UNMASK YOUR CREATIVITY

★ Founded in the 5th century, Venice emerged from 118 small islands, ingeniously connected to form a city built on the water. If you've visited the Venetian lagoon, canals and unique structures, you've already felt its incredible atmosphere, so steeped in history. A UNESCO World Heritage Site, recognised for its Venetian Gothic architecture and rich culture, Venice has nurtured generations of artisans and refined world-class craft traditions. Music, art, fashion and Byzantine-era mosaics weave a vibrant tapestry of creative expressions. Every year in February or March, the city transforms into a festive stage when millions of guests join the Venice Carnival. And in this model, it's at its height! With extravagant costumes and intriguing masks full of symbolism, everyone plays their part in a celebration of beauty and playful mystery. We'll let you imagine who the characters in this model are!

MOON AND SUN

Celestial symbols, like the sun and the moon, are familiar sights in Venice and popular carnival mask and costume motifs. Together, they symbolise universal balance, harmony and love.

GONDOLIERS

When streets and plazas are packed with parades, take a break from the bustle and let the experienced gondoliers take you on a tour along the serene canals.

FROM THE LEGO® ICONS DESIGN TEAM

★ If you want to create a LEGO® Icons storytelling experience, rooted in unique architecture and filled with minifigures, the Venetian Neighbourhood has it all. Inspired by the city's styles, historical references and iconic carnival, we've designed a creative interpretation that lets you stroll through the picturesque cityscape. You can separate the terracotta-tiled roofs and peek through the high ceilings into an apartment furnished in antique luxury. Traditional crafts flourish, and you can find artisanal treasures in the glassware shop. (Watch out for the slippery moss-covered steps!) Across the footbridge, you can explore the old tower, rotate its top to face a different direction, and turn the crank to watch the celestial calendar move. And, if you need a little time to take it all in, relax in the shade of the old olive tree. You can even switch the two sections of the model and display it how you like. Enjoy your stay!

LET THE MUSIC PLAY

Do you hear music? Venice seems to hum to a delightful score written centuries ago. This miniature piano is a 3D-printed piece designed by a team of LEGO® Model and Element Designers and Sound Engineers to add a little extra ambience.

Tip: Turn the vase on top to play a familiar harmony.

In traditional glassblowing, you blow through a hollow pipe to expand molten glass heated to 1,100 °C (2,000 °F), then shape the glass over a marver with various tools. (Don't try this at home.)

Venice's beautiful bell towers, though built as heavy structures on water-set foundations, have, remarkably, endured the test of time. Nearly 40% still stand today.
