

Fact sheet: Responsibility Highlights

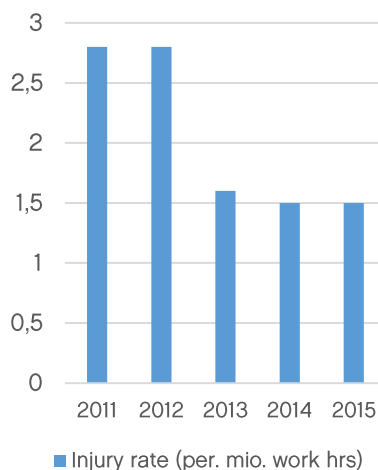

Interim responsibility data for first half of 2015 from 1 January – 30 June

	2015	2014	Change
Responsibility data 1 January – 30 June			
Product recalls	0	0	-
Injury rate with absence	1,5	1,5	-
Females appointed and recruited	44%	43%	+1%
Energy efficiency improvement	5,7%	0,3%	+5,4%
Recycled waste	93%	90%	+3%
Supplier quality non-conformity resolution rate	100%	100%	-
Supplier Code of Conduct non-conformity resolution rate	100%	100%	-

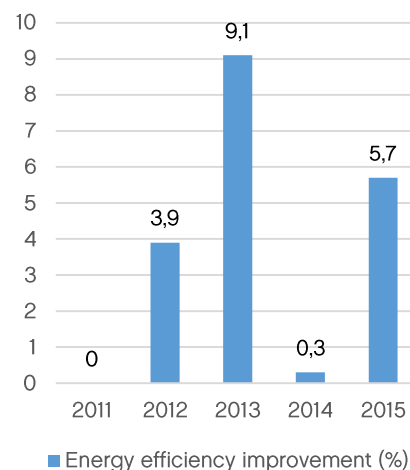

Supplier Code of Conduct non-conformity resolution rate (interim)

Injury rate (interim)

Energy efficiency improvement (interim)

Notes:

Energy efficiency:

The energy efficiency improvement is calculated as the rate between energy consumption and raw materials used. The data is shown with the previous year as baseline. Energy loss relating to energy generations from onsite power plants is excluded from the energy consumption.
