ALL ABOOOAAARD!

You are hereby invited to a winter adventure aboard the LEGO® Holiday Express Train! Departing from the LEGO North Pole, this classic frosty-blue steam locomotive and train brings important passengers and precious parcels to any destination you can imagine. The engineer guarantees the train will reach every stop on time, while the conductor is thrilled to assist travellers – and maybe serve a hot drink.

The winter holidays always feel a little warmer when you're with the people you love. Like the travelling minifigure companions meeting at the station here, you might want to take a creative journey with someone, too. We've made it easy for you to share the building experience – just pick up a booklet each and you're off!

– The LEGO® Icons Design Team

HIGHLIGHTS TO SPOT

- The miniature blue train is the first 3D-printed piece included in a LEGO® retail set, while still maintaining the high standards of quality and safety of the LEGO System in Play.
- Have you travelled with us before? Perhaps you've enjoyed fun holidays with the 10254 Winter Holiday Train (in 2016).
- The train is not all that moves on the tracks – watch the chimney and the polar bear when the train puffs along the trails!
