A HISTORY OF SAILING EXCELLENCE

As the world's oldest existing international sports competition, the America's Cup remains one of the most prestigious and ambitious events to follow, in terms of both sportsmanship and innovative technology. Dating back to 1851, the event has inspired engineers and designers from all over the world to push the limits of performance in aerodynamics, manoeuvrability

and speed in yacht racing. Going into the 37th America's Cup in Barcelona 2024, reigning Defender Emirates Team New Zealand set out to further enhance its winning AC75-class yacht, *Te Rehutai*, a large foiling monohull capable of speeds exceeding 93 kph (50 knots). The result is a new generation of this high-speed sailing vessel.

SPECS

Design	35 designers for 2 years
Build	45 boat builders for 1 year
Mass	6,200 kg (13,668 lb.)
Hull length	20.7 m (67.9 ft.)
Beam	5.0 m (16.4 ft.)
Draft	5.2 m (17 ft.)
Mast height	28.0 m (91.8 ft.)
Predicted top speed	100 kph (54 kt)

BUILD THE FUTURE OF YACHT RACING

In all racing vehicles, weight and aerodynamic design play important roles in performance. In yacht racing, they are vital. Constructed mainly from carbon fibre, including the sails, this generation of the AC75 is extremely strong and very light. The main exceptions are the steel foil wings, which support the entire weight of the yacht when foiling, lifting it above the water and enabling it to accelerate to up to four times the speed of the wind. As you build your LEGO® Technic version of this amazing vessel, you get an authentic, detailed experience of its cutting-edge design and functions.

FEATURES

- The AC75 yacht incorporates both main and jib booms to enable the sailing crew to control both sails extremely efficiently. Booms are hidden within the hull to achieve clean aerodynamic lines above the deck.
- Foil wings are connected to the hull by curved arms that are raised and lowered hydraulically as the yacht tacks and gybes. This function is replicated with the pneumatic compressor (with a manual crank built into the stand) to let you pump up the foil cant arms and wings.
- Activate the compressor function and the pedal cranks spin.
- The rotating mast is supported by authentic bespoke rigging.
- The custom double-skinned mainsail is integrated with the rotating D-shaped wing spar for an optimal aerodynamic surface.
- The main traveller controls the mainsails via two rotating winches.
- The jib traveller controls the jib via two rotating winches.
