WE'RE MAKING OUR PACKAGING MORE SUSTAINABLE

We're transitioning from single-use plastic to paper-based packaging. As we progress, you may find a mix of paper and plastic in our boxes.

NOUS RENDONS NOS EMBALLAGES PLUS DURABLES

Nous passons des emballages en plastique à usage unique aux emballages à base de papier. Durant la transition, vous pourriez trouver un mélange de papier et de plastique dans nos boîtes.

QUEREMOS HACER MÁS SUSTENTABLES NUESTROS MATERIALES DE EMBALAJE

Estamos cambiando las bolsas de plástico desechables por bolsas con base de papel. Conforme avanzamos en este propósito, puedes encontrar una mezcla de papel y de plástico en nuestras cajas.

Magnolia Branches

Since we released the first LEGO® Botanicals bouquet, we have wanted to create a set that celebrates the beauty of the magnolia tree. We've experimented with different building techniques and elements over the years to interpret the distinctive look you can find in two-tone species. In the end, inspired by the subtle gradients of the petals, we set out to create a new version of one of our existing leaf elements. Our element molding team employed a unique process that seamlessly blends the two colors together into one leaf element to create a consistent, gradient color shift.

Les branches de magnolia

Depuis le lancement du premier bouquet LEGO® Botanicals, nous voulions créer un ensemble qui célèbre la beauté du magnolia. Nous avons testé différentes techniques et éléments de construction au fil des ans pour reproduire l'aspect distinctif que vous pouvez trouver dans les espèces bicolores. Finalement, inspirés par les dégradés subtils des pétales, nous avons entrepris de créer une nouvelle version de l'un de nos éléments de feuille existants. Notre équipe de moulage d'éléments a utilisé un processus unique qui mélange facilement les deux couleurs en un seul élément de feuille pour créer un dégradé de couleurs cohérent.

“

Finally, we were able to bring our magnolia branch bouquet to life. As you build, you will see the different stages of the flowers' growth, from tiny buds to gorgeous blooms. We hope you enjoy adding the delicate beauty of this magnificent tree to your home!”

THE LEGO® BOTANICALS DESIGN TEAM

« Enfin, nous avons pu donner vie à notre bouquet de branches de magnolias. Au fur et à mesure que vous construisez, vous voyez les différentes étapes de la croissance des fleurs, des minuscules bourgeons aux magnifiques fleurs. Nous espérons que vous prendrez plaisir à ajouter la beauté délicate de ce magnifique arbre à votre maison! »

L'ÉQUIPE DE CONCEPTION DE LEGO® BOTANICALS

“Finalmente, pudimos dar vida a nuestro ramo hecho de ramas de magnolia. Conforme vayas construyendo, descubrirás las diferentes fases del crecimiento de las flores, desde los pequeños brotes hasta las majestuosas corolas en su máximo esplendor. ¡Esperamos que disfrutes abriendo las puertas de tu hogar a la delicada belleza de este magnífico árbol!”

Ramas de Magnolia

Desde que lanzamos el primer ramo LEGO® Botanicals, hemos tenido el deseo de crear un set en homenaje a la belleza de la magnolia. A lo largo de los años, hemos experimentado con distintas técnicas de construcción y una variedad de elementos para interpretar el aspecto tan característico de las especies bitono. Inspirados por los sutiles degradados de sus pétalos, nos propusimos desarrollar una nueva versión de uno de nuestros elementos que representan hojas. El equipo de moldeado de piezas introdujo un proceso único que logra fusionar de manera armoniosa los dos colores en una hoja, creando así una transición de color suave y uniforme.

Spiral patterns

While many flowers have distinct rings of petals, magnolias have floral parts like stamens and carpels arranged in spirals.

Motifs en spirale

Alors que de nombreuses fleurs ont des anneaux distincts de pétales, les magnolias ont des parties florales d'étamines et de carpelles disposées en spirale.

Patrones en espiral

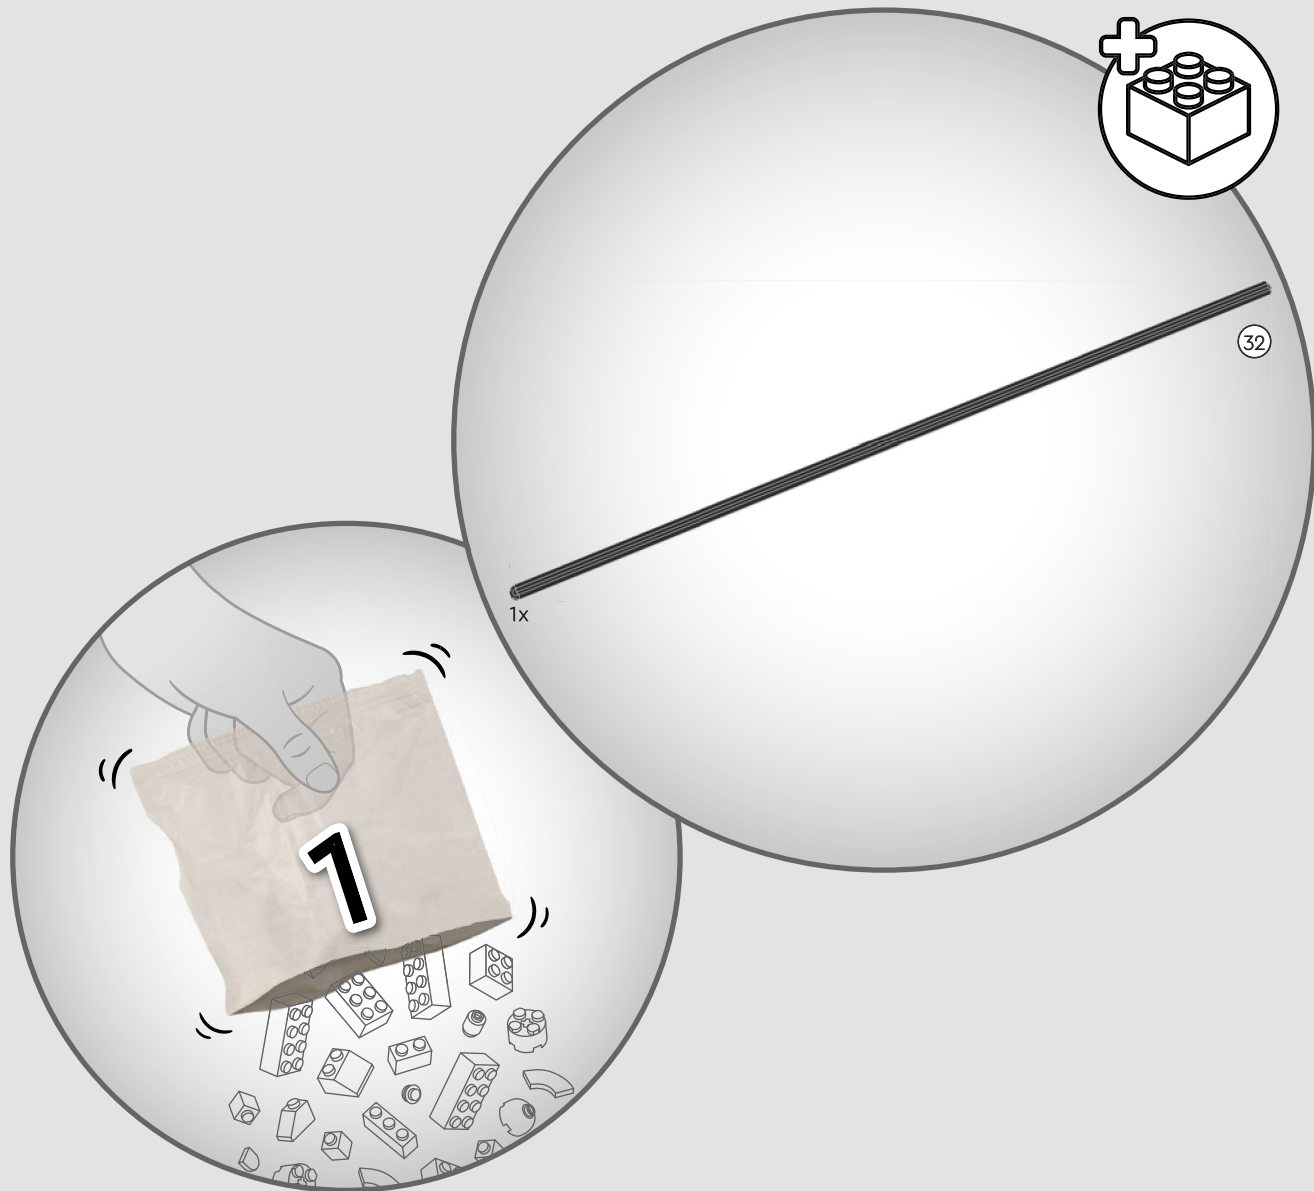

Mientras que muchas otras flores tienen anillos de pétalos bien diferenciados, las magnolias presentan determinadas partes, como los estambres y los carpelos, organizadas en espiral.
