THAT'S NO MOON

Since our first LEGO® *Star Wars*™ sets arrived in our galaxy in 1999, we have released hundreds of detailed models in all scales and for builders of all ages. We listen closely to fans and look for creative new ways to interpret memorable story moments to enhance the LEGO *Star Wars* experience. The Death Star™ is an undisputed icon in *Star Wars* lore, among fans, and for us as designers. This Ultimate Collector Series version combines elements of both the Death Star™ and Death Star™ II and is, by far, our most detailed and largest LEGO *Star Wars* set in terms of size, mass and number of bricks and minifigures. In the saga, the construction of the Death Stars is shrouded in secrecy, and while we can't reveal all our design secrets either, we promise you will get a chance to see new sides of this spectacular space station!

Enjoy building!

THAT'S A SPACE STATION

The Death Star is the ultimate symbol of the Galactic Empire's might: a moon-sized space station capable of annihilating entire planets with a single blast. Conceived during the Clone Wars under the secret guidance of Darth Sidious, it was supervised by prominent figures like Vice Admiral Rancit and, later, Grand Moff Wilhuff Tarkin. Its construction spanned decades and defied setbacks and sabotage along the way. The power of the first Death Star was demonstrated with the destruction of Alderaan, but thanks to our Rebel heroes, the Rebel Alliance was able to exploit its design flaw to destroy it during the Battle of Yavin.

DEATH STAR II

Undeterred, the Empire began constructing the larger Death Star II near Endor, this time boasting even more devastating firepower. Emperor Palpatine, orchestrating a trap to crush the Rebel Alliance, leaked information about the Death Star II's construction, luring the Rebels into a decisive confrontation. During the ensuing Battle of Endor, the Emperor met his demise at the hands of Darth Vader, who, in a final act of redemption, turned against his master to save his son, Luke Skywalker. Seizing the moment, the Rebel forces launched a coordinated assault that culminated in the destruction of the second Death Star, delivering a significant blow to the Empire and marking a turning point in the Galactic Civil War.

A detailed LEGO Star Wars model of the Death Star II, shown from a low angle against a starry space background. The model is primarily grey and white, with several bright green laser beams emanating from the top. The beams are constructed from green Technic axles and connectors, some ending in clear lenses. The Death Star's iconic dish is visible, and the overall structure is highly detailed with various panels and mechanical-looking components.

RECREATING THE ULTIMATE POWER IN THE UNIVERSE

We decided early on that we wanted to incorporate scenes from both the first Death Star, as seen in *Star Wars: A New Hope™*, and the Death Star II from *Star Wars: Return of the Jedi™*. This gave us some creative freedom to experiment with the different locations and create a layout that follows the logical flow of the saga. The sheer size of the model allowed us to design more than a detailed display model – we could actually incorporate a lot of great functions as well as an interior packed with references both in the build and graphic designs. From top to base, you can have fun with dynamic features that keep your 36 minifigures and 2 droid figures busy! We won't share too many spoilers here – instead, why don't we just get started on the build?

NOW BOARDING

DOCKING BAY 327

Both crew and visitors, whether voluntary or forced, arrive via shuttles or other starships through the hangar docking bay. (Watch out for the lift shaft in the floor.) If you're not on the run or hiding from stormtroopers, take a moment to enjoy the panoramic view of the galaxy with representations of planets and stars.

NEED A LIFT?

Getting around in the Death Star would be an arduous journey by stairs. The minifigure characters can access each floor from the base to the top via the lift. At the top of the model, turn the small gearwheel knob clockwise to move the lift car up and counterclockwise to go down. When it reaches the desired level, you can see a small white panel appear to the left of the door. (Ambient elevator music not included.)

A NEW ALLIANCE BEGINS TO FORM

IMPERIAL CREW MEMBER

The Death Star is an extraordinarily well-oiled machine. Imperial Crew, specialised in craftsmanship and logistics, are needed on every level to ensure its smooth operation and regular maintenance.

STORMTROOPER

Stormtroopers are ruthless in combat and conditioned for unwavering loyalty to the Empire. Their characteristic white armour makes it impossible to distinguish them from each other, and they seem infinitely disposable in battle. But what they get up to in their spare time aboard this space station may surprise you.

LUKE SKYWALKER (The Rebel)

From a safe, uneventful life as a Tatooine farmer, Luke finds himself thrust into a galactic drama of epic proportions. Aboard the Death Star, he quickly learns to navigate new territory as a Rebel, alongside his newfound friends and loyal droids.

HAN SOLO (Captain of the *Millennium Falcon*)

The galaxy's most infamous, charming smuggler-turned-Rebel hero learned from an early age that the only person he can trust is himself. Alright, and his co-pilot and partner in crime, Chewbacca. But the captain of the *Millennium Falcon* has limited patience with the Empire (and vice versa), so if he can score a credit or two by rescuing a kidnapped princess from their claws? Fine by him.
