WE'RE MAKING OUR PACKAGING MORE SUSTAINABLE

We're transitioning from single-use plastic to paper-based packaging. As we progress, you may find a mix of paper and plastic in our boxes.

NOUS RENDONS NOS EMBALLAGES PLUS DURABLES

Nous passons des emballages en plastique à usage unique aux emballages à base de papier. Durant la transition, vous pourriez trouver un mélange de papier et de plastique dans nos boîtes.

QUEREMOS HACER MÁS SUSTENTABLES NUESTROS MATERIALES DE EMBALAJE

Estamos cambiando las bolsas de plástico desechables por bolsas con base de papel. Conforme avanzamos en este propósito, puedes encontrar una mezcla de papel y de plástico en nuestras cajas.

THE AT-ST CLEANS UP NICELY

It's been nearly two decades since we last released a LEGO® Star Wars™ Ultimate Collector Series version of the AT-ST Walker (10174, in 2006). Since then, the saga has continued to attract new generations of movie, streaming series and LEGO Star Wars fans. Nothing makes us happier than sharing highly detailed models of popular vehicles like this with you and, hopefully,

inspire and thrill fans everywhere. Since the Battles of Hoth and Endor in *The Empire Strikes Back* and *Return of the Jedi*, updated versions of the AT-ST walkers have appeared in *The Last Jedi*, *Rogue One: A Star Wars Story* and *The Mandalorian*. With this model, we return to its original design, with more details and features than ever before.

Enjoy building!

Jens Kronvold Frederiksen
Creative Lead & Design Director
LEGO® Star Wars™

LE TS-TT FAIT PEAU NEUVE

Voilà près de deux décennies que nous avons sorti pour la dernière fois une version LEGO® Star Wars™ Série de collection suprême du marcheur TS-TT (10174, en 2006). Depuis, la saga n'a cessé d'attirer de nouvelles générations d'amateurs de films, de séries en continu et de LEGO Star Wars. Rien ne nous rend plus heureux que de partager des modèles très détaillés de véhicules populaires comme celui-ci et, nous l'espérons, d'inspirer et d'enthousiasmer les amateurs du monde entier. Depuis les batailles de Hoth et d'Endor dans *L'Empire contre-attaque* et *Le Retour du Jedi*, des versions remaniées des marcheurs TS-TT sont apparues dans *Les Derniers Jedi*, *Rogue One : Une histoire de Star Wars* et *The Mandalorian*. Ce modèle reprend sa conception d'origine, avec plus de détails et de fonctionnalités que jamais.

Bonne construction!

Jens Kronvold Frederiksen
Responsable de la création et
directeur de la conception
LEGO® Star Wars™

EL AT-ST SE PRESENTA EN TODO SU ESPLENDOR

Han pasado casi dos décadas desde la última vez que lanzamos una versión LEGO® Star Wars™ Ultimate Collector Series del caminante AT-ST (10174, en 2006). Desde entonces, la saga ha seguido atrayendo a nuevas generaciones de fans de las películas, las series de Internet y LEGO Star Wars. Nada nos hace más felices que compartir contigo modelos altamente detallados de vehículos populares como este y, con suerte, inspirar y despertar la emoción de los fans de todo el mundo. Desde que tuvieron lugar las batallas de Hoth y Endor en *El Imperio Contraataca* y *El Regreso del Jedi*, han aparecido versiones actualizadas de los caminantes AT-ST en *Los Últimos Jedi*, *Rogue One: Una Historia de Star Wars* y *The Mandalorian*. Con este modelo, volvemos a su diseño original, si bien ahora con más detalles y características que nunca.

¡Que disfrutes construyendo!

ALL TERRAIN SCOUT TRANSPORT – THE AT-AT'S TERRIFYING COUSIN

The AT-ST walkers, often operated alongside the larger AT-AT walkers, are vital to the Empire's forces. A two-man scout vehicle with chin-mounted blaster cannons and side-mounted concussion launchers, it excels in reconnaissance and ground support missions. It moves faster than the AT-AT, with a gyro-stabilizer and an advanced locomotion system, giving the walker its distinct, creature-like walk. In the peaceful forests of Endor, they crush through the Ewoks' natural

sanctuary, seemingly unstoppable. In the chaos, the Rebels' mission to deactivate the Death Star's deflector shield hangs in the balance. That is, until, as with other Imperial expeditionary forces, the Rebels and their allies find clever ways to use the walkers' weaknesses to their advantage. The Ewoks, armed with handcrafted weapons and rocks, valiantly defend their home with ingenious traps, allowing Chewbacca and a few clever Ewoks to hijack one. The path to victory is secured.

© & ™ Lucasfilm Ltd.

LE TRANSPORT DE SURVEILLANCE TOUT-TERRAIN – LE COUSIN TERRIFIANT DU TB-TT

Les marcheurs TS-TT, souvent utilisés aux côtés des plus gros marcheurs TB-TT, sont essentiels aux forces de l'Empire. Doté de canons blasters montés sur la menton et d'un lance-grenades à concussion sur la joue, ce véhicule d'exploration pour deux hommes excelle dans les missions de reconnaissance et d'appui au sol. Il se déplace plus rapidement que le TB-TT, grâce à un stabilisateur gyroscopique et à un système de locomotion avancé qui lui confère une démarche distincte, semblable à celle d'une créature. Dans les forêts paisibles d'Endor, les marcheurs dévastent le sanctuaire naturel des Ewoks, semblant inarrêtables. Dans ce chaos, la mission des Rebelles pour désactiver le bouclier déflecteur de l'Étoile de la mort est menacée. Jusqu'à ce que, comme les autres forces expéditionnaires impériales, les Rebelles et leurs alliés trouvent des moyens astucieux d'utiliser les faiblesses des marcheurs à leur avantage. Les Ewoks, armés de pierres et d'armes artisanales, défendent vaillamment leur maison à l'aide de pièges ingénieux, ce qui permet à Chewbacca et à quelques Ewoks fûtés d'en détourner un. Le chemin vers la victoire est assuré.

TRANSPORTE DE EXPLORACIÓN TODOTERRENO: EL ATERRADOR PRIMO HERMANO DEL AT-AT

El caminante AT-ST, que suele operar en conjunto con unidades AT-AT más grandes, es un recurso vital para las fuerzas del Imperio. Se trata de un vehículo de exploración para dos personas con cañones bláster instalados en la parte inferior de la cabina y lanzagranadas de impacto de montaje lateral que destaca en misiones de reconocimiento y apoyo terrestre. La combinación de un estabilizador giroscópico y un sistema locomotor avanzado le permite moverse más rápido que el AT-AT con un modo característico de caminar similar al de una criatura viva. En los pacíficos bosques de Endor, grupos de estos vehículos atraviesan el santuario natural de los Ewoks dejando una estela de destrucción y sin que parezca haber una forma de detenerlos. En medio del caos, hacen que la misión de desactivar el escudo deflector de la Estrella de la Muerte a cargo de los rebeldes penda de un hilo. Esto es así hasta que, al igual que con otras fuerzas expedicionarias imperiales, los rebeldes y sus aliados encuentran formas creativas de aprovechar las debilidades de los caminantes. Sin dejarse intimidar, los Ewoks defienden su hogar valiéndose de ingeniosas trampas, armamento artesanal y piedras, lo que permite a Chewbacca y a unos pocos de los Ewoks más inteligentes tomar el control de una unidad, asegurando su camino hacia la victoria.

FROM THE LEGO® STAR WARS™ DESIGN TEAM

Most *Star Wars*™ vehicles are famously rugged-looking and show authentic signs of wear and tear. Subtle color nuances in this model hint at rust and dirt marks from trekking through the forests of Endor, and for the first time, we have a detailed interior as well. Building a vehicle of this shape, with skinny legs and a big, heavy 'head,' takes some engineering. In the movie versions, the legs were stabilized with a horizontal steel rod – not an option in a LEGO® version! We experimented with proportions and tweaked the design to find the optimal center of gravity. We added non-slip rubber elements to the bottom of the footpads, elongated both the pads and fence-cutting blades slightly, and posed the legs at an angle. This helped us create a dynamic pose and secure the model's stability.

UN MOT DE L'ÉQUIPE DE CONCEPTION LEGO® STAR WARS™

La plupart des véhicules de *Star Wars*™ sont célèbres pour leur aspect robuste et présentent des signes authentiques d'usure. Les subtiles nuances de couleur de ce modèle laissent entrevoir des marques de rouille et de saleté dues aux excursions dans les forêts d'Endor, et pour la première fois, nous proposons également un intérieur détaillé. Construire un véhicule de cette forme, avec des jambes maigres et une « tête » lourde et imposante, demande un peu d'ingénierie. Dans les versions cinématographiques, les jambes étaient stabilisées par une tige d'acier horizontale – ce qui n'est pas une option pour une version LEGO®! Nous avons joué avec les proportions et modifié la conception pour trouver le centre de gravité optimal. Nous avons ajouté des éléments en caoutchouc antidérapants au bas des pattes, allongé légèrement les pattes et les lames de coupe de barrières, et posé les pattes en biais. Cela nous a permis de créer une pose dynamique et d'assurer la stabilité du modèle.

IMPRESIONES DEL EQUIPO DE DISEÑO DE LEGO® STAR WARS™

La mayoría de los vehículos de *Star Wars*™ son conocidos por tener un aspecto robusto y presentan marcas auténticas de desgaste y deterioro. Este modelo muestra sutiles matices de color que evocan restos de óxido y suciedad acumulados en sus travesías por los bosques de Endor y, por primera vez, también presenta un interior detallado. Construir un vehículo con esta forma, largas y delgadas patas, y una *cabeza* grande y pesada exige cierta ingeniería. En las versiones de la pantalla grande, las patas se estabilizaban mediante una varilla de acero horizontal, ¡lo cual no es una opción en una versión LEGO®! Experimentamos con las proporciones y ajustamos el diseño para optimizar la posición del centro de gravedad. Integramos elementos antiderrapantes de hule por la parte inferior de los apoyos de las patas, que hicimos más largos junto con las cuchillas cortavallas, y colocamos las patas en ángulo. Esto nos ayudó a crear una pose dinámica y a garantizar la estabilidad del modelo.

DETAILS FROM HEAD TO TOE

Greebling details are a characteristic of *Star Wars*™ vehicles, and we always have fun recreating them. As you build, look for unusual LEGO® elements like ski poles and paint rollers!

Inside the cockpit, controls, viewscreens and holoprojectors help Imperial pilots see ahead and behind them to navigate any terrain and spot incoming threats.

Swing open the entire top section for a closer look inside.

The hatch opens front to back to let pilots enter and exit the walker.

Move the 'head' from side to side.

The light blaster cannon (left) and concussion launcher (right) rotate up and down.

The chin-mounted twin-blaster cannon moves up and down.

DES DÉTAILS DE LA TÊTE AUX PIEDS

Les détails ornementaux sont une caractéristique des véhicules *Star Wars*™, et nous nous amusons toujours à les recréer. Pendant que vous construisez, repérez les éléments LEGO® inhabituels comme des bâtons de ski et des rouleaux de peinture!

Dans la cabine, les commandes, les écrans de visualisation et les holoprojecteurs aident les pilotes impériaux à voir devant et derrière eux pour naviguer sur n'importe quel terrain et repérer les menaces imminentes.

Ouvrez toute la partie supérieure pour voir l'intérieur de plus près.

La trappe s'ouvre d'avant en arrière pour permettre aux pilotes d'entrer et de sortir du marcheur.

Faites bouger la « tête » d'un côté à l'autre.

Le canon blaster léger (à gauche) et le lance-grenades à concussion (à droite) pivotent vers le haut et vers le bas.

Le canon à double blaster monté sur le menton se déplace de haut en bas.

DETALLES DE LA CABEZA A LOS PIES

Los detalles sobrecargados son una característica común de los vehículos de *Star Wars*™, y siempre nos divertimos recreándolos. Mientras construyes, ¡busca elementos LEGO® inusuales, como bastones de esquí y rodillos para pintar!

Adentro de la cabina hay controles, pantallas de visualización y holoproyectores que ayudan a los pilotos imperiales a ver lo que tienen frente a ellos y detrás para navegar por cualquier terreno y detectar las amenazas que se aproximan.

Abre la sección superior completa para ver el interior más de cerca.

La escotilla se abre de adelante hacia atrás para permitir a los pilotos entrar y salir del caminante.

Mueve la cabeza de un lado a otro.

El cañón bláster ligero (izquierda) y el lanzagranadas de impacto (derecha) tienen margen de giro hacia arriba y hacia abajo.

El cañón bláster doble instalado en la parte inferior de la cabina se mueve hacia arriba y hacia abajo.
