Q LEGO® Builder

"The sideways connection point on the birch tree lets the nuthatch hop up and down the tree trunk, just as they do in real life."

The LEGO® Icons Design Team

From the LEGO® Icons Design Team

Welcome to the third model in our LEGO® Icons 'Gardens of the World' series, where you can unwind in a cosy autumn scene. Inspired by the thatched rural cottages of northern Europe, this set features all the charm of country life, whether you want to forage in the woods, harvest from the vegetable patch or care for the wildlife. (Or, perhaps best of all, cook hearty stews!) Sideways building and triangular geometry shape the cottage's roof and frame, and lots of elements debut in new LEGO colours or decorations, including the two birds: a European robin and a Eurasian nuthatch. You can even use elements from the 10315 Tranquil Garden or the 10359 Fountain Garden to add a creative twist to your model!

Local Birdlife

Eurasian Nuthatch

With its sleek blue-grey plumage and distinctive black eye-stripe, this nimble songbird is renowned for its unique ability to descend tree trunks headfirst!

European Robin

With its vibrant orange chest and melodious song, the European robin is a beloved garden inhabitant, often seen searching for unearthed insects.

Garden gnomes bring luck, or at least fun, to your garden. Legend says they wear white hats if they want to be seen, red if they want to hide! This pointy LEGO® hat debuts in red for the first time.

The European robin loves it when you do your gardening! If you see one 'supervising' your work, it might be eagerly waiting to snatch up insects and worms that surface when you turn the soil.
