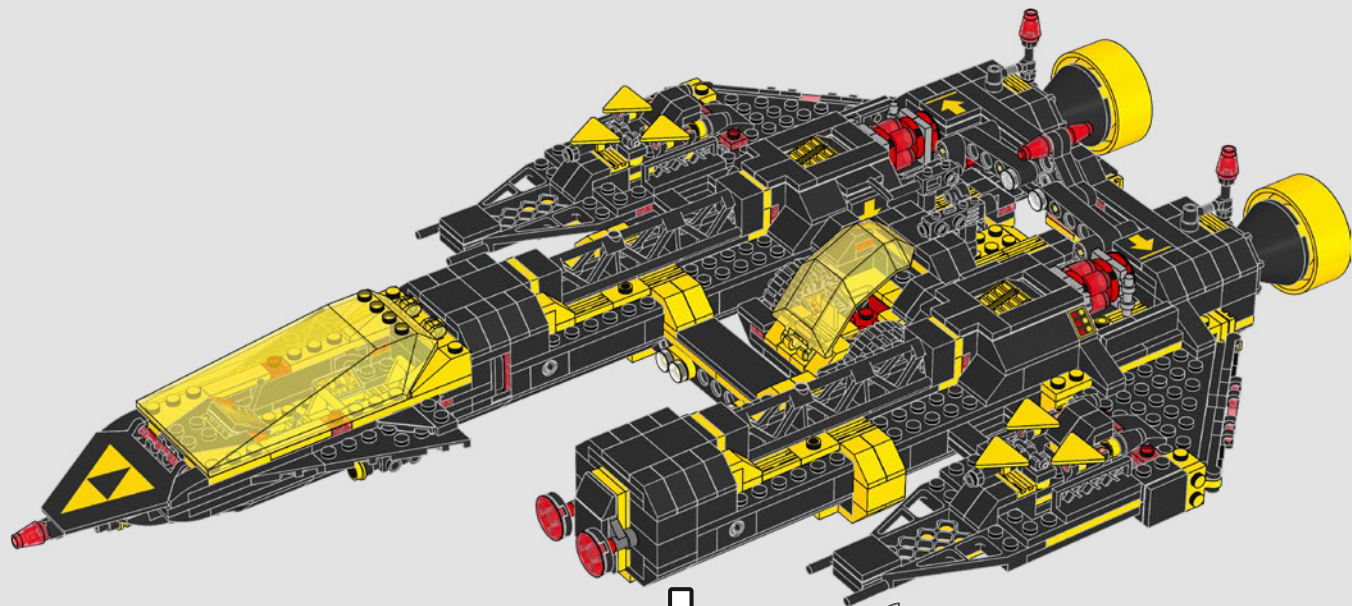

JAE WON LEE,
concepteur principal LEGO®

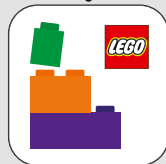

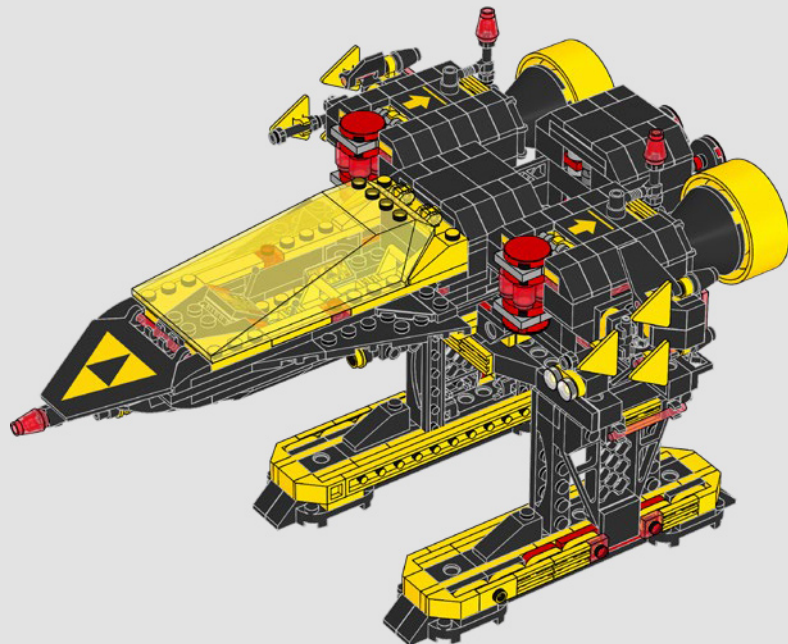

Impresiones del equipo de diseño de LEGO®

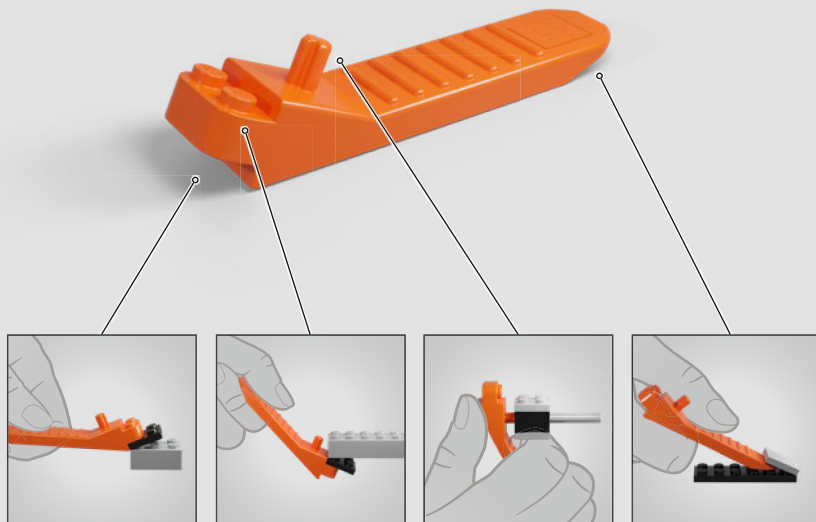

"No podríamos estar más emocionados de revivir el modelo Blacktron *Renegade* (6954) en una versión dirigida a fans de todas las edades que incorpora elementos de los sets *Invader* (6894) y *Battrax* (6941). Manteniéndonos fieles al clásico diseño asimétrico de la *Renegade*, decidimos hacer esta nueva interpretación a una escala aproximadamente 1,5 veces mayor. Esto nos dio la oportunidad de mejorar el modelo con características más avanzadas, funciones divertidas y técnicas de construcción aún más emocionantes. También pusimos a dos pilotos en la cabina y creamos una nueva función de despliegue de recursos, por lo que ahora el pequeño vehículo de carga puede desacoplarse de la nave directamente. Las pequeñas naves caza que el original solía llevar en las alas reaparecieron como transportes espaciales individuales para un nuevo droïde de aspecto clásico. Con una nueva conexión universal, todos los módulos de la nave pueden construirse por separado y combinarse libremente por el frente y por detrás. Así que no esperes más y prepárate para despegar. ¡No olvides invitar a tus amigos y familiares a compartir la experiencia de construcción!"

JAE WON LEE
diseñador sénior de LEGO®

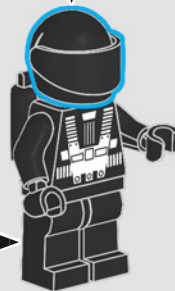

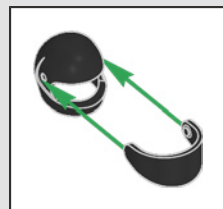

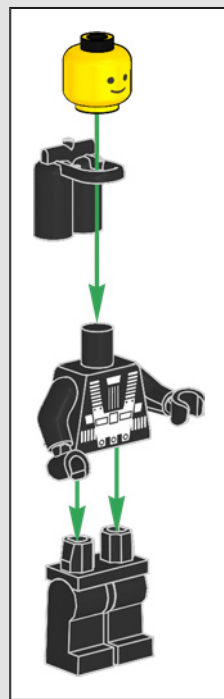

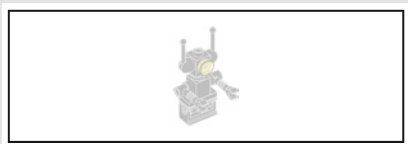

A close inspection of the Blacktron flight suit reveals upgraded equipment on the back of the torso, first observed during the encounter with 40580 Blacktron Cruiser.

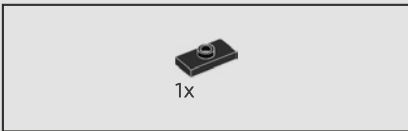

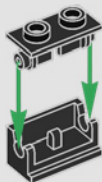

Une inspection minutieuse de la combinaison de vol Blacktron révèle la présence d'équipements améliorés à l'arrière du torse, observés pour la première fois lors de la rencontre avec le Croiseur Blacktron 40580.

Una inspección detallada del traje de vuelo Blacktron muestra mejoras de equipamiento en la parte posterior del torso, observadas por primera vez durante el encuentro con la Nave Espacial Blacktron (40580).

Blacktron engineers have reversed the optics of the standard space exploration camera and converted it into a laser blaster.

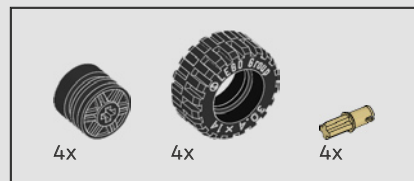

Les ingénieurs Blacktron ont inversé l'optique de la caméra standard d'exploration spatiale et l'ont convertie en blaster laser.

Aplicando técnicas de ingeniería inversa, los ingenieros Blacktron convirtieron la cámara de exploración espacial estándar en un bláster láser.
