WE'RE MAKING OUR PACKAGING MORE SUSTAINABLE

We're transitioning from single-use plastic to paper-based packaging. As we progress, you may find a mix of paper and plastic in our boxes.

NOUS RENDONS NOS EMBALLAGES PLUS DURABLES

Nous passons des emballages en plastique à usage unique aux emballages à base de papier. Durant la transition, vous pourriez trouver un mélange de papier et de plastique dans nos boîtes.

QUEREMOS HACER MÁS SUSTENTABLES NUESTROS MATERIALES DE EMBALAJE

Estamos cambiando las bolsas de plástico desechables por bolsas con base de papel. Conforme avanzamos en este propósito, puedes encontrar una mezcla de papel y de plástico en nuestras cajas.

The Eiffel tower

Built by Gustave Eiffel for the 1889 World's Fair, the 'Iron Lady' stands 984 ft. (300 m) tall and welcomes six million visitors a year. Originally designed to last 20 years, it took just over two years to build. Its distinctive silhouette has long since become a global icon of France.

Construite par Gustave Eiffel pour l'Exposition universelle de 1889, la « Dame de fer » s'élève à 300 mètres de haut et accueille six millions de visiteurs par an. Conçue à l'origine pour durer 20 ans, elle n'a nécessité qu'un peu plus de deux ans de construction. Sa silhouette distinctive est depuis longtemps devenue une icône mondiale de la France.

The Arc de Triomphe

Commissioned by Napoleon in 1806 and finished in 1836, the Arc de Triomphe honors French armies past and present. Beneath it lies the Tomb of the Unknown Soldier, making it both a symbol of triumph and a solemn site of national remembrance.

L'Arc de Triomphe

Commandé par Napoléon en 1806 et achevé en 1836, l'Arc de Triomphe rend hommage aux armées françaises d'hier et d'aujourd'hui. Il abrite la Tombe du Soldat inconnu, ce qui en fait à la fois un symbole de triomphe et un site solennel de commémoration nationale.

El arco del Triunfo

Encargado por Napoleón en 1806 y terminado en 1836, el arco del Triunfo honra a los ejércitos franceses del pasado y el presente. Bajo él se encuentra la tumba del soldado desconocido, lo que lo convierte tanto en un símbolo de triunfo como en un lugar solemne de memoria patria.

FROM THE LEGO® ARCHITECTURE

Design Team

This model seeks to capture the emotion and aesthetic of Paris in a beautiful home decor display piece, as an artistic representation of some of the city's most famous landmarks. Combined with characteristic Parisian city buildings and skyline silhouettes, it creates a charming and immersive scene. If you are familiar with LEGO® Architecture models, this set offers a new twist on our Skyline series. Landmark structures are still captured with a high level of detail, yet here the focus is on creating an overall scene and atmosphere than on strictly adhering to real life. Given the small scale, we experimented with different elements to find the perfect LEGO pieces to represent different details. The further back you go in the model, the smaller the scale, reinforcing a sense of depth to the scene (trees framing the street, for instance). Different sections of the model are layered together to create the illusion of depth despite a shallow footprint. Because the model is made up of small sections for each featured structure, all of which are contained within the display frame, you can build sections individually and see everything come together like a jigsaw puzzle – or a 3D postcard.

A minimalist white frame contains the scene and is easily displayed on shelves or hanging on a wall.

Un cadre blanc minimaliste contient la scène et peut être facilement exposé sur des étagères ou accroché au mur.

El marco blanco minimalista que contiene la escena se exhibe fácilmente en un estante o colgado en la pared.

LEGO® ARCHITECTURE : UN MOT DE

l'équipe de conception

Ce modèle cherche à capturer l'émotion et l'esthétique de Paris dans une magnifique pièce de décoration intérieure, en tant que représentation artistique de certains des sites les plus célèbres de la ville. La combinaison avec les bâtiments parisiens caractéristiques et les silhouettes de la ligne d'horizon crée une scène charmante et immersive. Si vous connaissez déjà les modèles LEGO® Architecture, vous reconnaîtrez que cet ensemble offre une nouvelle tournure à notre série de paysages urbains. Les structures emblématiques sont toujours capturées avec un niveau de détail élevé, mais ici, l'accent est mis sur la création d'une scène et d'une atmosphère globales plutôt que sur la stricte exactitude par rapport à la réalité. Compte tenu de la petite échelle, nous avons expérimenté différents éléments afin de trouver les pièces LEGO parfaites pour représenter les différents détails. Plus on recule dans le modèle, plus l'échelle est petite, ce qui renforce le sentiment de profondeur de la scène (les arbres encadrant la rue, par exemple). Différentes sections du modèle sont superposées pour créer l'illusion de profondeur malgré une empreinte au sol peu profonde. Comme le modèle est constitué d'un cadre d'exposition et de nombreuses petites sections pour chaque structure présentée, vous pouvez construire des sections individuellement et voir le tout s'assembler comme un casse-tête – ou une carte postale en 3D.

LEGO® ARCHITECTURE: IMPRESIONES DEL

equipo de diseño

Este modelo busca capturar la emoción y la estética de París en una bella pieza para exhibir en el hogar que retrata artísticamente algunos de los monumentos más famosos de la ciudad. La combinación de edificios eminentemente parisinos y siluetas del horizonte de la ciudad crea una escena encantadoramente inmersiva. Si estás familiarizado con los modelos LEGO® Architecture, en este set encontrarás un nuevo giro a nuestra serie Skyline. Si bien las estructuras icónicas aún se plasman con gran detalle, en este caso se prioriza la creación de una escena y una atmósfera generales por encima del realismo. Las dimensiones más reducidas nos obligaron a experimentar con distintos elementos para encontrar las piezas LEGO perfectas para representar distintos detalles. Cuanto más retrocedes en el modelo, menor es la escala, lo que refuerza la sensación de profundidad de la escena (solo mira lo que pasa con los árboles). A pesar de que la creación final tiene una huella estrecha, la superposición de sus distintas partes logra crear la ilusión de profundidad. Como el modelo se compone de un marco de exhibición y múltiples secciones pequeñas para cada estructura destacada, puedes dar forma a estas individualmente y ver cómo todo se une como un rompecabezas o una postal en 3D.
